U-M's minority student enrollment increases in all groups again this year. Reaches 12% of total, all-time high level.

ANN ARBOR---Minority student enrollment on The University of Michigan's Ann Arbor campus this year reached 12 percent of the student body, an all-time high. Enrollment in all minority groups has increased for the second straight year.

This year's minority enrollment total of 3,729 represents an increase of 232, according to the University's annual report to the Regents. Black students total 1,619, an increase of 24; Asian students, 1,404, up 168; Native American students, 156, an increase of 16; and Hispanic students, 550, 24 more than a year ago.

"Total black enrollment increased 1.5 percent this year, or 5.2 percent of total enrollment," the report said. "Not since 1975-76 has black enrollment increased two years in a row.

"Hispanic students are now 1.8 percent of the total student population, the highest percent ever achieved. Total Native American student enrollment reached 0.5 percent of all students, the highest number ever. Asian students, 4.5 percent of total enrollment, is 13.6 percent larger than last year's and the largest ever enrolled."

(more)

At the undergraduate level, minority enrollment totals 2,466 (or 11.5 percent of all undergraduate students), an all-time high. In this group, there are 1,068 blacks (1,031 last year), 1,000 Asians (860), 104 Native Americans (97), and 294 Hispanics (266).

Looking at the new enrollment at the undergraduate level this year, the report noted that minority students represent 12.2 percent of this group, compared to 11 percent last year.

"New black undergraduate enrollment increased by 12.5 percent, from 248 in 1984 to 279 this year. This is the largest enrollment of new black undergraduates since 1978. New Hispanic undergraduates increased from 92 last year to 98 this year, the largest number ever to enroll. New Native American enrollment declined from 33 last year to 21 this year. New Asian enrollment is 21 percent higher this year with 323 undergraduates compared to 267 last year."

At the graduate/professional level, the report continued, minority students total 1,263 this year (or 13.3 percent of the total), the largest number since 1976.

"Black graduate/professional enrollment decreased by 13 to 551, or 5.8 percent of the total, the same percent as a year ago. Hispanic enrollment decreased by 4 to 256, or 2.7 percent of all graduate/professional students, the same as last year. The number of Native American students increased by 9 to 52, or 0.5 percent of the total. Asian students increased by 7.5 percent to 404 students, 4.3 percent of the total."

The U-M report also noted that the graduation rates for black and Hispanic students have substantially increased in recent years. For example, "45.5 percent of the incoming black freshmen of 1975 received degrees within six years but 58.6 percent of the incoming 1979 cohort obtained degrees within six years. Black and Hispanic students are still less likely than their majority peers to ultimately obtain baccalaureate degrees, but the difference is narrowing.

(more)

"The Asian graduation rate, which has historically been similar to or greater than that of the majority, was 69.1 percent among the 1979 incoming freshman class. Because the cohort of Native Americans is so small, the undergraduate graduation rates tend to fluctuate substantially from one year to the next; 68.8 percent of the incoming 1979 cohort received a degree within six years."

Virginia B. Nordby, director of Office of Affirmative Action and executive assistant to the president at U-M, said: "Increased funding of minority student programs throughout the University stands out as the significant event in student affirmative action this year.

"Existing financial aid programs have been expanded and new ones have been developed and funded. Additional personnel devoted to minority recruitment and counseling have been hired by the admissions office, the financial aid office and a number of U-M schools and colleges. In addition, funding for many programs was found elsewhere, largely through the efforts of individual faculty and administrators."

In prefacing this year's minority enrollment report, Niara Sudarkasa, U-M associate vice president for academic affairs, said that "while there is still much room for improvement in ensuring that minorities have greater access and success at the U-M, there is a long-standing and determined effort under way to address the issues of minority preparedness, performance and persistence which are of concern nationally and throughout the state as well as on this campus."

The results of that effort, she noted, offer cause for both encouragement and concern.

"While overall minority enrollment rose steadily into the 1980s, black enrollment rose to 7.2 percent in 1976, and then dropped precipitously to 4.9 percent in 1983 before increasing to 5.2 percent in 1985. This decline in black enrollment has been a cause for particular concern because of their relatively large numbers in the state of Michigan, from which we draw 70 percent of our undergraduates and 60 percent of our graduate and professional students."

Sudarkasa noted that, according to recent studies, the following key factors have led to the minority enrollment decline in the state and nation over the past decade:

"(1) Shrinking financial aid dollars which had made a college education affordable for minorities in the late 1960s and early 1970s; (2) continuing inequalities in education at the pre-college level, which have

(more)

left far too many minority students unprepared or underprepared for colleges with selective admissions policies; and (3) overt and covert attacks on affirmative action, which challenged special recruitment, admissions, and support programs for minority students."

Sudarkasa continued, "It is impossible to overstate the impact of the economic recessions of the late 1970s on minority enrollment in higher education. Federal cutbacks in various educational programs, the failure of student financial aid programs to keep pace with inflation, the increase in unemployment and underemployment---all impacted particularly heavily on minorities, notably on those working class families with college-age members.

"At the undergraduate level, the problem of diminished opportunities due to economic factors was exacerbated by what now appears to have been a marked decline in access to quality pre-college education for minorities in the public schools in most parts of the nation."

At the U-M, Sudarkasa said, "the issue of providing equal access and ensuring success for minority students has been given renewed priority. The problems of underpreparedness and underrepresentation in major program areas have prompted the University to step up minority recruitment, increase financial aid, and vigorously promote a number of academic and non-academic support programs and services for minority students.

"The University also collaborates with the Detroit public school system as well as various other K-12 systems in providing academic enrichment programs for pre-college students and special training and research programs for teachers.

"The effect of these efforts has been a marked increase in underrepresented minority enrollment in the freshman class of 1985 and an improvement in minority graduation rates. It is also evident that there is greater diversity in the fields of study being pursued by minority students at the U-M.

"The continuing improvement in black retention and graduation rates is especially significant because this is an area of particular concern to many faculty, students, parents and alumni. The progress in this area is a testament, in part, to the strength of the University's support programs for minority students."

Minority enrollment figures do not include such categories as non-resident aliens and students in non-degree credit programs.
