Reprinted from the President's Report<br>for 1940-41, University of Michigan

# THE REGISTRAR OF THE UNIVERSITY 

## To the President of the University:

Sir-I have the honor to submit herewith the report of the Registrar for the year 1940-41.

Personnel.-Several changes have occurred in personnel in this period. Mr. Edwin Stevens Rice resigned to accept an appointment in the office of the Dean of the Horace H. Rackham School of Graduate Studies. His place was filled by the appointment of Mr. Carl Alfred Palmquist. Miss Martha Elizabeth Peters was appointed to fill the position of Miss Ruth Jane Carver, who resigned to accept a position in the Office of Educational Investigations. Mrs. Angeline Nydam Spoelhof was transferred from the staff of the Dictaphone Station to fill the vacancy left by Mrs. Elnor Coles Parker, resigned. Mrs. Alicia Johnson Buchanan was transferred from the staff of the Division of Hygiene and Public Health to replace Miss Amelia R. Hoheisel, who resigned to manage a store which she purchased.

Following several months of illness, Mrs. Anne MacLeod Withrow died after years of faithful and effective service as a member of the Editorial Staff. She was serving in the place of Miss Helen Travis, who continued in the Office of Alumni Relations on the work of the Encyclopedic Survey of the University. At the close of the year, Miss Helen Travis resigned to work full time in the Alumni Relations office. Her position has been filled by the appointment of Mrs. Clara Jones Johnston, who was transferred from the English staff of the Supervised Correspondence Study unit of the University Extension Service.

This is an unusual shift in the office personnel during a single year. However, we were very fortunate in securing excellent and well-trained helpers, and the work in the office has not suffered except that, of course, it does take a newcomer some time to become acquainted with the requirements of a new position.

After a staff member has served for several years and is quite familiar with the work, he naturally becomes more and more useful in the office and should be rewarded as promptly as practicable by reasonable advancement in rank and salary.

Enrollment.-For the first time since 1931-32 the total enrollment took a slight drop of 3.6 per cent, from 19,596 to 18,899 , a difference of 697 . A complete analysis of the enrollment statistics is given in the tables in this report.

It will be recalled that the National Defense draft registration took place
in October, 1940, and that many students were enlisting even before that time, which undoubtedly accounts for a considerable number in the decrease in enrollment. This drop was general in most colleges throughout the United States.

General correspondence.-Since the various School and College Announcements represent about the only form of publicity employed by the University, it is desirable to have these Announcements available for distribution early in each calendar year for the academic year which begins the following September. The date of issuance of these Announcements does not always make it possible to give the desired information promptly. In a few instances the College Announcements have not been available for distribution until late in August or early in September.

Another difficulty in securing a prompt dispatch of the daily outgoing mail at the busy seasons is the bottleneck in the central mailing room for the second-class mail. The mailing of all bulletins is handled through a central mailing room in the basement of University Hall. The assistants assigned to this work are among the most faithful in the entire University organization, but on account of the increase in University departments, schools, and colleges during the past two decades, the work has outgrown the physical facilities provided for those who handle this work. A statement in the September 13, 1941, issue of the Michigan Alumnus states the messengers who handle this work "still go forth from the cave next to the heating tunnel under University Hall, which was the original makeshift for a central mailing room." In order to expedite the prompt dispatching of second-class mail, I should like to include in this annual report my recommendation that more adequate mailing facilities be provided as early as practicable.

Principal-Freshman Conference.-Ninety-seven high schools and seven junior colleges accepted our invitation to come to Ann Arbor on November 14, 1940, to interview their former students. This day marked the fourteenth annual Principal-Freshman Conference. Since the first conference in 1927 the number of schools represented has been steadily increasing. As in former years, a number of the principals were accompanied by their superintendents and members of their teaching staff to assist them in their interviews.

Definite appointments were made with the 650 freshmen who entered in the fall of 1940 from the schools represented to meet their high-school principals in the Horace H. Rackham School of Graduate Studies. The interviews began for some schools at 8:30 in the morning. At noon, the highschool representatives were invited to luncheon at the Michigan League. Members of the University faculties and staff who have contacts with freshmen during the year, were asked to attend the luncheon to meet and talk with the high-school visitors. The program arranged for the afternoon had as its theme precollege guidance. This was in the form of a panel discussion with high-school and University representatives and students participating. By the question and answer method, information was transmitted to the
principals which might prove helpful in informing their prospective University students.

This annual conference has long since passed out of the experimental stage, for its purpose has been established and its good effects have been far-reaching. A number of students have brought to light academic and other difficulties which have been cleared up; also the high-school men have taken with them suggestions for the preparation of coming University freshmen and have left behind suggestions for better University orientation and adjustment.

