This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Even pre-pandemic, the U.S. faced a childcare crisis. Many parents need childcare while they work, insufficient licensed childcare programs exist for infants and toddlers, and such programs often cost too much for families. Childcare businesses also operate at thin margins and struggle to stay in business due to rising operational costs and challenges finding qualified staff. Multidisciplinary student teams will hear from leading experts and incorporate problem-solving tools and insights from law, social work, policy, business, and other fields to propose solutions to relevant stakeholders.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) March 14-28, 2022. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

34862	PD LAB 002 W		315-630PM	250 HUTCH	Guenther, Carr, Hess, Dickinson			
-------	--------------	--	-----------	-----------	---------------------------------	--	--	--

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Environmental, Social and Governance (ESG) policies have taken center stage in the investment world, but requirements of investor ESG policies vary widely, and they may be challenging for investee companies to implement. In this course, multi-disciplinary student teams will work with faculty and subject matter experts to learn about ESG policies, how to assess their impact, and if there are ways to harmonize such policies. Students will leverage problem-solving skills and insights from fields including law, business, and policy to develop innovative solutions to a challenge in this area.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) March 14-28, 2022. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

34870	PD LAB 003 W		315-630PM	0225 JEFFRIES	CdeBaca			
-------	--------------	--	-----------	---------------	---------	--	--	--

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The built environment bears the stamp of slavery supported by new forms of forced labor. Starting with an understanding that architecture isn't value-neutral and that racism intersects with urban planning, land use, and environmental problems, this class will confront such issues through a U-M/Yale partnership. Students will create a framework for the National Slavery Memorial in Washington, D.C., as multidisciplinary teams from law, planning, history, and other fields learn problem-solving skills, conduct research, and approach the politics, ethics, and mechanics of construction holistically.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) March 14-28, 2022. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

34878	PD LAB 004 TH		315-630PM	218 HUTCH	Khanna, Bauguess			
-------	---------------	--	-----------	-----------	------------------	--	--	--

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The rise of the cryptoeconomy has implications for national security, data privacy, transaction costs, Web 3.0, and much more. In this class, multidisciplinary student teams will learn about the growth of the cryptoeconomy, varieties of cryptoassets, and an array of potential uses of such assets from experts in law, business, policy, information, and more. Students will apply research insights and problem-solving tools to develop

CAT#	Course Title					CR	PREREQ	LAB FEE
Class #	CODE CMP SEC	DAYS	TIME	LOCATION	INSTRUCTOR			

a solution focused on regulating the cryptoeconomy.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) March 14-28, 2022. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Students may be dropped from the course for non-attendance on the first day of lecture.

This lab will only meet four times throughout the semester TBD with the professor. Lab dates will be assigned on the first day of class.

The labs are also designed to be taken with BME 211 or 221 if a student wishes to enroll in one of these other courses concurrently. While the labs are scheduled on the same days and times, they do not actually conflict with each other.

This section of senior design will focus on biochemical processes. It will not include a traditional medical device project. This course will focus instead on biochemical technology.

The traditional Senior Design course will be offered in the Winter term, or you should enroll in BME 451/452.

Chemical Engineering Department

Chemical Engineering (CHE)

--MANY COLLEGE OF ENGINEERING COURSES REQUIRE STUDENTS NOT ENROLLED IN BUSINESS ADMINISTRATION OR ENGINEERING (INCLUDING CCS MAJORS) TO PAY A \$115-207 COMPUTER USER FEE. THIS IS A SPECIAL FEE, TO BE PAID ONLY ONCE EACH TERM, AND IS IN ADDITION TO THE INFORMATION TECHNOLOGY ACCESS FEE PAID BY FULL TIME STUDENTS AS PART OF THEIR REGULAR FEE ASSESSMENT. YOU WILL BE INFORMED ON THE FIRST DAY OF CLASS WHETHER OR NOT YOUR CLASS IS SUBJECT TO THIS FEE.

482	Env Microbiology								
20475	P W LEC 001 TTH	130-3PM	107 GFL						3.00 Raskin ADVISORY
CEE 482 lecture should be taken by undergraduate students with no intention of pursuing graduate school at U-M.									
CEE 582 - both lecture and lab - should be taken by students interested in pursuing graduate school at U-M (e.g., SUGS).									
490	Independent Study								
	I IND +	ARR	ARR						1.00-4.00 ADVISORY
501	Special Topics CEE								
33826	P W LEC 047 F	2-5PM	3433 EECS						1.00-3.00 Lee, Kelly ADVISORY
Modern Construction Management									
This course aims to develop the students' fundamental understanding of modern construction management in the US, which will also be a basis for other CEM graduate courses. Topics include how to organize, estimate, and manage a construction project as well as dispute resolution and leadership.									
34437	P W LEC 062 MW	9-1030AM	134 NAME						Bricker
Flood, Tsunami, Hurricane									
This course introduces physical principles, modeling methods, and hydraulic design tools for flood risk reduction against rainfall, hurricane storm surge and waves, and tsunami hazards. Homework sets and design projects apply analytical, empirical, and numerical methods to design protective hydraulic structures to reduce flood risk.									
24880	P W SEM 850 TH	3-430PM	136 EWRE						Yin
Next Gen Transpo Sys Seminar									
Presentation and discussion of selected topics related to transportation systems engineering. Student participation and guest lectures.									
510	Fem Sol&Str								
20486	P W LEC 001 TTH	130-3PM	1003 EECS						3.00 Jeffers ADVISORY

Attendance is REQUIRED for this discussion (Dis 021) section. The "Focus on Fundamentals" discussions will meet for two hours each week instead of one to provide additional time to review and solidify concepts from the week, and apply these concepts to practice problems. The additional time and higher instructor-to-student ratio will allow for more discussion, working through practice problems at a slower pace, and more time for student questions. There will be a focus on working through practice problems in small groups.

STUDENTS MUST ELECT LAB AND LECTURE SECTIONS. The remote section is being offered to handle anticipated extra demand beyond the in-person sections. Students in all lecture sections, including remote, will have access to lecture recordings. Students in the remote section can also attend the in-person lectures, space permitting on the day of the attendance. Usually, enough students consume material remotely that we don't anticipate in-person

27029	P RW LEC 200 MW	1130-130PM	133 CHRYS Yalisove
This special section of MSE 220 will be a team based and project based version of the class where the first introduction to the material is NOT lecture, but rather annotated reading and/or annotated video. Class time will consist of active learning activities. There will be three group projects in this class. Students will be required to purchase an electronic textbook via the Canvas site that will be live in August (for about \$115.00). Do NOT purchase a copy of the book before that! Students will also be required to purchase a subscription to Learning Catalytics (\$12). There are no other fees for the course. Homework is graded for effort and honesty - not accuracy. Quizzes are graded by averaging an open book, open internet, group effort with a self-assessment/reflection activity where you must provide evidence of mastery. You will be rewarded for hard work and honesty on homework and quizzes without the angst of summative assessment. Do not purchase the book at this time. More information will be available on the following website: http://java.engin.umich.edu/220F22

Electrochemistry Apps & Engrg This course will serve to give students exposure to applications of electrochemistry in the production of chemicals and metals, energy storage, sensors, and material protection (i.e., controlling corrosion). Part of the course will discuss basic electrochemistry concepts, so a background in electrochemistry is not required, but a majority of the course will focus on applications, and electrochemical techniques, e.g., electrochemical impedance spectroscopy, which can be used to understand charge transfer, double layer formation and capacitance, and solution resistances. In addition, some of the practical aspects of research electrochemistry will be discussed, including applying fundamental concepts to research. The engineering behind electrochemical reactor design will also be covered, including touching on the economics and performance metrics for industrial systems, and future avenues in electrochemical processes.

Naval Arch & Marine Engr Dept

Naval Architecture And Marine Engineering (NAVARCH)

--MANY COLLEGE OF ENGINEERING COURSES REQUIRE STUDENTS NOT ENROLLED IN BUSINESS ADMINISTRATION OR ENGINEERING (INCLUDING CCS MAJORS) TO PAY A \$115-207 COMPUTER USER FEE. THIS IS A SPECIAL FEE, TO BE PAID ONLY ONCE EACH TERM, AND IS IN ADDITION TO THE INFORMATION TECHNOLOGY ACCESS FEE PAID BY FULL TIME STUDENTS AS PART OF THEIR REGULAR FEE ASSESSMENT. YOU WILL BE INFORMED ON THE FIRST DAY OF CLASS WHETHER OR NOT YOUR CLASS IS SUBJECT TO THIS FEE.

Students are encouraged to enroll in TCHNCLCM 496 (2 credits) at the same time as their MDE. The technical writing requirement (TCHNCLCM 496) must be taken in the same or later semester as the MDE (preferably the same semester). If you have questions about this, please speak with your academic advisor.

