UNIVERSITY OF MICHIGAN OFFICIAL PUBLICATION

Report of

The Office of Registration and Records

1957-1958

Reprinted from the President's Report for 1957-1958, The University of Michigan

PUBLISHED BY THE UNIVERSITY
ANN ARBOR, MICHIGAN

FOREWORD

The enrollment picture of The University of Michigan for the year 1957-58 is presented here in detail. Honor-point averages, degrees granted, and other interesting data are summarized. Additional detailed information is available in the Statistical Service of the Office of Registration and Records.

The other services given by this office in the areas of orientation, registration, recording, compiling of the University Directory, Selective Service certification and counseling, and furnishing of diplomas and transcripts are briefly described. Comments and suggestions for the improvement of these services and this report are most welcome.

Office of Registration and Records Edward G. Groesbeck, Director

THE OFFICE OF REGISTRATION AND RECORDS

The 1957-58 enrollments for both the fall and spring semesters exceeded the record breaking enrollments of the previous year. In the fall 23,174 students enrolled for residence credit in degree programs. An additional 4,115 students enrolled in credit courses in University centers, making the total University net enrollment in credit courses 27,057 for the first semester.

The composition of the residence credit student body for fall was as follows: 67.5 per cent were men and 67.0 per cent were Michigan residents; 37.8 per cent were undergraduate men, 29.8 per cent graduate men; 24.7 per cent were undergraduate women, and 7.8 per cent graduate women. Of the undergraduates 24.4 per cent were freshmen, 26.0 per cent were sophomores, 24.1 per cent were juniors, 20.9 per cent were seniors, and 4.6 per cent were classified as special students.

The freshman class of 2,985 entering in September was 104 or 3.0 per cent less than the record breaking class of the previous fall. This followed a pattern of decreased freshman enrollments throughout the country this year. In June, 1957, 20 freshmen enrolled and in February, 1958, 201 more were added, thus making a total of 3,206 freshmen beginning at the University during the year. In 1957-58, 1,725 or 53.8 per cent were freshman men, and 1,481 or 46.2 per cent were women. Michigan residents, as usual, outnumbered out-of-state freshmen about two to one.

In September, 1,607 undergraduates and 1,842 graduate or graduate-professional students transferred from other institutions. There were twice as many Michigan undergraduate transfers as nonresidents; however, the non-Michigan graduate transfers outnumbered the Michigan graduates or graduate-professionals five to four. The summer and spring transfers were 2,712 and 852, respectively. In summary, 7,013 students transferred and 3,206 came as freshmen making a total of 10,219 residence credit students entering this University for the first time during the fiscal year.

In addition to the 37,462 students enrolled for credit throughout the year, 10,246 people were enrolled in regularly organized certificate courses. Every Michigan county, every state, the District of Columbia, Alaska, the Canal Zone, Guam, Hawaii, Puerto Rico, the Virgin Islands, and 81 other

areas outside the continental United States were represented by students at The University of Michigan.

From July 1, 1957, through June 30, 1958, the University granted a total of 5,813 degrees in course. In addition 10 honorary degrees, 1 Regents' Citation of Honor, 21 certificates of graduation, 36 certificates of specialization, and 98 commissions were awarded.

Of the 5,813 degrees granted, 2,786 (47.9 per cent) were bachelor's degrees, 2,061 (35.5 per cent) were master's degrees, 261 (4.5 per cent) were doctorates, and 705 (12.1 per cent) were graduate-professional degrees in dentistry, law, medicine, public health, and social work. The number of degrees granted was 19.5 per cent of the total number of students enrolled in degree programs in 1957-58.

During the year a study of the grade distribution of the previous year was completed, using the 123,347 undergraduate elections in the fall and spring which totaled 390,409 semester hours. It was found that the percentages of grades of A, B, C, D, and E were 16.3, 35.9, 36.7, 7.4, and 2.6, respectively. The 38,484 elections (93,243 semester hours) by graduates were divided into the A, B, C, D, and E grades percentagewise as follows: 35.9, 42.8, 11.8, 0.9, and 0.6. Some grades were reported as "satisfactory" or "incomplete" and were all incorporated into a separate category. These "other" grades comprised 1.1 per cent of the undergraduate grades and 8.0 per cent of the graduate.

Grades of the students enrolled in the Law School and the Medical School were not included in the above-mentioned study because this office does not process the grades for those units. Extension Service grades were not tabulated.

This study included not only breakdowns by school and college but also by department within units. This extensive report has been published and is available upon request. We do not expect to repeat this type of study until after 1960 because of the expense involved.

Studies were made concerning the graduation status of the University of Michigan freshmen. It was found that 64.9 per cent of the freshmen who entered in the academic year 1948–49 graduated from the University by January, 1958. Those who did not graduate were about evenly divided between the C or better grade-average category and those leaving on probation. Another study showed 52.2 per cent of the freshmen who entered in the 1952–53 academic year graduated from the University by March, 1958. Again the nongraduates were about evenly divided between those with clear records and those on probation. Given another four years the 1952–53 group may equal the very acceptable record of the 1948–49 freshmen, because some of the students are still in the professional schools at the present time not having received a degree

from the University. The above studies of freshmen do not include those who enrolled in the College of Engineering.