## RECORDS DIVISION

Studies.-During the year 1940-41 brief investigations have been made into the following problems:

1. A comparative analysis of Literary College graduates of June, 1929, and June, 1937.
2. An analysis of the academic records of students entering from schools accredited for one year, two years, or three years-this study was started by Mr. Rice, formerly assistant to the Registrar, and completed by him during the past year shortly after he became a member of the Graduate School staff.
3. An analysis of the academic records of Literary College graduates of June, 1940-this report is in preparation and will be completed during the coming year.
4. An analysis of departmental concentration requirements of Literary College graduates of June, 1941-this report is in preparation and will be completed during the coming year.
5. Advisers' control of courses during the degree program of the Literary College, 1940-41.
6. A partial analysis of academic records of students out of residence one or more semesters. This report has been in progress for the two preceding years and will be completed in the early part of the coming year.
7. At the request of the Deans' Conference a preliminary study of and report on procedures and practices of undergraduate units of the University in administering academic discipline was presented. This report clearly indicated the lack of uniformity in policies and procedures.

Registration.-By June 25, 1941, each student in the five units whose records are handled in this office had been mailed a blueprint of his record with the revised issue of the bulletin Directions for Registration and Classification. There were 5,069 blueprints sent to the students.

The continued co-operation of the five faculties, in reporting grades to this office at the end of each grading period, is clearly indicated by the statement that less than one-half of 1 per cent of the June grades were not reported to this office on scheduled time or earlier. Appreciation should also be expressed to the committees administrating discipline in each of the five schools for the expeditious manner in which students were notified of
their disciplinary status. This early notification to the student of his status gives assurance that the student, his adviser, and other college officials will have ample opportunity to follow the proper course during his next period of residence.

Registration of all male students between the ages of 21 and 36 respectively in accordance with the Selective Service Act was conducted by officials of each school and college appointed by the deans, with the Assistant Registrar serving as co-ordinator for the University.

General procedure and record keeping.--The Statistical Service of the Registrar's Office added the School of Education and the School of Forestry and Conservation to its tabulating card procedures in handling grades at the end of the semester. Request has been received during the year from the College of Architecture and Design and the School of Music to have their grade reports handled in the same manner.

The records of all students graduating between July 1, 1940, and June 30, 1941, have been photostated on heavyweight card stock in order to facilitate the work of our transcript department and the filing of records. The Alumni Catalog Office continues to store the original linen sheets on which the permanent records of students were kept while they were in school.

In order to eliminate duplication of work between this office and that of the Dean of the School of Forestry and Conservation, it was agreed that the check for graduation would be made by the Office of the School of Forestry and Conservation. The School of Education and this office are also making a co-operative study of several procedures seeking to eliminate needless duplication of activity between the two offices.

The records of the University Musical Society from about 1900 to 1929, when the Musical Society affiliated with the University, have been placed in charge of this office and are stored in the Alumni Catalog Office.

There has been a continuing study of procedures and policies within the office in order to familiarize each staff member with the work and to simplify procedures wherever possible. In no case, however, has simplification of procedures been made at the expense of accurate records.

After the conclusion of the 1940 Summer Session, two staff members checked the records of 75 per cent of students who would return as seniors in September, 1940. Statements of graduation requirements yet to be completed were furnished all returning seniors in the Schools of Education and Music. Copies of these statements were sent to the school concerned. This procedure was followed again this year and proved so successful that we hope to be able to check all senior records in advance and to furnish all with statements.

Honor societies.-Representatives of various honor societies, such as Phi Beta Kappa, Phi Kappa Phi, Alpha Lambda Delta, Phi Eta Sigma, and other recognized groups, were given the privilege of using the records in this office for choosing those eligible to election.

Our staff recommended recipients for honors at the University Honors Convocation for the units of the University whose records are kept in this office.

Degree programs.-Students in the College of Literature, Science, and the Arts are admitted to the various fields of concentration as soon as they have earned at least 60 hours with an average grade of C or better on all work elected and have satisfied the requirement in English composition.

For the second semester, 1940-41, the number of students concentrating in the various fields in the College of Literature, Science, and the Arts is shown in the table below. Students with 24 or more hours on the degree program are considered to be of senior standing. The increase or decrease indicated represents the changes that have occurred between the second semester of the preceding year and this year. Fields listed have no students concentrating therein.

| Field of Concentration | Juniors | Seniors | Total | Increase |
| :---: | :---: | :---: | :---: | :---: |
| History | 91 | 129 | 220 | +19 |
| English | 92 | 94 | 186 | +42 |
| Economics | 77 | 102 | 179 | -33 |
| Zoology | 76 | 72 | 148 | + 7 |

| Religion and Ethics | . | . . | . | - 1 |
| Landscape Architecture | . . | - | - | -1 |
| Not candidates for degrees | - | 0 | 0 | - 3 |
| Not yet formally admitted to a field | 143 | 1 | 144 | $+78$ |
| Totals | 1,012 | 1,053 | 2,065 | $+51$ |