If you already have selected team members for your EECS design project, you are encouraged to register for the same section of TC496 with those members

First 7 weeks of class: In-person students meet every other week for 3hrs 50min including travel time to and from field sites. Distance students meet remotely every other week for 1.5 hours and conduct guided field labs independently.

Second 7 weeks of class: Both In-person and remote students meet remotely for 3 hrs every week and develop and present independent field labs.

Do not expect to take a different class during remote meeting times!

<p>This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Even pre-pandemic, the U.S. faced a childcare crisis. Many parents need childcare while they work, insufficient licensed childcare programs exist for infants and toddlers, and such programs often cost too much for families. Childcare businesses also operate at thin margins and struggle to stay in business due to rising operational costs and challenges finding qualified staff. Multidisciplinary student teams will hear from leading experts and incorporate problem-solving tools and insights from law, social work, policy, business, and other fields to propose solutions to relevant stakeholders.</p> <p>This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.</p> <p>Non-law graduate/professional students may apply for the course using the PSI application system (https://problemsolving.law.umich.edu/) March 14-28, 2022. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.</p>				
34856	PD LAB 002 W	315-630PM	250 HUTCH	Guenther, Carr, Hess, Dickinson
<p>This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Environmental, Social and Governance (ESG) policies have taken center stage in the investment world, but requirements of investor ESG policies vary widely, and they may be challenging for investee companies to implement. In this course, multi-disciplinary student teams will work with faculty and subject matter experts to learn about ESG policies, how to assess their impact, and if there are ways to harmonize such policies. Students will leverage problem-solving skills and insights from fields including law, business, and policy to develop innovative solutions to a challenge in this area.</p> <p>This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.</p> <p>Non-law graduate/professional students may apply for the course using the PSI application system (https://problemsolving.law.umich.edu/) March 14-28, 2022. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.</p>				
34864	PD LAB 003 W	315-630PM	0225 JEFFRIES	CdeBaca
<p>This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The built environment bears the stamp of slavery supported by new forms of forced labor. Starting with an understanding that architecture isn't value-neutral and that racism intersects with urban planning, land use, and environmental problems, this class will confront such issues through a U-M/Yale partnership. Students will create a framework for the National Slavery Memorial in Washington, D.C., as multidisciplinary teams from law, planning, history, and other fields learn problem-solving skills, conduct research, and approach the politics, ethics, and mechanics of construction holistically.</p> <p>This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward</p>				

graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) March 14-28, 2022. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

34872 PD LAB 004 TH 315-630PM 218 HUTCH Khanna, Bauguess
 This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The rise of the cryptoeconomy has implications for national security, data privacy, transaction costs, Web 3.0, and much more. In this class, multidisciplinary student teams will learn about the growth of the cryptoeconomy, varieties of cryptoassets, and an array of potential uses of such assets from experts in law, business, policy, information, and more. Students will apply research insights and problem-solving tools to develop a solution focused on regulating the cryptoeconomy.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) March 14-28, 2022. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

605 Interdisc Prob Solv 3.00 ADVISORY

34852 PD LAB 001 W 315-630PM 116 HUTCH Sadek, Sobocinski, Carr

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Even pre-pandemic, the U.S. faced a childcare crisis. Many parents need childcare while they work, insufficient licensed childcare programs exist for infants and toddlers, and such programs often cost too much for families. Childcare businesses also operate at thin margins and struggle to stay in business due to rising operational costs and challenges finding qualified staff. Multidisciplinary student teams will hear from leading experts and incorporate problem-solving tools and insights from law, social work, policy, business, and other fields to propose solutions to relevant stakeholders.

CAT#	Course Title					CR	PREREQ	LAB FEE
Class #	CODE CMP SEC	DAYS	TIME	LOCATION	INSTRUCTOR			

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) March 14-28, 2022. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

34860	PD	LAB 002	W	315-630PM	250 HUTCH	Guenther, Carr, Hess, Dickinson		
-------	----	---------	---	-----------	-----------	------------------------------------	--	--

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Environmental, Social and Governance (ESG) policies have taken center stage in the investment world, but requirements of investor ESG policies vary widely, and they may be challenging for investee companies to implement. In this course, multi-disciplinary student teams will work with faculty and subject matter experts to learn about ESG policies, how to assess their impact, and if there are ways to harmonize such policies. Students will leverage problem-solving skills and insights from fields including law, business, and policy to develop innovative solutions to a challenge in this area.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) March 14-28, 2022. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

34868	PD	LAB 003	W	315-630PM	0225 JEFFRIES	CdeBaca		
-------	----	---------	---	-----------	---------------	---------	--	--

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The built environment bears the stamp of slavery supported by new forms of forced labor. Starting with an understanding that architecture isn't value-neutral and that racism intersects with urban planning, land use, and environmental problems, this class will confront such issues through a U-M/Yale partnership. Students will create a framework for the National Slavery Memorial in Washington, D.C., as multidisciplinary teams from law, planning, history, and other fields learn problem-solving skills, conduct research, and approach the politics, ethics, and mechanics of construction holistically.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) March 14-28, 2022. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

34876	PD	LAB 004	TH	315-630PM	218 HUTCH	Khanna, Bauguess		
-------	----	---------	----	-----------	-----------	------------------	--	--

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The rise of the cryptoeconomy has implications for national security, data privacy, transaction costs, Web 3.0, and much more. In this class, multidisciplinary student teams will learn about the growth of the cryptoeconomy, varieties of cryptoassets, and an array of potential uses of such assets from experts in law, business, policy, information, and more. Students will apply research insights and problem-solving tools to develop a solution focused on regulating the cryptoeconomy.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) March 14-28, 2022. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Exercise Assessment The purpose of this course is to learn basic knowledge of exercise testing and interpretation for apparently healthy adults using lecture, student discussion/presentation, and laboratory experience. This course will evaluate various aspects of exercise testing including muscular, balance, and cardiorespiratory fitness. Principles of healthy hemodynamics and cardiorespiratory response and interpretation will be covered. A central theme of the course comprises understanding physiological exercise testing variables. Exercise assessment provides invaluable information in assessing functional capacity, the safety of physical exertion, and the effect of various interventions. Moreover, the results have long-term prognostic significance in regard to morbidity and mortality. Classroom time will be spent gaining hands-on skills with conducting both physical fitness testing (field tests) and clinical exercise testing, to advance competence collecting physiological assessments across the lifespan in preparation for writing comprehensive exercise prescription and programming.

Movement Science (MOVESCI)

NOTE - ENROLLMENT NOT GUARANTEED FOR STUDENTS OTHER THAN KINESIOLOGY MAJORS. ATTENDANCE AT FIRST CLASS IS MANDATORY TO RESERVE YOUR PLACE IN CLASS. ACTIVITY CLASSES FOR NON-MAJORS ARE LISTED IN THE UMOVE PROGRAM.

100	Seminar Movement Sci				1.00		
33006	PD SEM 001 W		4-5PM	2600 SKB	Bodary		
<p>First year seminar: This course introduces first-year students to the main areas of concern as they transition to university life and aims to assist them in navigating these new challenges through a kinesiology lens. With a central focus on physical activity, this course will branch out to other health domains of importance, including stress, genomics and sleep, to help students develop a better understanding of the challenges they face and habits to achieve academic and personal success in their university career and beyond. Students will complete independent work, readings and videos along with a weekly quiz, prior to each class and class time will emphasize interactive discussion and inquiry.</p>							
110	Bio&Beh Bases Hu Mvt				3.00		
13336	P RW LEC 001 MW		10-1130AM	3420 CCCB	Gross, Bodary, Vesia		
<p>This section is held for Kinesiology students. Non-Kinesiology students should wait list under section 011.</p>							

Because Kinesiology holds MVS 110 seats for Kinesiology summer orientation students, overrides for non-Kinesiology students are not issued until post-orientation. Students will receive an email when and if they are issued an override. If students do not receive an override before the first day of class, they are welcome to attend the first day of class and see if the instructor has seats available. As long as students stay on the waitlist, they do not need to call or email to check their status.

13337	P RW LEC 002 MW		10-1130AM	ARR	Bodary, Gross, Vesia		
<p>This course will meet in CCCB 3420.</p>							

This section is held for Kinesiology students. Non-Kinesiology students should wait list under section 012.

Because Kinesiology holds MVS 110 seats for Kinesiology summer orientation students, overrides for non-Kinesiology students are not issued until post-orientation. Students will receive an email when and if they are issued an override. If students do not receive an override before the first day of class, they are welcome to attend the first day of class and see if the instructor has seats available. As long as students stay on the waitlist, they do not need to call or email to check their status.