Another indication of the high quality of the freshman class is demonstrated in the degree of persistence shown by freshmen entering in the fall who return in the spring. Of the 2,985 freshmen entering in September, 1957, 93 per cent continued on for their second semester.

The eight service agencies which are incorporated in the Office have all been affected by the increased numbers of students. The maintenance of the high quality of service given by the personnel in these offices, in the face of steadily expanding demands, is an absorbing challenge. I am unqualifiedly proud of the effort put forth by an excellent staff.

Orientation.—The assignment of introducing new students to the University has become a year-round operation. There are four distinct orientation programs. An orientation period immediately precedes each summer, fall, and spring session. The fourth is a special program conducted throughout the summer for approximately half of the fall freshmen.

Preparation for the September program was begun in the early spring. Student assistants were selected by the Orientation Committee of the Michigan League and the University Affairs Committee of the Michigan Union. These nominees were reviewed by the director of the Orientation program and 375 young men and women were selected. Each assistant was trained and made responsible for about 15 new students during Orientation.

Throughout the spring and summer the University offices concerned with admission, instruction, health, housing, and social orientation were contacted. With the guidance of the Orientation Committee the director set up the programs for summer, fall, and spring.

Throughout last summer, 1,000 freshman men and women were brought to the campus to participate in an orientation program to prepare them to enter the fall semester. Each student stayed on campus two days and completed all of the orientation tests, received academic counseling, classified for courses, and paid his fees. These freshmen joined the other freshmen in the events of the fall program pertaining to social orientation. The purpose of the summer orientation program was to give the participants the privilege of more complete academic counseling and to distribute the load of the academic counselors more evenly.

Registration.—Registration and orientation were closely integrated for the new students. The procedures were so carefully and completely arranged that registration was easily accomplished by both new and former registrants. Progress is being made in the direction of preregistra-

tion, i.e., advising and assigning to classes in the preceding semester. The great advantage of this procedure is the possibility of providing more timely information to the administration so that definite plans can be made regarding faculty, classrooms, and equipment before the beginning of each semester. This benefit may more than balance the considerable increase in cost which will result from additional advisers, facilities, and clerical help necessary to operate an extended registration.

Recording.—During the year academic records were maintained in this office for 30,523 different students enrolled in thirteen units of the University. Academic records for students in the College of Engineering, Flint College, Medical School, and Law School are maintained in separate offices not related to the central recording agency.

The considerable variation in the grading procedure, probationary status, credit acceptance, and graduation requirements as shown on the records precludes a high degree of automation in record maintenance. The differing academic standards call for numerous explanations to prospective employers, to admission counselors at other universities, and to the students themselves. Our lives are complicated by this divergence, but it is realized that the central office is perhaps more conscious of the differences than any other.

Data processing machines are used extensively in the grade reporting procedure. The volume of grades processed through this office is one of the largest in the educational world. The process of grade posting and the duplicating techniques used accomplishes this task in such a remarkably short time that many registrars visit the University and inquire about the procedures.

University Directory. - Proposals have been made to modify the process of compiling the Directory to take advantage of machine listings and photographic copying, but the present format is so well liked that it is being continued.

Selective Service.—Men come in throughout the year to make inquiry concerning their responsibilities as Selective Service registrants. Selective Service System Forms 109 were completed for all students who requested that they be sent to their local boards. This process required that the current status and class ranking be obtained and recorded for each man. Our service to the students could be improved if provision could be made to secure some privacy when discussing matters pertaining to Selective Service.

Honors Convocation.—The thirty-fifth Honors Convocation was held May 9, 1958, in special recognition of the 793 undergraduate students who earned at least an average of 3.5 grade points per semester hour for

the past two semesters (or freshmen who earned this average for their first semester). Personnel in this office compiled the information for listings of the class honors presented in the program and also submitted additional information concerning students admitted to honor societies, recipients of scholarships, and students honored for extracurricular activities to the Michigan Daily for publication in the Honors Supplement. This supplement was distributed on the day of the Convocation. Copies of the program, together with a letter and list of their former students who were honored, were sent to 170 Michigan high schools, 9 Michigan junior colleges, and 4 out-of-state junior colleges. Of the 793 students honored, 478 or 60 per cent were from Michigan high schools. Invitations to attend the exercises in the morning and a tea at the President's home in the afternoon were sent to the honor students and their parents.

Transcripts.—The increased number of requests for transcripts and certifications has severely taxed the personnel of the Transcript Office. Excellent teamwork has been displayed and the reputation of the department for prompt action has been maintained. The number of transcripts issued July 1, 1957, through June 30, 1958, was 198,344 and the amount of fees received was \$23,511.00.