Senior work.-Two members of the staff checked for graduation in the College of Literature, Science, and the Arts, the School of Education, and the School of Music. The following table shows the distribution by fields of concentration and sex of degrees granted by the College of Literature, Science, and the Arts, from July 1, 1940, to June 30, 1941, inclusive:

|  | Men | Women |  | Men | Women |
| :---: | :---: | :---: | :---: | :---: | :---: |
| American Culture | 2 |  | Letters and Law | 24 | $\ldots$ |
| Anthropology | 5 | 5 | Letters and Medicine ... | 9 |  |
| Astronomy | 2 | . | Library Science . . . . . . | 12 | 29 |
| Botany | 2 | 1 | Mathematics .......... | 12 | 8 |
| Chemistry | 34 | 9 | Mineralogy | 1 | . |
| Economics | 93 | 6 | Music |  | 3 |
| English | 23 | 59 | Philosophy ............ | 5 | 3 |
| Fine Arts | $\cdots$ | 3 | Physics ............... | 4 | . |
| French | 3 | 23 | Political Science . . . . . . . | 48 | 16 |
| Geography | 10 | 7 | Psychology ............ | 5 | 20 |
| Geology | 12 | 2 | Science and Mathematics. | 24 | 6 |
| German | 4 | 1 | Social Studies | 3 | 11 |
| Greek | . | 1 | Social Work | . | 26 |
| History | 72 | 33 | Sociology | 10 | 33 |
| Honors in Liberal Arts | 9 | 8 | Spanish . . . . . . . . . . . . | 1 | 7 |
| Journalism | 10 | 7 | Speech ............... | 25 | 33 |
| Latin | 1 | 5 | Zoology | 44 | 23 |
| Letters and Business |  |  | Old Plan | 2 | 2 |
| Administration | 34 | 1 |  |  |  |
| Letters and Dentistry | 1 | . |  | 546 | 391 |
|  |  |  | Total |  | 937 |

Transcripts.-The table below shows the number of statements and official statements bearing seal and signature issued, and the amount of transcript fees received each month for the year beginning July 1, 1940, and ending June 30 , 1941:

|  | Tran- | Amt. |  | Tran- | Amt. |  | Tran- | Amy. |
| :--- | :---: | ---: | :--- | ---: | ---: | :--- | ---: | ---: | ---: |
| Month | scripts | Recd. | Month | scripts | Recd. | Month | scripts | Recd. |
| July | 1,010 | $\$ 120$ | Nov. | 492 | $\$ 116$ | Mar. | 1,279 | $\$ 141$ |
| Aug. | 1,047 | 158 | Dec. | 459 | 134 | Apr. | 814 | 119 |
| Sept. | 898 | 178 | Jan. | 840 | 218 | May | 979 | 121 |
| Oct. | 754 | 104 | Feb. | 1,389 | 235 | June | 1,019 | 118 |

As has been the custom in the last few years official transcripts were presented to all graduating seniors. These complimentary transcripts were not included in the above figures. There were 2,931 official transcripts sent to the various schools and colleges on the campus. This number does not include the blueprints sent to the College of Architecture and Design, and to the Schools of Education, Forestry, and Music at the end of each semester, nor the blueprints sent to the advisers.

In addition to the increase in the volume of transcript business, another fact should be noted. Students frequently attend one or more units of the University of Michigan. By common practice they write the Registrar of the University for a copy of their transcript. This is sent from our office and-as we have no evidence that the student attended two or three other units of the University whose records we do not keep-the student is sometimes embarrassed by receiving a transcript from this office which may fail to include any recognition of work done in the Graduate School, the Medical School, or other professional schools of the campus. If a central transcript department could be organized for the University as a whole, to issue transcripts of all individuals not actually enrolled in the University during the current year, it would eliminate much of this problem. Administratively speaking, this is a small matter in the affairs of a complex university. On the other hand, however, it is most embarrassing and even costly to former students of the University to have positions for which they are applying endangered by a lack of full and complete information from the University.

It is also respectfully suggested that the different offices of the University issuing transcripts might do well to agree on one common policy in issuing transcripts, in making charges therefor, and in other incidental details in connection therewith. It appears that the University, through the different offices issuing transcripts, apparently has several diverse policies with regard to these procedures. These are hard to explain to a student when one unit tells him he may have a transcript free and another unit charges him for a copy of the same record.

## ADMISSIONS DIVISION

Admission requirements.-No change has been made since December, 1934, in the entrance requirements of any division of the University which accepts students from high school.

In September, 1935, the first year of the new regulations, 21 students whose high-school programs would not have met the old requirements entered the College of Literature, Science, and the Arts; and in September, 1940, there were 105 such students. In comparing the first-semester records of the 105 students at the University with the entire freshman class in that college, the following figures are of interest:

12 students, or 11 per cent, of the group withdrew during the first semester in comparison with 3 per cent of the entire freshman class;
2.1 ( 2.0 being a $C$ average) was the grade-point average of the group, and 2.3 the grade-point average of the entire freshman class;

11 students, or 11.8 per cent, of the group earned all A and B grades, and 122, or 12 per cent, of the entire freshman class;

30 students, or 32.3 per cent, of the group were placed on probation as compared with 24.0 per cent of the entire freshman class;

7 students, or 7.5 per cent, of the group received "home" action as compared with 3.6 per cent of the entire freshman class.

In the psychological test given to all freshmen during Orientation Period this group varied from the normal distribution of 25 per cent in each quarter as follows: top quarter, 18 per cent; second quarter, 12.3 per cent; third quarter, 29.5 per cent; and bottom quarter, 39.9 per cent.

