Report of
The Office of the
Registrar

1965-1966

Preprinted from the President's Report
for 1965-1966. The University of Michigan

ANN ARBOR, MICHIGAN

FOREWORD

By means of tabulations and pictorial form, the 1965-66 student population of The University of Michigan is presented in statistical summary. Enrollment information, degrees conferred, academic achievement and other interesting data are summarized. The Statistical Service of the Registrar's Office which prepared this report, can provide selected additional data complimentary to these materials.

THE OFFICE OF THE REGISTRAR
ENROLLMENT

Each year since 1952, the residence credit enrollment has surpassed the previous year. In the fall of 1965, 31,267 students were enrolled for residence credit in degree programs resulting in an 84 per cent increase during this thirteen year program. An additional 3,186 were enrolled in credit courses in University centers. The total number of individuals served in credit programs for the 1965-1966 year was 44,872. In addition, 3,065 enrollments were recorded in extramural certificate programs to bring the total enrollment to 49,718 students.

The tables and figures that follow describe in detail the enrollment by term and unit at the University. Prescribed procedures were followed in accounting for the number of students registered at the University. The year includes the 1965 Summer Half-term, the 1965-66 Fall Term, the 1965-66 Winter Term, and the 1966 Spring Half-term. Only those students who remained beyond the total refund limit in any period are included. Postgraduate registrations are considered to be short-course enrollments if less than four weeks in the summer or spring or less than eight weeks during the regular term. Any apparent numerical discrepancies in the total are the result of students enrolled in two or more units and counted but once in the net total. All Rackham students are counted in the unit of their field of specialization.

Extramural students in certificate programs in Group III are counted in the summary only. All other groups mentioned in the summary are included in the table on geographical distribution of students since they constitute a service of instruction to the people of the state, the nation, and other areas.

In the summary, enrollments have been divided into groups as follows:

I-A	Students in University degree or postgraduate professional residence credit level programs	39,942
I-B	Students in University postgraduate professional programs of fewer than four weeks in the half term or fewer than eight weeks during a full term	1,093
II-A 1	Students in University Extension credit courses offered in nearly forty Michigan communities including the following nine cities with extension offices - Ann Arbor, Battle Creek, Dearborn, Detroit, Escanaba, Flint, Grand Rapids, Port Huron, and Saginaw	4,907
II-A 2	Students in University Extension credit courses offered through correspondence	1,174
II-B	Students in extramural postgraduate programs in medicine, offered at twenty-one centers in the state	754
II-A	Students in University Extension certificate classes designed to assist the mature individual who is seeking continued study along lines not covered in regular University courses	2,950
III-B	Students in University Extension certificate courses offered through correspondence	115

CHARACTERISTICS OF THE STUDENT POPULATION

Practically every day, a request is received from within the University, governmental agencies, private individuals, news media, planning groups, industrial agencies, and publishing houses for data relative to the student population. The scope of these requests is nearly equal to the number of requests. Generally, these inquiries can be answered by combining the data that follows with information contained in other sections of this report. The immediate tables that follow contain information frequently requested and supplement the enrollment data previously reported. The tables included in this section describe certain aspects of the student population, i. e., class enrollments, marital status, and enrollments by field in selected units. It is noteworthy that effort is exerted to keep data definitions equal from year to year so that meaningful comparisons can be made. Those that follow these data have noted the stability of the student population characteristics. The changes that do occur are usually of a slow predictable nature.

ACADEMIC ACHIEVEMENT

The academic achievement of undergraduate students for the year 1965-1966 is given in the tables that follow. These tables, as in the past, indicate the academic achievement of selected groups during the fall and winter terms. The academic fortunes of individual groups can be followed by comparing this year's tables with those of previous years.

No students in a graduate or graduate-professional unit are included. These are graduate-level students in the School of Business Administration, the School of Dentistry, the Graduate School, the Law School, the Medical School, the School of Music, the School of Natural Resources, College of Pharmacy, the School of Public Health, and the School of Social Work. Also, students enrolled at the Dearborn Campus and the Flint College are excluded.

A table indicating the grade-point averages by selected schools is included. These averages are calculated for undergraduates who are enrolled in the same school or college both terms and who elect twelve or more hours each term.

The forty-third Honors Convocation, held on April 1, 1966 recognized the achievement of 1,546 undergraduate students who attained a grade-point average of 3.5 for the past two semesters or freshmen who had earned this average during the first semester. Since 1957 the percentage of eligible students honored has risen from 5.40 per cent to the current level of 8.44 per cent.

DEGREES AND AWARDS

A record number of degrees in course and certificates were awarded by the University during the 1965-1966 year. In addition, 14 honorary degrees were conferred including one to John Kenneth Galbraith. The total of 7,891 degrees in course represented 100 different degrees in 189 defined fields of specialization. The ratio of degrees to the total enrollment was one to five. Of all the degrees granted, 48.7 per cent were bachelor's degrees, 34.0 per cent were master's degrees, 5.6 per cent were doctorates, 11.7 per cent were graduate-professional degrees.

A total of 223,254 degrees in course have been conferred since 1845. It was not until 1883, or 39 years, that the University conferred a cumulative total number of degrees equal to this past year. President Hatcher has conferred 89,557 of this cumulative total.

It is worthy of attention to note the many certificates of specialization, teacher's certificates and commissions granted. Over 1,200 of these, by type of award, may be noted in Table XX.

GEOGRAPHICAL ORIGIN OF STUDENTS

As in past years, the University has served students from every county in Michigan. While eight counties appear to supply the greatest number of students, the ratio of enrollments and population tends to be consistent. As in past years, the number of students from Michigan continues to rise.

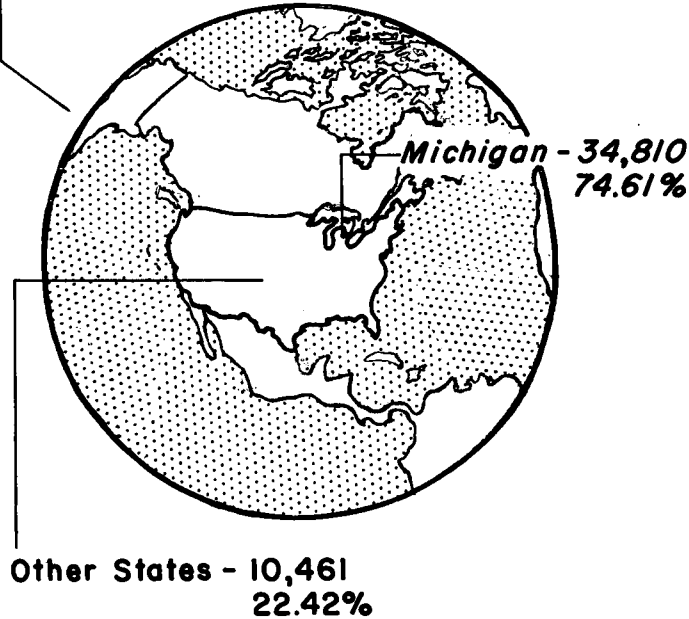

In addition, every state, the District of Columbia, three United States territories and 96 foreign countries were represented in the student population.

Exact distribution can be noted in the tables that follow. These distributions are based upon the home address given by the student at the time of his registration.

NEW STUDENTS

The tables that follow describe some characteristics of new students to the University. New students during the fall term accounted for 30 per cent of the enrollment. New freshmen and transfers are nearly equal. A freshman is defined as a student who is just entering the University and does not transfer more than 14 hours of credit.