13338	P RW LEC 003 MW		10-1130AM	ARR	Vesia, Bodary, Gross		
<p>This course will meet in CCCB 3420.</p>							

This section is held for Kinesiology students. Non-Kinesiology students should wait list under section 013.

Because Kinesiology holds MVS 110 seats for Kinesiology summer orientation students, overrides for non-Kinesiology students are not issued until post-orientation. Students will receive an email when and if they are issued an

override. If students do not receive an override before the first day of class, they are welcome to attend the first day of class and see if the instructor has seats available. As long as students stay on the waitlist, they do not need to call or email to check their status.

21796 P W LEC 011 MW 10-1130AM 3420 CCCB Gross, Vesia, Bodary
This section is intended as a waitlist for non-Kinesiology students who wish to enroll in section 001.

Because Kinesiology holds MVS 110 seats for Kinesiology summer orientation students, overrides for non-Kinesiology students are not issued until post-orientation. Students will receive an email when and if they are issued an override. If students do not receive an override before the first day of class, they are welcome to attend the first day of class and see if the instructor has seats available. As long as students stay on the waitlist, they do not need to call or email to check their status.

21797 P W LEC 012 MW 10-1130AM ARR Bodary, Gross, Vesia
This section is intended as a waitlist for non-Kinesiology students who wish to enroll in section 002.

Because Kinesiology holds MVS 110 seats for Kinesiology summer orientation students, overrides for non-Kinesiology students are not issued until post-orientation. Students will receive an email when and if they are issued an override. If students do not receive an override before the first day of class, they are welcome to attend the first day of class and see if the instructor has seats available. As long as students stay on the waitlist, they do not need to call or email to check their status.

21798 P W LEC 013 MW 10-1130AM ARR Vesia, Bodary, Gross
This section is intended as a waitlist for non-Kinesiology students who wish to enroll in section 003.

Because Kinesiology holds MVS 110 seats for Kinesiology summer orientation students, overrides for non-Kinesiology students are not issued until post-orientation. Students will receive an email when and if they are issued an override. If students do not receive an override before the first day of class, they are welcome to attend the first day of class and see if the instructor has seats available. As long as students stay on the waitlist, they do not need to call or email to check their status.

Literature, Sci, and the Arts

IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, DEPARTMENTS MAY GIVE AWAY A STUDENT'S PLACE IN A CLASS IF THEY DO NOT ATTEND:

- THE FIRST MEETING OF BIOLOGY, CHEMISTRY, AND PHYSICS LABORATORIES;
- EITHER OF THE FIRST TWO MEETINGS OF ENGLISH COURSES;
- THE FIRST TWO MEETINGS OF HISTORY 496 AND 497;
- EITHER OF THE FIRST TWO MEETINGS OF ANY COURSE OFFERED BY THE DEPARTMENT OF ROMANCE LANGUAGES;
- THE FIRST TWO MEETINGS OF COURSES IN OTHER SUBJECTS.

AT THE SAME TIME, DEPARTMENTS ARE NOT OBLIGATED TO WITHDRAW STUDENTS OFFICIALLY FROM THE COURSE, EVEN THOUGH THE STUDENT HAS BEEN INFORMED THAT HIS/HER PLACE IN A COURSE HAS BEEN TAKEN AWAY. STUDENTS ARE RESPONSIBLE FOR THE ACCURACY OF THEIR SCHEDULES AND MUST BE SURE THAT ALL DROPS ARE PROCESSED THROUGH REGISTRATION SYSTEM DURING THE NORMAL DROP/ADD PERIOD.

This section is reserved for CSP students during the early registration period. Any undergraduate student may join the waitlist once the section is closed. Students who are still on the waitlist as of the first day of classes should email the instructor of their desire to enroll in the course. If an override is granted, students will receive an email notification so they may register for the course prior to the stated expiration date. Students should elect PHYSICS 151 as the corresponding lab.

--SECTION 400 - STUDENTS MUST ELECT DISCUSSION 410-414. The intensive lecture section (Section 400) is intended for those students who would benefit from a smaller lecture section (maximum 100 students) and more lectures so that the pace is slower and there is more feedback. This section is reserved for CSP students and students who have placed into CHEM 130.

<p>
 <p>Do not hesitate to register because of exam time conflicts; we offer same-day alternate exam times. Information about alternate time exams will be provided by instructors after the semester begins.</p>

2.00

ADVISORY

100.00

STUDENTS MUST SHOW VERIFICATION OF REGISTRATION FOR CHEM 211 AT LAB CHECK IN AND CLAIM THEIR SPACES AT THE FIRST MTG OF THE LAB.

STUDENTS ARE AUTO-ENROLLED IN LECTURE WHEN THEY ELECT A LAB.

</p> NOTE: Although concurrent (or prior) enrollment in Chem 210 is an advisory, rather than enforced, pre/co-requisite, it is EXTREMELY STRONGLY RECOMMENDED. The topic of stereochemistry is prominent in Chem 211, and the class will be very challenging for students who are not currently (or have not previously) taken Chem 210. </p>

</p> Any questions regarding enrolling for this course should be directed to the Chemistry Student Services Office at chemundergrad@umich.edu. </p>

English Language Institute

English Language Institute (ELI)

ELI courses fall into three categories:

1. English for Academic Purposes courses for graduate students;
2. Language and teacher training courses for international GSIs;
3. Teacher training courses for students planning to teach ESL in local communities or abroad.

For assistance in choosing an appropriate course, please go to the ELI Academic Advising website:
<http://bit.ly/eliadvising> or e-mail: eliadvisor@umich.edu to make an appointment to speak with an advisor.

To enroll in this course, students must:									
Step 1: Submit a writing sample to: englishcwsubmissions@umich.edu. Writing samples are generally between 5-15 pages of original relevant work (short stories, excerpts, poems). For priority consideration, writing samples should be submitted no later than 5pm on Thursday, March 31, 2022. Students should receive notification of their acceptance (or not) no later than Monday, April 18, 2022. Students may continue to submit writing samples after the priority deadline until seats are full.									
Step 2: Complete the course section preference form (https://forms.gle/JNQEjzR7S3j2BdMd9) no later than 5pm on Thursday, March 31, 2022.. Students are encouraged to consider second and third choice sections (where available) as potential back-up options. The back-up options should be times that will actually work with your schedule.

To enroll in this course, students must:							
Step 1: Submit a writing sample to: englishcwsubmissions@umich.edu. Writing samples are generally between 5-15 pages of original relevant work (short stories, excerpts, poems). For priority consideration, writing samples should be submitted no later than 5pm on Thursday, March 31, 2022. Students should receive notification of their acceptance (or not) no later than Monday, April 18, 2022. Students may continue to submit writing samples after the priority deadline until seats are full.							
Step 2: Complete the course section preference form (https://forms.gle/JNQEjzR7S3j2BdMd9) no later than 5pm on Thursday, March 31, 2022.. Students are encouraged to consider second and third choice sections (where available) as potential back-up options. The back-up options should be times that will actually work with your schedule.

Economics Department

Economics (ECON)

101 Principles Econ I

4.00 ADVISORY

Students will be auto-enrolled in LEC 100 when they elect DIS 101-115.

There will be three midterms for this course : 10/4 6-8pm, 11/7 6-8pm, TBD. All exams must be taken on the assigned dates and times. If you cannot take these exams as scheduled, please register for an open section in another lecture of Econ 101. No exceptions will be made to these exam dates and times.

No overrides will be issued for this class.

<p>This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Even pre-pandemic, the U.S. faced a childcare crisis. Many parents need childcare while they work, insufficient licensed childcare programs exist for infants and toddlers, and such programs often cost too much for families. Childcare businesses also operate at thin margins and struggle to stay in business due to rising operational costs and challenges finding qualified staff. Multidisciplinary student teams will hear from leading experts and incorporate problem-solving tools and insights from law, social work, policy, business, and other fields to propose solutions to relevant stakeholders.</p> <p>This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.</p> <p>Non-law graduate/professional students may apply for the course using the PSI application system (https://problemsolving.law.umich.edu/) March 14-28, 2022. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.</p>							
34857	PD LAB 002 W		315-630PM	250 HUTCH	Guenther, Carr, Hess, Dickinson		
<p>This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Environmental, Social and Governance (ESG) policies have taken center stage in the investment world, but requirements of investor ESG policies vary widely, and they may be challenging for investee companies to implement. In this course, multi-disciplinary student teams will work with faculty and subject matter experts to learn about ESG policies, how to assess their impact, and if there are ways to harmonize such policies. Students will leverage problem-solving skills and insights from fields including law, business, and policy to develop innovative solutions to a challenge in this area.</p> <p>This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.</p> <p>Non-law graduate/professional students may apply for the course using the PSI application system (https://problemsolving.law.umich.edu/) March 14-28, 2022. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.</p>							
34865	PD LAB 003 W		315-630PM	0225 JEFFRIES	CdeBaca		
<p>This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The built environment bears the stamp of slavery supported by new forms of forced labor. Starting with an understanding that architecture isn't value-neutral and that racism intersects with urban planning, land use, and environmental problems, this class will confront such issues through a U-M/Yale partnership. Students will create a framework for the National Slavery Memorial in Washington, D.C., as multidisciplinary teams from law, planning, history, and other fields learn problem-solving skills, conduct research, and approach the politics, ethics, and mechanics of construction holistically.</p> <p>This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.</p> <p>Non-law graduate/professional students may apply for the course using the PSI application system (https://problemsolving.law.umich.edu/) March 14-28, 2022. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.</p>							
34873	PD LAB 004 TH		315-630PM	218 HUTCH	Khanna, Bauguess		
<p>This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The rise of the cryptoeconomy has implications for national security, data privacy, transaction costs, Web 3.0, and much more. In this class, multidisciplinary student teams will learn about the growth of the cryptoeconomy, varieties of cryptoassets, and an array of potential uses of such assets from experts in law, business, policy, information, and more. Students will apply research insights and problem-solving tools to develop a solution focused on regulating the cryptoeconomy.</p> <p>This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.</p> <p>Non-law graduate/professional students may apply for the course using the PSI application system (https://problemsolving.law.umich.edu/) March 14-28, 2022. History Department