Correspondence study courses through the Supervised Correspondence Study unit of the University have been recommended as summer work for a number of students whose preparation in certain fundamental fields has appeared weak, or when one-half or one additional unit was required for entrance. The students who have taken the correspondence study courses as review work have felt that these courses were of distinct benefit to them.

Prognostic rating.-On the acceptance of each student for admission a prediction, based on the information contained in the application blank, of the probable degree of his success in the University is made. The various officers interested in personnel work with the freshmen are continuing to use this rating as well as the results of the scholastic-aptitude test, the Englishcontent examination, and the reading test (added this year) given to all freshmen their first week on the campus. The results of these tests are not used in making the prediction as they are not available when the student is accepted for admission.

The predictions divide the freshman class into three groups, as follows: the A-1 group, which should do superior work; the A-2 group, which should do at least average work; and the A-3 group, which may have some scholastic difficulty. The table which follows gives the results of the predictions for the freshman class, including freshmen in all colleges and divisions who completed the work of the first semester. A similar table for the five years 1935 through 1939 appeared in the Registrar's report for 1939-40.

| GROUP | $\begin{gathered} \text { No. OF } \\ \text { STUDENTS } \end{gathered}$ | $\begin{gathered} \text { PER } \\ \text { CENT } \end{gathered}$ | PER CENT Of GRades |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | A | B | C | D | E | Inc. |
| A-1 | 295 | 19 | 47.6 | 26.6 | 11.4 | 4.9 | 1.3 | 5.4 |
| A-2 | 837 | 52 | 42.0 | 55.4 | 56.7 | 42.4 | 42.1 | 46.2 |
| A-3 | 481 | 29 | 10.4 | 18.0 | 31.9 | 52.7 | 56.6 | 48.4 |

Honor awards.-For the third time the following award was made:

[^0]The Registrar's Office plans to continue a similar award each year. The first award was made in 1938-39 to the Lincoln High School of the FerndalePleasant Ridge School District, and the second award in 1939-40 to the Three Rivers High School.

Freshman grades.-A study of freshman grades for September entrants shows the following:

| SCHOOLS ANDCOLLEGES | No. of | FIRST SEmester, 1940-41 |  |  |  |  |  |  | GradePOINT average* |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Per Cent |  | 13.3 | 32.1 | 41.2 | 8.0 | 2.8 | 2.6 |  |  |

[^1]Withdrazals.-The following table is an analysis of freshman withdrawals by cause and date* from September, 1940, to June, 1941. Under

[^2]home action for February the group immediately reinstated for the College of Literature，Science，and the Arts is considerably larger than last year．This is due to a change in the policy of the Administrative Board whereby fewer students were placed on special probation and more on the home list than at the same period of the previous year．

| CAUSE OF WITHDRAWAL |  | $\begin{aligned} & \dot{0} \\ & \text { 品 } \end{aligned}$ | $\begin{aligned} & \text { 首 } \\ & \text { 号 } \end{aligned}$ |  | 发 | 品 | $\begin{aligned} & \text { 曾 } \\ & \text { 号 } \end{aligned}$ | 总 | 镸 |

$\dagger$ In February， 44 freshmen in the College of Literature，Science，and the Arts and 4 fresh－ men in the College of Engineering received a＂Home＂action because of poor scholarship．For certain reasons they were allowed to enroll for the second semester with the understanding that， unless they were able to make a＂C＂average and no＂ E ＂grades during the semester，they would be required to withdraw permanently in June．In June the following action was taken：
$\$$ The following combined causes for withdrawal are included：Reinstated February－N．T．R． －Employment，2；Reinstated February－Home June，19；N．T．R．－Health，9；N．T．R．－Employ． ment，4；Reinstated February－N．T．R．，4；Reinstated February－Employment，1；Total， 41.

## L．，S．，and A．

Engineering

$\ddagger$ Includes February transfers as follows：

## STATISTICAL DIVISION

Enrollment.-After reaching the highest campus enrollment in the history of the University during the preceding year, the registrations on November 1, 1940, showed a decrease of 146 students, or -1.2 per cent from the enrollment of the previous year on a corresponding date. A comparison of Michigan registrations through November 1, or the close of the first five weeks of school, with those of the country as a whole is made each year through the Walters report on "Statistics of Registration in American Universities and Colleges," published annually in a December issue of School and Society. This report for 1940 showed that 57 universities under public control, including the University of Michigan, had a decrease, or -.3 per cent, compared with the preceding year. Freshman enrollments for the first semester at the University of Michigan decreased -6.8 per cent in the College of Literature, Science, and the Arts, -11.3 per cent in the College of Engineering, and -8.7 per cent for all freshmen. This compares with -1.3 per cent in Liberal Arts, $\mathbf{+ 2 . 1}$ per cent in Engineering, and $\mathbf{- 2 . 0}$ per cent for the total freshmen in universities under public control, included in the Walters report.