Diploma Records.—This department remained in the Cashier's Office but the final preparation of the diplomas was accomplished in the basement of the Student Activities Building. Certificates for Journalism, Medical Technology, Physical Therapy, Anesthesia, and Dental Hygiene were prepared in addition to the 5,813 regular diplomas for all the sixteen schools and colleges of the University.

Throughout the year the registrations of all students were checked to verify the residence (Michigan or non-Michigan) status as determined by the admissions officers throughout the University. During registration periods the status of students not previously determined was established. All student name changes are channeled through this office.

Statistical Service.—The Statistical Service, by means of punched card processing machines, supplied statistical information concerning the student body as requested and, in addition, facilitated the work of the recorders and the Selective Service and Orientation offices.

Many new innovations and procedures have been incorporated into the operation of this department which have made more complete reports available earlier. These changes and further modifications depend upon the willingness of the personnel in many other offices to modify procedures or to permit changes in the final reports. The task of coordinating the efforts of many independent offices in order to compile needed statistics was undertaken with enthusiasm and accomplished with equanimity.

STATISTICAL MATERIAL.

THE Office of Registration and Records has compiled the tables and charts that follow. These tables summarize the year's enrollment, show the geographical distribution, indicate class distribution, and report other pertinent facts of the University's population.

Throughout these tables the term "Graduate," in the Student Group column, is used to indicate students enrolled in the Horace H. Rackham School of Graduate Studies.

The usual procedures were followed in reporting the number of students registered at the University. The year includes the 1957 summer session, the 1957–58 first semester, and the 1957–58 second semester. It should be noted that apparent numerical discrepancies in totals are the result of students who are enrolled in two or more units and counted but once in the net total.

In the summary, enrollments have been divided into groups as follows:

I-A	Students in University degree or postgraduate professional residence credit level programs	29,875
I-B	Students in University postgraduate professional programs of fewer than four weeks in the summer session or fewer than eight weeks during either semester	877
II-A	1 Students in University Extension credit courses offered in classes organized in Ann Arbor, Battle Creek, Detroit, the area offices at Escanaba, Flint, Grand Rapids, Saginaw, and Traverse City. Classes were also held in forty-nine other Michigan cities	5,865
II-A	2 Students in University Extension credit courses offered through correspondence	1,121
II-B	Students in extramural postgraduate programs in medicine, offered at eighteen permanent centers in the state	704
III-A	1 Students in University Extension certificate classes, designed to assist the mature individual who is seeking continued study along lines not covered in regular University courses	9,031
III-A	2 Students in University Extension certificate courses offered through correspondence	1,215

Extramural students in certificate programs in Group III are counted in the summary only. Others groups mentioned in the summary are included in the tables on geographical distribution of students, since they represent a service of instruction to the people of the state, the nation, and areas outside the continental United States. Geographical distributions are made according to the home address given by each student on his registration card.

In all tables except the summary, geographic and chronological students in I-B and II-B have been omitted because registrations in these groups are for a comparatively short period, and the University recognizes that they are not comparable to enrollments in courses of regulation length.

The scholarship report for the year 1957-58 (see Table XIX A and B) concerns undergraduate students only. With approval of the Dean of Men and the Dean of Women, this year's scholarship report has been changed from an annual to a semester basis. Since this is the first year of reporting in this manner, all comparisons are made with last year's annual report. It is expected that these semester reports will enable scholarship chairmen and others interested in scholarship improvement to assist those in need more quickly.

The average earned by all men and women during the first semester, taking 197,881 semester hours of credit, was 2.55; during the second semester, taking 188,931 semester hours of credit, their average was 2.61. The women, earning a first semester average of 2.67 and a second semester average of 2.70, maintained their usual higher average than the men. The men's average during the first and second semester was 2.47 and 2.54, respectively. The new fall freshman class had a 2.37 average, which is .03 grade-point better than a year ago. The freshman women earned a 2.42 average and the men a 2.34 average.

As indicated above, grades earned by students in the School of Dentistry, the Graduate School, the Law School, the Medical School, and the School of Social Work, and grades for graduate students in the School of Business Administration, the School of Music, the School of Natural Resources, and the School of Public Health have been excluded from this report. Freshmen are defined as those students who entered the University in the fall of 1957 or the spring of 1958 with less than one semester of college experience.

Another measure of academic success in the degree of persistence (Table XVIII) shown by fall freshmen in returning for the next semester. Ninety-three per cent of the 2,985 fall freshmen continued in the University for the second semester.

1957–58	50,563	23,511.00	147,781		

The constant increase in the number of individual requests for transcripts is shown in Table XXV. In 1955 the transcript fee was increased to \$1.00; this accounts for the unusual increase in the "amount received" column. Transcripts were used as grade reports to the students and to their deans and departments. These reports were printed en masse at the end of each semester and summer session. In addition, copies of transcripts of graduates of Michigan high schools and junior colleges are sent to the schools when the students receive their first degree from the University.