History (HISTORY)

--IT IS CRITICAL THAT STUDENTS ATTEND CLASS FROM THE BEGINNING OF THE TERM. ALTHOUGH STUDENTS MAY BE OFFICIALLY REGISTERED FOR A COURSE, THE DEPARTMENT MAY DISENROLL ANY STUDENT NOT ATTENDING THE FIRST TWO COURSE MEETINGS.
 --DISCUSSION SECTIONS DO NOT MEET UNTIL AFTER FIRST LECTURE.
 --STUDENTS ARE ENCOURAGED TO USE THE WAITLIST FOR ANY CLOSED COURSE. STUDENTS SHOULD REGISTER ON THE WAITLIST ACCORDING TO PREFERRED SECTION AND ATTEND THE FIRST CLASS. UP TO THE FIRST DAY OF CLASS, OVERRIDES WILL BE GIVEN BY THE DEPARTMENT AS SPACE BECOMES AVAILABLE. STUDENTS ARE NOTIFIED AND GIVEN TWO DAYS TO USE THE OVERRIDE, AFTER WHICH THE SPOT MAY GO TO AN ALTERNATE STUDENT ON THE WAITLIST. ONCE CLASSES HAVE STARTED, STUDENTS (WAITLISTED OR NOT) MUST CONTACT THE INSTRUCTOR FOR AN OVERRIDE.

This course will be taught primarily in French so students should have at least a conversational level of French. Students taking this course for Judaic Studies credit will, however, be allowed to do all their readings, class participation, and assignments in English, if they so choose. However, students will need to know some French to fully take part in discussions. Registration for Judaic 318.010 will require instructor permission.

Physics Department

Physics (PHYSICS)

--A STUDENT WHO DOES NOT ATTEND THE FIRST MEETING OF A BIOLOGY, CHEMISTRY, OR PHYSICS LAB MAY BE DROPPED FROM THAT COURSE FOR NON-ATTENDANCE. ALL STUDENTS MUST TAKE ACTION THROUGH THE REGISTRATION PROCESS TO MAKE SURE THAT THEIR OFFICIAL COURSE SCHEDULES MATCH THE COURSES THEY ARE ATTENDING.

104 Intro to Python Prog **2.00**
 33510 PD W LAB 001 TTH 4-6PM 2230 USB Avestruz
 This course is set to department consent. Priority will be given to first or second year students who intend to major/minor in physics or another STEM field. If spots are available near the start of the term we will open seats to anyone at that time.

Meets August 29, 2022 - October 14, 2022. The drop/add deadline is September 12, 2022.
106 Everyday Physics **3.00** **25.00**
 11575 P W LEC 001 MW 1130-1PM 268 WEISER Chupp
 11576 P W LEC 002 MW 1-230PM 268 WEISER Chupp
 25468 P W LEC 003 TTH 230-4PM 268 WEISER Kurdak
 25471 P RW LEC 004 TTH 4-530PM 268 WEISER Kurdak

115 Principles of Phys **2.00**
 21856 P W LEC 001 MTWTH 6-7PM REMOTE Tomasch
 Meets October 24, 2022 - December 9, 2022. The drop/add deadline is November 7, 2022.

116 Quarks, Cosmos **3.00**
 33841 P W LEC 001 MW 1-230PM 120 WH Penning

121 Physics Arch Design **5.00** **ADVISORY** **25.00**
 21047 A LEC 001 TTH 11-1PM ARR Tomasch
 This course is primarily for School of Architecture and Design students. If students from other Schools/Colleges wish to take the course, they should add themselves to the waitlist. If remaining seats exist at the start of the term, waitlisted students will be granted permission to enroll.
 27084 PD W LAB 002 F 11-1PM 1209 RAND
 33411 PD W LAB 003 F 2-4PM 1209 RAND

140 General Physics I **4.00** **ADVISORY**
 19260 P W LEC 001 MTWTH 9-10AM 182 WEISER Popov

Students should elect PHYSICS 141 as the corresponding laboratory course.
 19261 P W LEC 002 MTWTH 10-11AM 182 WEISER Popov
 Students should elect PHYSICS 141 as the corresponding laboratory course.
 27051 P W LEC 003 TTH 8-10AM 1060 BSB-TBL Huterer
 This section of PHYSICS 140 varies from the traditional lecture model of the course. This is a studio version of the course, which incorporates more team-based learning techniques. Students should elect PHYSICS 141 as the corresponding laboratory course.

27052 P W LEC 004 TTH 10-12PM 1060 BSB-TBL Eckhause
 This section of PHYSICS 140 varies from the traditional lecture model of the course. This is a studio version of the course, which incorporates more team-based learning techniques. Students should elect PHYSICS 141 as the corresponding laboratory course.

27053 P RW LEC 005 MTWTHF 12-1PM 271 WEISER Melnichuk
 Seats in this section are reserved for students in the Comprehensive Studies Program through August 21. On August 22, open seats are available to any undergraduate student. Please visit the CSP website for more information: lsa.umich.edu/csp

Students should elect PHYSICS 141 as the corresponding laboratory course.

325	Systematic Thinking				4.00	ADVISORY	
31580	A W LEC 001	MW	4-520PM	1120 WEILL	Lantz		
This course provides an introduction to public policy design and analysis using "systematic thinking" from the social sciences and humanities, with the application of scientific methods and knowledge more generally. Systematic thinking about how social problems are defined/understood and how policy both creates and can address societal problems is essential to the design and evaluation of public policies.							
This 4-credit course consists of three hours of lecture and one section meeting each week. The course will cover policy definitions/frameworks, the policymaking process, and how to evaluate and justify public policy through the lenses of science, ethics and social equity. In addition, the course will include a number of short modules, this year focusing on key policy issues that are being discussed in the context of an election year, such as public policies regarding the environment/climate change, public health and health care, education, social welfare, immigration, international trade, and science/technology. A number of guest faculty experts will assist with the short modules.							
There are no pre-reqs for this course. PubPol 201 provides an introduction to the field of public policy. Course requirements include two exams, 3 short papers and active class participation (including debates). Students who like 201 might want to look into the Ford School's major and minor in public policy.

Sweetland Center for Writing

Gayle Morris Sweetland Center for Writing (WRITING)

100 Practice of Writing 3.00

18900 P W REC 003 MW 4-5PM 5180B AH

Writing 100 is designed to help students of all levels improve their writing, but is best suited to those who have yet to fulfill the First-Year Writing Requirement. Upper-level students should have a compelling academic reason for enrolling in Writing 100.

It is department policy that registered students must participate in the first two class sessions or activities in whichever format offered by the instructor or notify the instructor that they will be unable to do so and why. Failure to do so may result in the student being dropped from the course.

Normal waitlist procedures apply for students who attend the first two classes. Students who wish to join Writing 100 after the first two class sessions must email the instructor to set up a meeting to discuss enrolling. Based on this discussion, the student and instructor will then make a determination on whether or not it is appropriate for the student to enroll.