The University of Michigan enrollment at the close of the first five weeks of classes, with comparisons for the preceding year, follows:

| Group | No. Students | Per Cent Change |
| :---: | :---: | :---: |
| Regular session | 11,952 | -1.2 |
| Previous Summer Session | 5,680 | 1.5 |
| Net total, regular and summer | 15,736 | -. 4 |
| Extension (in credit courses) | 1,147 | -11.4 |
| Net total, entire University | 16,788 | $-1.2$ |
| Extension (in noncredit courses) | 659 | -20.5 |

Since extension reports are still very incomplete at the close of the fifth week, the Extension Service figures are reliable only as a general indication of increase or decrease. Fifth-week enrollment reports for the campus regular session were a dependable forecast of the difference for the entire year, which was -1.0 per cent. Literature, Science, and the Arts, Law, Architecture and Design, Nursing, and Music showed slight gains, while the heaviest losses were experienced in the College of Engineering and the Horace H. Rackham School of Graduate Studies.

At the close of each school year registration figures are submitted to the American Association of Collegiate Registrars by member institutions, and the resulting statistics are published in pamphlet form. From this report, the 23 universities receiving any or all state support and having regular session enrollments of 5,000 or more students have been selected for comparison with University of Michigan experience. This investigation revealed that -1.05 per cent, a comparison between the University of Michigan regular session enrollment of 1940-41 and that of the preceding year, corresponds to a combined experience for the 23 institutions, including Michigan, of -.95 per cent although 9 of the 23 showed gains. Michigan experienced a -2.5 per cent in enrollment of men and +2.3 per cent in the enrollment of women, corresponding to -1.8 per cent men and +1.0 per cent women for the 23 institutions. The 1940 summer session at the University of Michigan gained

86 students or +1.5 per cent, over the 1939 enrollment. The 23 universities selected from the American Association of Collegiate Registrars' report showed a net loss of -.3 per cent, although more than half of the group (14) showed gains.

The University continues to attract students from every state in the Union, from four United States dependencies, and from many foreign countries. The proportion of students registering from each sectional group of the United States remained approximately the same as last year. Although the number of students from the United States dependencies varied by only one, the distribution changed with 1 less student from the Canal Zone, 8 fewer students from the Philippine Islands, 3 fewer from Puerto Rico, and an increase of 11 from the Hawaiian Islands. Because of the world situation, changes in enrollment of foreign students were particularly interesting. Only 19 fewer foreign students registered in 1940-41 than in 1939-40, from approximately the same number of countries. Outstanding changes occurred' in the numbers from Canada, China, Italy, and Turkey. Twenty-eight fewer students came to the University from Canada and 13 of the loss were from the Province of Ontario; 8 fewer Chinese students enrolled; 15 fewer-the entire representation-from Italy failed to re-enter; 24 more students from Turkey, or almost twice the number registered last year, enrolled. Bulgaria, Guatemala, Holland, Honduras, Nicaragua, Peru, and Sweden were not represented on the campus last year but are in 1940-41. Australia, Bermuda, Haiti, Iran, Italy, Jamaica, Lithuania, Netherlands, Netherlands West Indies, and Panama students registered last year failed to return. Many of the foreign students are already finding it difficult to maintain communication with their families, and the University has a serious problem to meet in attending to the needs of the students who are so widely separated from their homes and families in these disturbing times.

In spite of the selective military service and the general unsettled condition of the world due to the state of war in the European countries, neither the enrollments at the University of Michigan nor registrations in similar institutions seem to have decreased to any alarming extent. The present provision of the Selective Training and Service Act permitting drafted students to defer the beginning of service until the close of the academic year, the continuance of the National Youth Administration payments of an average of $\$ 15$ monthly for work performed by undergraduates and $\$ 30$ for work by graduates, paid to approximately 10 per cent of the enrollment of full-time students, are believed by many administrators to be the favorable influences responsible for maintaining registrations at approximately the old level in spite of the adverse conditions created by a wartime world.

Because of the restriction of immigration and the decline in the birth rate, the Walters report emphasizes the fact that the colleges and universities of the United States may in the near future face a diminished human reservoir from which to draw, although changes in educational philosophy and economic effects of the war may prevent population trends from having their normal effect upon collegiate attendance. With the already evident decrease in the number of entering freshmen and the unsettled condition of the country, it is probable that the University of Michigan enrollment will continue to drop for the next few years at least.

Detailed enrollments, according to division, sex, geographical location, and session are shown in the following tables:

## STUDENT STATISTICS

Withdrawals.-For the purposes of this report, only those regular session withdrawals involving separation from the University during the year or faculty action at the close of the year have been taken into consideration. The number of separations between September and June was 1,760 , or 13.7 per cent of the enrollment. Of this number, 267 were because of graduation. This corresponds to a loss of 1,598 , or 12.3 per cent of the enrollment, and 231 departures because of graduation in 1939-40. The number of separations during the year has increased steadily for the past four years. An analysis of the causes of withdrawal, in order to determine the reason for this increase during the past year, shows 35 more students sent home for poor scholarship in February and 9 additional actions requiring the permission of the administrative board before return. The employment and military service group this year includes 57 more than the same group last year. Twenty-eight of the 130 included in this group left to enter defense work. Fifty-three more students with unsatisfactory scholarship and 14 more with satisfactory records left the University without stating the reason for withdrawal than was
the case last year. Thirty-six more students than in 1939-40 graduated. Twenty-nine fewer students gave ill health as the reason for withdrawal and 12 less dropped out of the University because of insufficient funds than was the case the previous year.