27576	P W SEM 160	W	9-10AM	ARR		Harris	
This course will meet in 4129 Undergrad Science Building. This course is pass/fail ONE credit course.							
In this class, we will specifically explore scientific inquiry into the nature of the mind during meditation. We will touch upon modern brain neuroimaging findings of experienced meditators and novices that undergo training. We will examine the known benefits of meditation for pain, depression, anxiety, and stress using data from human clinical trials. Finally, we will explore our own mental processes through meditation and journaling practices. At the end of this class, students will walk away with a greater scientific understanding of meditation, as well as learn the fundamentals of a personal contemplative meditative practice that can be applied to enhance beneficial, and prune afflictive, mental states.							
704	Readings: Integrative					1.00-3.00	ADVISORY

Cog Neuro of Consciousness							
The nature and the neural basis of consciousness is a foundational question in neuroscience. As a scientific inquiry, it speaks to the existence of reality as we perceive it, and from a translational and therapeutic perspective, a fundamental understanding of the biological basis of consciousness has implications for disorders ranging from psychiatric disorders to the disorders of consciousness. In this course, we will start with a brief overview of the current neuroscientific frameworks and theories to study consciousness, and then as we move forward, will discuss the recent literature on the neurobiology of physiological (sleep), pharmacological (anesthesia, psychedelic states), and pathological states (coma, vegetative state) of consciousness. The students will participate in discussion and presentation of recent relevant literature.							
What: NS704, The Cognitive Neuroscience of Consciousness							
Who: Neuroscience and psychology students (and other interested people)							
When: Fall semester, Wednesdays at Noon							
Where: Medical School, Med-Sci I, 7th floor conference room (#7433D)							
32681	P SEM 053	F	12-1PM	ARR		Mashour	
Psychedelic Neuroscience							
Psychedelic neuroscience is one of the most dynamic fields in 21st century neurobiology. This course will examine current research on canonical and non-canonical psychedelic drugs as well as the psychedelic experience itself. The focus will be on systems neuroscience, including studies on neurophysiology, neuroimaging, and circuit-level mechanisms. Multidisciplinary engagement is welcomed but the course is designed primarily for graduate students in a related field (e.g., neuroscience, pharmacology, psychology, physiology).

	I IND +	ARR	ARR	
406	Extreme Physiology	3.00	ENFORCED	
24681	PDRWLEC 001 TTH	10-1130AM	ARR	Oakley
The course is a mixture of undergraduate (Physiology 406) and MS in Physiology (Physiology 506) students. It is predicted that half the open registration slots for combined Physiology 406/506 will be open for Physiology 406. Because the combined Physiology 406/506 course is restricted to a limited number of students and Physiology 506 is a required course for a subset of master's students (whose course schedules are not set until the end of summer term), enrollment for Physiology 406 IS BY WAITLIST ONLY. Overrides will be issued by the department as space becomes available, which may occur after the first course meeting. As such, interested students on the waitlist must attend the first class. An enrolled student who does not attend the first meeting may be dropped from the course for non-attendance. Students will be notified and given 2 days to use the override, after which the spot will go to an alternate student on the waitlist.				
502	Human Physiology	4.00	ADVISORY	
Undergraduate students who have completed the pre-requisites are welcome to enroll.				
Advisory prerequisites: one college-level course in Biology with Biochemistry.				
19265	P W LEC 001 MWF	830-10AM	ARR	Houchin
505	Physiol Lab	2.00	ADVISORY, ENFORCED	270.00

Groundwork: Testing Basic Mechanics of Movement Through Play

In this class we will be working to increase our movement variability; and to enhance our proprioceptive sensitivity. The goal is to develop a practice that helps the student move through life with ease. This class is grounded in the search for sustainable and efficient movement. Calisthenics, somatic research and improvisation will be used to provoke adaptability in the face of obstacles. The aim is to provide resources for the student's own practice; and to invoke a sense of play when confronting chaos and complexity.

19914	P W LAB 002 MW	9-10AM	DANCE STUDIO 2	Roseborough
-------	----------------	--------	----------------	-------------

Ballet

This class will be a Cecchetti inspired class that also explores the connection and evolution of ballet technique from Cecchetti to the Vaganova and Balanchine techniques/philosophies.

19336	P W LAB 003 MW	9-10AM	DANCE STUDIO 3	Ahlijah
-------	----------------	--------	----------------	---------

Afro-Contemporary

Contemporary African Dance

This course expresses movement forms that combine indigenous African dance techniques as a fundamental exploration through improvisation. The goal is to incorporate varied dance styles while maintaining the philosophies of African dance aesthetics. This course is to equip students with African dance movement expressions and embodiment.

19337	P W LAB 004 MW	10-11AM	DANCE STUDIO 1	West
-------	----------------	---------	----------------	------

Modern

Taught by dance students enrolled in DANCE 481.001.

19338	P W LAB 005 MW	4-530PM	DANCE STUDIO 4	Wilson
-------	----------------	---------	----------------	--------

Afro-Caribbean

This class meets in Studio 4: Room 1060.

Study of the various folkloric dance forms of the Caribbean, particularly those of Cuba, Haiti, and Brazil.

19339	P W LAB 006 TTH	9-10AM	DANCE STUDIO 1
-------	-----------------	--------	----------------

Contemporary

In this class, we will move together, learn original choreography, practice improvisation, and experiment with some low pressure creations of our own. We will keep journals and discuss our curiosities, desires, and discoveries in the field of contemporary dance. We will survey influential choreographers and companies, look at historical artistic movements and methods, and view performances to deepen our understanding of what contemporary dance is and where we might see ourselves within.

19340	P W LAB 007 TTH	9-10AM	DANCE STUDIO 3	Muthukumar
-------	-----------------	--------	----------------	------------

Intro to Bharatanatyam

Bharatanatyam is one of the most widely-practiced classical dance forms of India. This intricate and beautiful tradition has an extensive vocabulary, spanning across both abstract dance and storytelling. This course is a beginner's guide to the physical practice of Bharatanatyam. Students will learn basic movements, gestures and facial expressions from the dance vocabulary, understand the history of the form and embody a practice that has been evolving for centuries.

19341	P W LAB 008 TTH	9-10AM	DANCE STUDIO 4	Rutherford
-------	-----------------	--------	----------------	------------

Afro-Jazz

This beginner level course will introduce students to dance styles originating from the African Diaspora. Students will learn fundamentals of movement derived from West African, Caribbean, and African American forms and will gain historical and cultural context of these styles. Throughout the course, we will discover how these techniques inform and influence contemporary jazz technique and use those principles to create unique and diverse movement scores.

Throughout this course students are encouraged to take their own self exploration through movement, history, and culture. Dance is deeply informed by our personal experiences, where our ancestors are from, and where we hope to end. This course will be a quest of how we transform and develop as individuals through movement and dance.

19343	P W LAB 010 TTH	12-1PM	DANCE STUDIO 3	O'Donnell she-her
-------	-----------------	--------	----------------	-------------------

Composition

Throughout the semester, we will work with physical, written, and spoken prompts to uncover patterns and curiosities within us. We will learn choreographic tools such as time, space effort, repetition, accumulation, character, and theme and variation, as well as constructive feedback techniques to support the creative process.

Movement explorations and guided improvisations will be utilized to discover and expand physical language, as students learn to create original solo and group works in a supportive environment.

Students will be required to view one live dance performance and write a reflection, as well as give a brief context presentation on a prominent choreographer. Class will culminate in an informal showing of student creations.

CAT#	Course Title					CR	PREREQ	LAB FEE
Class #	CODE CMP SEC	DAYS	TIME	LOCATION	INSTRUCTOR			

No prior dance technique is required. Interdisciplinary explorations are encouraged, and curiosity and openness will be key to the process.

20081 P W LAB 011 TTH 4-530PM DANCE STUDIO 3 Biza

Congolese

This class meets in Studio 3: Room 1180.

Study of traditional dances of the African Congo.

103 Modern Dance I 1.00 ADVISORY

19344 PD W LAB 001 MW 12-130PM DANCE STUDIO 1 Gillen she-her

Floorwork Fundamentals

The aim of FLOORWORK FUNDAMENTALS is to develop the industrious technical baseline of our dancing and align it with our risk-taking and choice-making sensibilities. In essence, to activate the athlete within the artist. We will build upon the integrity and responsive nature of the feet with real-time challenges that open up and strengthen our ability to adapt to shifting forces/environments. In doing so we will begin to find clearer lines of communication through the joints facilitating ease of movement, passing of force, and quick reaction times. This line of inquiry will reference my Fighting Monkey research of whole body coordination, Gyrotonic and Counter technique principles of stabilization through contrasting directional forces, curvilinear motion and Bartenieff Fundamentals of breath and developmental progressions. Floorwork mechanics will be integrated into movement sequences that invite action across the floor and throughout the space.

Joint Health Through Movement

The fluidity, stability and longevity of our joints is directly affected by our movement and vice versa. Students will learn joint structure and function via visual models, palpation and movement, along with joint specific and full body exercises to improve and maintain not only specific joint structure and function, but their interconnectedness to full body balance, improved function and integrity of movement.

19330 PD W LAB 004 F 10-12PM DANCE STUDIO 4 Jelinkova

Character Dance

This class is a technique class where you will explore rhythm, steps, movements of the arms and upper body. You will learn and develop characteristic nuances of Polish, Russian, Hungarian, Italian, and Spanish national dances among others. The focus of the class will be on musicality, proper alignment, use of upper body and head, coordination, and precise rhythms, all accompanied with live music!! And most of all to express a joy of the movement and having fun!! The class consists of stylizations of folk dances as danced on the concert stage. Everybody can learn and benefit from this class!

We will cover Barre work (set of combinations to learn particular steps from simple to more difficult), Center work (either in place or travel), and explore basic movements and steps from simple to more difficult combinations from Mazurka, Czardas, Tarantella, Spanish, and Russian dances. Also turns, stamping, and jumps.

153 Anatomy Physiology 3.00

31414 PD LEC 001 TTH 830-10AM 2020 MOORE Schuyten

Anatomy and Physiology for Dancers

Course Description:

The Dancer is a body-aware performer, who requires understanding of how their body works and knowledge of how the different parts of their body work together to optimize their movement. This course will give an overview of the musculoskeletal anatomy and its association to movement, common dance injuries linked to specific anatomy, with interaction of physiological systems into whole body anatomy. Injury risk screening will also be discussed to assess understanding of this material and its application to the individual dancer.

Upon completion of this class, you should be able to:

-Describe anatomical positioning, planes of motion, and basic joint movements.

-Summarize and comprehend musculoskeletal anatomy pertinent to dance movement.
 -Recognize the anatomy of the Nervous, Lymphatic, Circulatory, Respiratory, Integumentary Systems and contributions toward dance movement and injury.
 -Realize the effects of injury on body tissue and systems and the timeline of body tissue healing.
 -Understand what happens anatomically in concussion and how to utilize return to learn and return to performance progressions.
 -Express areas of concern to screening the body for musculoskeletal injury risk and how it relates individually to the dancer.

191 1st Year Seminar **2.00**
 31411 PD SEM 001 T 4-6PM 2032 MOORE West

This course is designed for first-year and transfer students to navigate through their first semester as college students. Throughout the course, students will be provided with tools to make informed choices about nutrition, injury prevention, balancing physical practice with academic requirements, and will be taught how to navigate advanced studies in dance within the university culture.

201 Modern Dance II **1.00 ADVISORY**
 12916 PD W LAB 001 TTH 12-130PM DANCE STUDIO 2 Rutherford

Afro-Contemporary
 This intermediate level course will introduce students to dance styles originating from the African Diaspora. Students will learn fundamentals of movement derived from West African, Caribbean, and African American forms and will gain historical and cultural context of these styles. Throughout the course, we will discover how these techniques inform and influence American modern dance and use those principles to create unique and diverse movement scores.

Throughout this course students are encouraged to take their own self exploration through movement, history, and culture. Dance is deeply informed by our personal experiences, where our ancestors are from, and where we hope to end. This course will be a quest of how we transform and develop as individuals through movement and dance.

Located in the new LSA Central Campus Classroom Building and the specifically designed theatre-in-the-round classroom, this undergraduate seminar focuses on developing students' skills in dance appreciation. Through an integrated process of watching videotaped and live performance, doing team-based discussions, and making small-group creative presentations, students will broaden their cultural perspectives and explore how embodied performance constructs social and political transformations. Class topics include and are not limited to Hip-hop

Advanced Floorwork

Complex movement sequences that require whole body coordination will challenge each participant to recalibrate assumed strengths and weaknesses, opening up new and playful methods for exploration and spontaneous, instinctual adaptation. Success and failure will be deconstructed into sensory and communal feedback structures that build resilience and curiosity. These opportunities will reach beyond the singular agency of choosing for oneself and extend into the composite understanding of the shared studio environment; in what ways are the choices of our peers in conversation with our own practice? Emphasizing strength, stamina and artistry, this course builds into complex phrase work drawn from my latest choreographic research. Traversing surprising and challenging landscapes of size, direction, tone and texture, each dancer will reset the limits of their physical capacity. Effort, surprise and full-bodied ardor awaits.

Javanese Gamelan							
Learn to play the dynamic, subtle, transcendent music of the Javanese Gamelan! These classes are for people who want to experience a musical tradition totally different from western folk, rock or classical music. The gamelan is an ensemble of gongs, metallophones, drums, xylophone, a few stringed instruments, and singers. No previous knowledge of Indonesia or of music is expected. These courses are open to all students, undergraduate and graduate in all departments of the university. For information contact Susan Walton swalton@walton.

24687	P W REC 001	TTH	10-11AM	506 BMT	Edwards		

Popular Styles

No Instructor Approval Needed To Enroll

Designed for both music majors and non-music majors, this introductory course in popular guitar style will teach students essential performance skills as well as a deeper understanding of the cultural importance of the guitar in popular music. Students will learn to read standard music notation, develop a knowledge of common chords and rhythmic strumming patterns on the instrument, and perform a variety of popular songs utilizing techniques discussed throughout the semester. Optimized for online learning, web based video lessons and individual instruction will be available throughout the semester to ensure that all students are able to receive the specific help needed for a successful and positive experience in the class.

The purpose of GUITAR 111 is to help students develop their guitar skills, with a primary focus on using the guitar as an accompaniment instrument. Right Hand skills covered will include finger picking, flat picking, and a variety of strumming patterns. Left Hand skills will include open chords, barre chords, melody chords, and basic scale patterns. Introduction to reading of standard music notation, guitar tablature, and chord symbols will be covered. Other topics that will be presented include improvisation, playing by ear, and using the capo for transposition.

Popular Styles & Improvisation

Designed for both music majors and non-music majors, this intermediate course in popular guitar style will teach students continued performance skills as well as a deeper understanding of the cultural importance of the guitar in popular music. Students will learn to read standard music notation and tablature, develop a strong chord vocabulary of movable barre chord shapes and extended chords, expand on rhythmic strumming and finger-style patterns on the instrument, learn improvisation techniques with movable scale patterns, discover alternate tunings, and perform a variety of popular songs utilizing techniques discussed throughout the semester. Important music theory topics related to the guitar and improvisation will also be discussed through creative exercises. Optimized for online learning, web based video lessons and individual instruction will be available throughout the semester to ensure that all students are able to receive the specific help needed for a successful and positive experience in the class.

You must have your own acoustic steel string or nylon string acoustic guitar for GUITAR 112.

GUITAR 112 will continue developing the skills introduced in GUITAR 111. Right Hand skills covered will include finger picking, flat picking, and a variety of strumming patterns. Left Hand skills will include open chords, barre chords, melody chords, pentatonic, blues, major, and minor scale patterns. Reading of standard music notation, guitar tablature, and chord symbols will be included. Other topics that will be covered include improvisation, playing by ear, and using the capo for transposition.

Spanish Fingerstyle & Arrange

No Instructor Approval Needed To Enroll. Prerequisite: Guitar 111 or equivalent guitar experience recommended

Designed for both music majors and non-music majors, this intermediate course in Spanish/Classical guitar style will teach students new performance skills and repertoire, as well as build a deeper understanding of the multi-cultural and geographical influence on guitar music. Students will learn to read standard music notation and tablature, learn a variety of pieces from various musical time periods, study some of the most important and influential composers and performers of classical guitar music, and create an original solo guitar arrangement of a popular, traditional, film or video game composition. Important music theory topics related to the classical guitar will also be discussed. Optimized for online learning, web based video lessons and individual instruction will be available throughout the semester to ensure that all students are able to receive the specific help needed for a successful and positive experience in the class.

	The Media of Opera The course explores the multiple technological regimes that continue to animate the practice of opera and its imagination from the late 18th-century to the present. Recent scholarship on the topic will be read in conjunction with the study of representative works. Topics addressed will include: the audio-visual regime of opera, modes of spectatorship, global circulation of theatrical technologies and the re-mediation of opera by technologies of sound reproduction and transmission, such as the phonogram, radio and film.

In this four credit drama course students will explore major American plays of the 20th century through the process of text analysis through performance. We will work on plays by major writers such as Arthur Miller, Tennessee Williams, Lorraine Hansberry, Sam Shepard and Tony Kushner. For each play we will discuss dramaturgical background, script and character analysis and put scenes on their feet for constructive critique. Written assignments will center on a journal which will include a series of actor's explorations of motivations and actions. Students will also be responsible for writing critiques of two productions. The course culminates in a public performance of a cutting of a major play, most likely Tony Kushner's "Angels in America."