Any study of withdrawals is inevitably somewhat unsatisfactory, since we realize at the outset that in many instances the true reason for the separation is not made known. In somewhat over 900 cases, no reason at all was indicated; the student merely failed to return in February or withdrew during the first or second semester without specifying the cause of his departure. It should be kept in mind, therefore, in referring to Table $\mathbf{X}$ on page 31, that it is impossible to gain much more than a general impression of what is taking place and of the reason some students fail to continue for the entire period.

Degrees.-In spite of a decrease of 50 students in the net 1940-41 total regular session and summer session enrollment, the number of degrees granted by the University increased 14 over the preceding year, reaching 3,386 . This number represents 20.5 per cent of the number enrolled and the highest proportion for the past seven years. Two fewer men and 16 more women than in 1939-40 completed the requirements for a degree. The College of

Literature, Science, and the Arts, with a net total regular session and summer session increase of 4 students, granted 83 fewer degrees; the College of Engineering lost 88 students and conferred 15 fewer degrees; the Medical School enrollment diminished by 73 students and granted 8 fewer degrees; the Law School, with an increase of 29 students, conferred 69 more degrees; the School of Business Administration lost 8 students but granted 20 more degrees than it had in the previous year; the Graduate School lost 28 students and conferred 25 more degrees. Other schools and colleges showed small increases or decreases in the number of degrees granted. Except in the case of students enrolled for a program in liberal arts, it would appear that those ready to complete their requirements for a degree remained in school and that enrollment losses, when experienced, were in ranks below that of senior. Since the freshman enrollment decreased -8.7 per cent and the entire regular session enrollment was diminished by only -1.0 per cent, we may conclude that the student who has neared the completion of his program has made the effort to remain in spite of adverse influences throughout the country.

Faculty statistics.-The following new appointments were made to the emeritus group before July 1, 1940: Walter Burton Ford, A.M., Ph.D., Professor of Mathematics; Herbert Jay Goulding, B.S.(M.E.), Associate Professor Emeritus of Mechanism and Engineering Drawing. Twenty-three more members were added to the regular session faculty, increasing the number by 5 professors, 6 associate professors, and 13 instructors, and decreasing it by 1 assistant professor. This corresponds to a loss in the student body of 136 students. Some of the additional staff members were secured because of the contemplated establishment in the near future of a separate School of Public

## 1940-41 Distribution of Teaching Faculty by Schools and Colleges

* Other faculty teaching graduate courses are included in the other Schools and Colleges.
$\dagger$ The following duplicates have been deducted from these totals: Professors, L., S., \& A.-Ed., 2; L., S., \& A.-Bus. Ad., 1 ; L., S., \& A.-Grad., 1; Ed.-Hyg. \& P. H., 1; Associate Professors, L., S., \& A.-Grad, 1; L., S., \& A.-Bus. Ad., 1; L., S., \& A.-Ed., $1 ;$ Assistant Professors, L.,'S., \& A.-Bus. Ad., 1; Ed.-Phys. Ed., 1; Instructors, Ed.-Phys. Ed., 1; Med.-Nurs., 1; Med.-Hyg. \& P. H., 1.

The Honors Convocation.-The eighteenth annual Honors Convocation was held in Hill Auditorium on Friday, April 26, 1941, at eleven o'clock. This year, because of the disturbed condition throughout the world, the occasion seemed to take on increased significance and to give rise to the feeling that hope for the future may rest with groups such as the one honored by the University at that time. William Elgin Wickenden, B.S., Eng.Doc., Sc.D., LL.D., L.H.D., President of Case School of Applied Science, was the speaker and delivered a stimulating address entitled "The Second Mile."

The number of seniors holding rank in the highest 10 per cent of the class increased only one. Thirty-two fewer juniors, 13 more sophomores, and 25 fewer freshmen had an average of one-half " $A$ " one-half " $B$ " than was the case in 1940. Graduate fellowships, scholarships, and special citations remained approximately the same.

Although invitations to be seated upon the stage are issued to all faculty members above the rank of instructor, and there are approximately 575 so qualified, the number of faculty participating in the affair from this location is disappointingly small.

Figures showing the number of students honored in the various groups follow:

| Honors Convocation |  |  |  |
| :---: | :---: | :---: | :---: |
| 1941 |  |  |  |
|  | Men | Women | Total |
| Seniors with averages of at least " $B$ " and holding rank in the highest 10 per cent of the class | 159 | 67 | 226 |
| Students with averages of at least $1 / 2$ " $A$ " and $1 / 2$ " B " |  |  |  |
| Juniors | 57 | 16 | 73 |
| Sophomores | 68 | 24 | 92 |
| Freshmen | 85 | 23 | 108 |
| Graduate School |  |  |  |
| Fellowships and scholarships, | 82 | 14 | 96 |
| Other honor students | 163 | 22 | 185 |
| Recipients of special scholarship awards . . . . . . . . . . . . . . . . | 103 | 43 | 146 |
| Total Citations | 717 | 209 | 926 |
| *Duplicates | 81 | 21 | 102 |
| Total Students Honored | 636 | 188 | 824 |

* 70 men and 21 women received 2 citations each; 4 men received 3 each; 1 man received 4.