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Even pre-pandemic, the U.S. faced a childcare crisis. Many parents need childcare while they work, insufficient licensed childcare programs exist for infants and toddlers, and such programs often cost too much for families. Childcare businesses also operate at thin margins and struggle to stay in business due to rising operational costs and challenges finding qualified staff. Multidisciplinary student teams will hear from leading experts and incorporate problem-solving tools and insights from law, social work, policy, business, and other fields to propose solutions to relevant stakeholders.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) March 14-28, 2022. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

34863	PD LAB 002 W	315-630PM	250 HUTCH	Guenther, Carr, Hess, Dickinson
-------	--------------	-----------	-----------	---------------------------------

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Environmental, Social and Governance (ESG) policies have taken center stage in the investment world, but requirements of investor ESG policies vary widely, and they may be challenging for investee companies to implement. In this course, multi-disciplinary student teams will work with faculty and subject matter experts to learn about ESG policies, how to assess their impact, and if there are ways to harmonize such policies. Students will leverage problem-solving skills and insights from fields including law, business, and policy to develop innovative solutions to a challenge in this area.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) March 14-28, 2022. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Class #	CODE CMP SEC	DAYS	TIME	LOCATION	INSTRUCTOR

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The built environment bears the stamp of slavery supported by new forms of forced labor. Starting with an understanding that architecture isn't value-neutral and that racism intersects with urban planning, land use, and environmental problems, this class will confront such issues through a U-M/Yale partnership. Students will create a framework for the National Slavery Memorial in Washington, D.C., as multidisciplinary teams from law, planning, history, and other fields learn problem-solving skills, conduct research, and approach the politics, ethics, and mechanics of construction holistically.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) March 14-28, 2022. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

34879 PD LAB 004 TH 315-630PM 218 HUTCH Khanna, Bauguess
 This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The rise of the cryptoeconomy has implications for national security, data privacy, transaction costs, Web 3.0, and much more. In this class, multidisciplinary student teams will learn about the growth of the cryptoeconomy, varieties of cryptoassets, and an array of potential uses of such assets from experts in law, business, policy, information, and more. Students will apply research insights and problem-solving tools to develop a solution focused on regulating the cryptoeconomy.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) March 14-28, 2022. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

34851	PD LAB 001	W	315-630PM	116 HUTCH	Sadek, Sobocinski, Carr			
This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Even pre-pandemic, the U.S. faced a childcare crisis. Many parents need childcare while they work, insufficient licensed childcare programs exist for infants and toddlers, and such programs often cost too much for families. Childcare businesses also operate at thin margins and struggle to stay in business due to rising operational costs and challenges finding qualified staff. Multidisciplinary student teams will hear from leading experts and incorporate problem-solving tools and insights from law, social work, policy, business, and other fields to propose solutions to relevant stakeholders.								
This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.								
Non-law graduate/professional students may apply for the course using the PSI application system (https://problemsolving.law.umich.edu/) March 14-28, 2022. After the initial application period, students seeking to apply can contact problemsolving@umich.edu .								
34859	PD LAB 002	W	315-630PM	250 HUTCH	Guenther, Carr, Hess, Dickinson			
This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Environmental, Social and Governance (ESG) policies have taken center stage in the investment world, but requirements of investor ESG policies vary widely, and they may be challenging for investee companies to implement. In this course, multi-disciplinary student teams will work with faculty and subject matter experts to learn about ESG policies, how to assess their impact, and if there are ways to harmonize such policies. Students								

will leverage problem-solving skills and insights from fields including law, business, and policy to develop innovative solutions to a challenge in this area.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) March 14-28, 2022. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

34867	PD	LAB 003	W	315-630PM	0225 JEFFRIES	CdeBaca		
-------	----	---------	---	-----------	---------------	---------	--	--

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The built environment bears the stamp of slavery supported by new forms of forced labor. Starting with an understanding that architecture isn't value-neutral and that racism intersects with urban planning, land use, and environmental problems, this class will confront such issues through a U-M/Yale partnership. Students will create a framework for the National Slavery Memorial in Washington, D.C., as multidisciplinary teams from law, planning, history, and other fields learn problem-solving skills, conduct research, and approach the politics, ethics, and mechanics of construction holistically.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) March 14-28, 2022. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

-------	----	---------	----	-----------	-----------	------------------	--	--

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The rise of the cryptoeconomy has implications for national security, data privacy, transaction costs, Web 3.0, and much more. In this class, multidisciplinary student teams will learn about the growth of the cryptoeconomy, varieties of cryptoassets, and an array of potential uses of such assets from experts in law, business, policy, information, and more. Students will apply research insights and problem-solving tools to develop a solution focused on regulating the cryptoeconomy.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) March 14-28, 2022. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

School Of Public Policy

Public Policy (PUBPOL)

201 Systematic Thinking 4.00 ADVISORY

17411 A W LEC 001 MW 4-520PM 1120 WEILL Lantz
 This course provides an introduction to public policy design and analysis using "systematic thinking" from the social sciences and humanities, with the application of scientific methods and knowledge more generally. Systematic thinking about how social problems are defined/understood and how policy both creates and can address societal problems is essential to the design and evaluation of public policies.

This 4-credit course consists of three hours of lecture and one section meeting each week. The course will cover policy definitions/frameworks, the policymaking process, and how to evaluate and justify public policy through the lenses of science, ethics and social equity. In addition, the course will include a number of short modules, this year focusing on key policy issues that are being discussed in the context of an election year, such as public policies regarding the environment/climate change, public health and health care, education, social welfare, immigration, international trade, and science/technology. A number of guest faculty experts will assist with the short modules.

There are no pre-reqs for this course. PubPol 201 provides an introduction to the field of public policy. Course requirements include two exams, 3 short papers and active class participation (including debates). Students who like 201 might want to look into the Ford School's major and minor in public policy.

447 Excel for PubPol 1.50

26285 P RW LAB 001 TTH 1130-1250PM 3117 WEILL Worthington

This course is designed to familiarize students with core skills in data access, manipulation, analysis, and presentation using Excel (and Excel-like alternatives). Spreadsheet programs remain an important part of professional life, and this course will prepare students for basic and intermediate use of aspects of the program in that setting. Students will learn about data import, formatting, and management. You will also learn about producing tables (including summarization), visualizations, varieties of analysis (ANOVA, regression, etc.), and basic programming. No prior knowledge of Excel is expected, but familiarity with basic concepts of statistics is recommended.

Meets: 10/24/22 - 12/09/22 (Drop/Add Deadline: 11/07/22)

Combined w/ PubPol 647.

457 Data Visual PubPol 3.00

26929 P RW LAB 001 TTH 230-350PM 3117 WEILL Worthington

Communicating through visual presentation of data is a critical skill in a variety of industries. This course will introduce students to data visualization, from principles to practice. Topics in the course will include: principles of data communication, understanding types of data, grouping and summarization, static presentation of data, dynamic presentation of data, interactive presentation of data, presentation of model results and estimates, and matters of accessibility and style. You will be asked to examine and critique existing work and practice creating visualizations of your own. You will also be introduced to a variety of commonly-used software for data visualization.

466 Hist&Future Detroit 1.00

37466 P RW REC 001 TTH 1130-1250PM ARR Farley

No large American city grew more rapidly than Detroit from 1900 to the 1930s. Thanks to Henry Ford and the automobile manufacturing, Detroit became the prosperous axis mundi of the world vehicle industry. After World War II, Detroit seemed poised to continue growing. In 1947, there were 325 manufacturing plants in the city. Many of those factories were old so firms built modern ones in the suburbs. The federal government subsidized home building in this era so, at very low cost, whites but not African American could easily buy an attractive suburban home. The city's population began to fall in 1950. Retail trade followed the migration to the suburbs. By 1990, racial attitudes had changed and African Americans moved in great numbers from the city to the suburbs. By 2010, the city's population was only 38% of what it was in 1950. Detroit lost its tax base and, in 2012, entered bankruptcy.

Coming out of bankruptcy, the city had some funds to improve its very deficient city services. Major philanthropies began investing in improving the quality of life in Detroit. Then major employers including Quicken Loans, Little Caesars, General Motors, Ford and Fiat-Chrysler started making major investments that are bringing more jobs to the city. Downtown, Midtown and the east waterfront are prospering. The city's government began to address long standing problems including neighborhood deterioration.

The course focuses upon the history of Detroit emphasizing both the long history of labor-management and black-white conflicts and recent efforts to make Detroit a diverse, welcoming city with a higher quality of life and numerous job opportunities.

There are readings for each class meeting and you will be asked to write a short op-ed essay. For additional information: renf@umich.edu

474 Values & Ethics 3.00

26068 P RW LEC 001 TTH 230-350PM 1110 WEILL Silva

Inequity at Work

More than 50 years after the passage of the Civil Rights Act, significant gender and ethno-racial inequality in the labor market remains. Why? This course relies on a multidisciplinary literature from sociology, economics, psychology, moral philosophy, and socio-legal studies to examine ethno-racial and gender inequality in the labor market. We will first review and evaluate major explanations of inequality in the labor market, including employer discrimination, human capital differences, sexual harassment, occupational sex segregation, mass incarceration, inflexible workplaces, and segregated social networks. Then, we will discuss public policies and organizational efforts that seek to directly or indirectly ameliorate ethno-racial and/or gender inequality, such as paid family leave, "ban the box," unconscious bias and sexual harassment trainings, and increases to the minimum wage. We will discuss the motivation for these remedies, their effectiveness, and the ethical questions they raise.