Grade reports to other units.-During the year, the tabulating card system of reporting grades for all students in the College of Literature, Science, and the Arts to the Records Division was expanded to include reports for those students in the School of Education and the School of Forestry and Conservation. This meant an increase of about 10 per cent in the number of grades reported. As soon as statements are made to the recording unit, the tabulating cards are used to make additional reports for other interested offices and a general study of grades grouped by departments and instructors. Such a study is now in process for 1940-41, showing the grade distributions by departments for all units of the University, with the exception of the Graduate School. Where grades are punched on tabulating cards, this is a mechanical process to a large extent; where the card system
is not in use, the compilation of grade distributions involves a great deal of mental effort and a comparatively long period of time.

Inasmuch as grades punched on tabulating cards may be used for manifold purposes, it is hoped that the plan may be adopted by other units of the University as rapidly as they feel convinced of the benefits derived and this office is able to absorb the additional labor involved.

Freshman grade reports.--The usual March report was sent to the principals of the various high schools, showing the grade-point averages earned by September, 1940, freshman entrants in the various courses open to freshmen at the University, and also the distribution, according to schools and colleges in which courses were elected, of grades earned by all freshmen. The freshman ledger, showing courses elected and grades earned by each freshman, the results of the freshman tests, the registrar's rating, and the rank in the highschool graduating class was printed and bound for filing in the Registrar's Office.

Scholarship chart.-The plan followed in 1939-40, reporting the class level of members of each group in addition to earned grades, was continued. It is felt that this system discourages comparisons between dissimilar groups and is, therefore, a great improvement on the old procedure of reporting grade-point averages only.

There was a slight improvement in all of the general groups except general sororities, independent women, and all women where the grade-point averages were practically the same as in 1939-40 and entitled them to positions at the top of the groups. The most noticeable improvement was shown by the freshmen and the freshman men in dormitories. These groups raised their averages .16 and .14 of a grade point respectively. Freshman men improved .10 grade points, freshman women's dormitories made a nice gain of .08 of a grade point, and upperclass men's dormitories raised their average .06. Although a single grade point represents only the distance from one letter grade to another, in the general averages from "C" to " B ," and any changes in the hundredths position are small in consequence, it is encouraging to see that there has been a general move in the right direction and that the University dormitory groups have done their share toward this improvement.

Sigma Alpha Mu placed first among the general fraternities, with an average of 2.79 . For the general sororities, Delta Gamma was high for the second successive year, with 2.77 . Nu Sigma Nu, with 2.92 , headed the medical groups; Lawyers Club, with 2.44 topped the law groups; Xi Psi Phi, with 2.67 , led the dental groups. University House, with 76 per cent graduate students as residents, had an average of 3.42 , or almost halfway between "A" and "B" grade. Alumnae House, with 81 per cent upperclass residents, placed second with 3.01 , or better than " $B$ " grade.

Independent women at the top of their respective classes scholastically were honored at the Assembly banquet as follows: freshman, Anne Merry Podoley; sophomore, Margaret Marie Garritsen; and Junior, Judy Katherine Gold.

At the request of the Director of Residence Halls, several additional
breakdowns of scholarship material were made for the dormitory groups, and the resulting averages and comparisons published.

Averages for the general groups for 1940-41 compared with 1939-40 follow:

|  | Grade-point |  | average |
| :---: | :---: | :---: | :---: |
| general groups | 1939-40 | 1940-41 | Change |
| Independent women*. | 2.59 | 2.59 | . 00 |

[^6]Remarks.-Because so much of the material necessary for presenting satisfactory statistical reports must be obtained from the various offices located throughout the campus, this division still feels keenly the need of a central administration building. Our present office, located in the Horace H. Rackham Building, is unusually spacious and well equipped, and we are grateful that this location has fallen to our lot. The physical problem of transporting many large metal drawers to and from the main part of the Registrar's Office at various times during the year makes us long for a centralized admissions and recording office, with this office located conveniently near.

## EDITORIAL DIVISION

The publications issued by the Editorial Division during 1940-41 consisted of the 118 numbers of Volume 42 of the University of Michigan Official Publication and 85 nonserial publications, which include the numerous School of Music and University Musical Society programs, which are counted as 1 nonserial. For a list of the serial publications, see page 42.

The following new serial publications were issued during the year: "Courses in Naval Science and Tactics, 1940-41," "The W. K. Kellogg Foundation Institute: Graduate and Postgraduate Dentistry, 1940-41," "Student Fees and Fee Regulations, 1940-41," "Education in Citizenship," "Proceedings of the Michigan-Life Conference, 1939," "Dentistry-the Profession, Educational Requirements, Nature of Practice, Opportunities Afforded," "University of Michigan Weekly Calendar" (Vol. 1, Nos. 1-11), "National Defense Program Courses for Engineers," "Public Policy in a World at War, S.S., 1941," "Training Program in Drugstore Merchandising, Managing, and Selling, 1941," "Program in Actuarial Science and Mathematics and Directory of Alumni," and "Going on with Latin." The nonserial publications including books edited and seen through the press for the first time were: Bureau of Government Pamphlets Nos. 8, 9, 10, 11, 12, and 13, Michigan Governmental Studies Nos. 4, 5, 6, and 7, "Institute on Problems of Taxation, 1940," "The University of Michigan to the Legislature of 1941," "Inter-American Rela-tions-A Selected Bibliography, 1941," "Michigan Teacher Education Workshop, S.S., 1941," "The Guidance Workshop, S.S., 1941," "Workshop in Curriculum and Instruction, S.S., 1941," "Intensive Courses in the Japanese Language, S.S., 1941," "The Michigan Public Junior College Scholarships," "Public Policy in a World at War, S.S., 1941," First Michigan Frontier, by Calvin Goodrich, New Michigan Verse, by C. E. Burklund, and The University of Michigan: An Encyclopedic Survey, Part I-"History and Administration."

Part II, "Organization; Services; Alumni; and Faculty Clubs" of The University of Michigan-An Encyclopedic Survey is in the press. Editing continues on the other fascicles.

With the splendid co-operation of the department heads and secretaries, it was possible for us to place the University Directory for 1940-41 in circulation October 8, 1940, the week following the opening of the school year.

The Editorial Division continues to proofread the galleys and page proof on the University Record, Regents Proceedings, May Festival Libretto, Occasional Papers and Miscellaneous Publications from the Museum of Zoology, and Contributions from the Laboratory of Vertebrate Genetics and from the University Herbarium.

The Register of Staff and Graduates for 1940-41 was in print September 6, 1941, approximately one month earlier than the preceding year. There were no material changes in assembling and organizing the material. As formerly, this publication reported the constitution of the University staff, with a list of degrees, diplomas, and certificates granted by the Board of Regents during the year and the personnel of administrative committees.

Resignations, retirements, changes of title, and leaves of absence were recorded. This involved keeping up to date the faculty file, which is composed of individual cards showing appointments, promotions, leaves of absence, and terminations of University service. Included in the file are members of the professorial and teaching staff and research workers, in addition to the staffs of the Health Service, Hospital, libraries, museums, observatories, and residence halls.

Respectfully submitted,
Ira M. Smith, Registrar

## OTHER OFFICIAL PUBLICATIONS

University of Michigan Regents' Proceedings. 12 issues, July, 1940, through June, 1941. University Record. 4 issues.

[^0]:    This is to certify that, among the groups of students entering the University of Michigan in the year 1940-41, from the high schools of the state of Michigan, the group from the Grand Rapids Central High School, consisting of the following freshmen, Joseph Robert Dangl, Douglas Woodruff Hillman, David Gay Idema, and Jane Alvina Vanderleest, by its combined record has received first honors for excellence in scholarship during the first semester of resident study.

[^1]:    ${ }^{*}$ The scale used in figuring averages follows: A-4 points; B-3 points; C-2 points; D-1 point; E-0 points; IX-disregarded.

[^2]:    *Withdrawals in June which were not accompanied by a "Home" or "N.T.R." action have been disregarded. Students who withdrew during the first semester and re-entered the same school the second semester have also been omitted.

[^3]:    * Duplicates within each School or College between sessions have been deducted. The only extension students included in this tabulation are those enrolled in courses for which credit may be given. Although the Extension Service students do not enroll in the Schools or Colleges, they have been grouped according to the division of the University from which instructors offering courses bave been drawn.

[^4]:    ＊Including regular session，extension，and 1940 summer session．

[^5]:    * Dean Emeritus of the School of Education and Professor Emeritus of Educational Administration and Supervision; Professor Emeritus of Bacteriology and Dean Emeritus of the Medical School; Professor Emeritus and Director Emeritus of the University Extension Service; Professor Emeritus of Law and Dean Emeritus of the Law School; Professor Emeritus of Naval Architecture and Marine Engineering and Dean Emeritus of the College of Engineering.
    $\dagger$ Based upon the budget as originally adopted.

[^6]:    * Medical, law, and dental students are not included in the starred groups. Because of lack of uniformity between the grading systems in the professional schools and those in the nonprofessional schools of the University, it seems advisable to consider medical, law, and dental students as separate groups.

    Care must be exercised in comparing the above averages, since ineligible fraternity and sorority pledges are not included in the fraternity, sorority, and independent groups but are included in the general and dormitory groups.

[^7]:    *These publications are edited by the Editorial Office, Registrar's Office.
    $\dagger$ This series includes official announcements of courses and reports.
    $\ddagger$ Partially handled by the Editorial Office.

[^8]:    * Not handled by the Editorial Office.
    $\dagger$ Partially handled by the Editorial Office.