35075 P RW LEC 002 MW 230-350PM 1230 WEILL Stewart

Violence and Social Inequality
 Violence and Social Inequality

What is the relationship between social inequality and violence? For instance, how is violence used to create and preserve structural inequalities? How and under what conditions have people wielded violence to combat and erode these inequalities? This course will rely upon a multidisciplinary body of literature from political science, history, sociology, psychology, economics, and empirical cases from both the U.S. and around the world to explore these questions. Students will consider the ethical and practical implications of the works reviewed for real-world policy debates.

Diplomacy in Indo-Pacific

Topics: U.S. Diplomacy in the Indo-Pacific

The course will examine the past, present, and future of diplomatic interactions between the United States and the other nations of the Indo-Pacific region, starting with the 1951 signing of the Treaty of San Francisco that ended the state of war in the Pacific after World War II. We will evaluate 1) how current diplomatic problems in the region developed historically, 2) how governments are seeking to use diplomacy, amid constraints, to address such problems today, and 3) what conditions might make it possible for future diplomats to address effectively at least some of the unfinished business from the Treaty of San Francisco in 1951. The course will focus on matters involving Mainland Southeast Asia, Maritime Southeast Asia, and the Korean Peninsula.

First, we will analyze diplomatic efforts to integrate Mainland Southeast Asia into a broader regional order. We will assess how problems involving Burma/Myanmar, including the Rohingya issue, hinder the integration of the Association of Southeast Asian Nations (ASEAN) today and consider what might be done in the future to address such problems.

Second, we will analyze efforts to manage tensions in Maritime Southeast Asia, centering on the South China Sea. We will examine current attempts to conclude an ASEAN-China South China Sea Code of Conduct and evaluate how claims and conduct issues might be settled in the future.

Third, we will discuss efforts to bring stability to the Korean Peninsula. We will examine the challenges the United States currently faces in resuming diplomacy with the Democratic People's Republic of Korea (DPRK) and consider what it might take in the future to resolve the DPRK nuclear issue diplomatically. Assignments will include policy papers, presentations, and participation in three in-class simulation exercises focusing on future diplomacy.

Racial Foundations of PubPol

Topics: Racial Foundations of Public Policy

Racial Foundations of Public Policy is a Fall speaker series that focuses on the historical roots and impact of race in shaping public policy as both a disciplinary field and as a course of action. The series invites renowned scholars to deliver virtual presentations on the racial genealogy of public policy and the historical roots and contemporary currents of race in areas such as economic, housing, criminal justice, education, and immigration policy. Participants in the series will develop the skills needed to discuss, understand, and inquire about formal and informal racial structures and institutions in which policy is formulated, implemented, and experienced. Undergraduate and graduate students will have the option of receiving 1.5 credits for their participation in the series and the accompanying discussion-based course. The course will be offered in partnership with the Center for Racial Justice and will be led by the Center's Director, Dr. Celeste Watkins-Hayes.

US Foreign Policy Leadership

Topics: U.S. Foreign Policy Leadership

Meets 08/29/22-10/14/22 (Drop/Add Deadline: 09/12/22)

Instructor: Stephen E. Biegun

This course will focus on understanding the modern conditions and challenges facing American foreign policy makers in the 21st century. The class will be taught from a practitioner's perspective and will seek to illustrate and assess the choices available to American leaders in the post-Cold War period when making foreign policy decisions on matters such as the Balkan wars after the collapse of Yugoslavia, NATO enlargement, the war in Afghanistan (and the larger Global War on Terrorism), the war in Iraq, the evolution of US policy toward China, and the Russian invasion of Ukraine. While class discussions will touch upon these issues and more, the method of teaching will be to deconstruct the tools and processes that are essential to the successful execution of American foreign policy in the modern era.

Taught as a half semester course at the beginning of the Fall 2022 semester, the course will be broken down into seven weekly topics including sessions on US interests; American values; US foreign policy and national security tools and capabilities; the foreign policy interplay among US institutions and between the government and the public (to include Congress, the Executive Branch, the media, and public opinion - and politicians); when do we go to war, when don't we, and why; and we will be wrapping up the final two weeks with a focus on Grand Strategy.

In order to stir discussion and debate, in preparation for weekly classes we will read journal articles and book chapters presenting different perspectives (realism vs. idealism, values vs. interests, hard power vs. soft power, grand strategy pros and cons, etc.). The goal for this course is to focus not so much on teaching what to think about American foreign policy but rather to work with the students to develop a framework for how to listen, think and decide for themselves on our nation's contemporary foreign policy challenges and choices (all filtered through the lens of my own three decades of practical experience in and with government).

Courts in Int'l Human Rights

Topics: The Role of Courts in International Human Rights

This course will explore the legal enforcement of those human rights that are fundamental and are the birthright of all human beings. We will review the international political and legal framework established over the past fifty years to protect human rights. We will home in on how effectively those universally-accepted legal norms are enforced. Conventional legal wisdom holds that where there is a right, there is a remedy. We will explore whether

this is, indeed, true in the international human rights context. Specifically, the central inquiry of this course is what needs to be done to give legal effect to the moral norms that embody human rights and fundamental freedoms?

Of those institutions of government charged with the responsibility of enforcing these moral norms, we will explore the particular role of the courts - international and certain domestic ones. In the area of human rights and liberties, the United States has traditionally been a beacon of hope. And so, we will be particularly attentive to the special role of the Supreme Court of the United States in giving meaning to the words of the Constitution and laws that guarantee basic rights.

 24742 P RW SEM 001 M 10-1120AM 1110 WEILL Sanders

Applied Learning Seminar
 This is a required course open only to current Ford School BA students.

Course Objectives:

1. Students will explore their social identities, values and emotions about a public policy issue and examine the factors that have contributed to their beliefs.
2. Students will gain an understanding of the ways their beliefs and emotions are embedded in social networks and shared values.
3. Students will learn to consciously employ effective communication (i.e. reflection, empathy, asking, and listening), as a tool for understanding public policy debates and advancing public policy solutions.
4. Students will practice using narratives, reframing, and dialogue to work across differences.

477 R for PubPol 1.50
 26931 PIRW LAB 001 TTH 1130-1250PM 3117 WEILL Worthington

Note: Instructor consent required

This course is an introduction to programming in the R statistical language. R is a flexible, open-source statistics platform which has gained broad adoption in a variety of fields. Through interacting with R, RStudio, and elements of the Tidyverse? (a collection of R packages for data manipulation, analysis, and visualization), students will learn the fundamentals of working in R. By completing this class, students should have the baseline skills necessary to continue their self-study in R on topics suited to their own interests. This course covers fundamentals of programming in R, object types and structure, import and use of packages for expanding R's capabilities, data management, and basic analysis. The course is graded credit/no credit (pass/fail), with weekly review tasks? in R. Students are not expected to have prior experience in R or other programming, but familiarity with basic concepts in statistics is recommended.

479 Eval Public Policies 4.00
 24549 A W LEC 001 MW 1-220PM 1120 WEILL Lantz

This 4-credit course will provide an introduction to the fundamentals of evaluation research design and methods as applied to public policies and programs. The course will cover the role of evaluation in the public policy process, and both process and summative evaluation research, including research designs for establishing causal inference between exposure to public policies/programs and outcomes. Students will gain skills in understanding and crafting research designs common in public policy evaluation, including randomized controlled trials, quasi-experimental designs and time series designs. Students will also gain skills in understanding/critiquing published public policy evaluation literature, measurement/data collection methods, and basic statistical methods for analyzing evaluation data. Class format will include lecture, discussion of case studies, and small group applied exercises.

This course will help build your research/analysis skills

Irrational Actors

PUBPOL 495 (Policy Seminar) is for students currently enrolled in the Public Policy Undergraduate Program only, no exceptions. Enrollment is by permission only. Please contact fssp-registrar@umich.edu with any questions.

Classic economics is based on the idea of rational actors, people making decisions that maximize their own utility based on their preferences. However, most psychological models of behavior don't assume that people are particularly rational. Some even claim that the vast majority of our decisions are not based on conscious preferences and deliberate choices, but are instead influenced by factors that are invisible to us. For example, why is that people who are desperately trying to save money end up splurging on unnecessary purchases? How is that people who don't think of themselves as racist and even go out of their way to reject racist beliefs can still act in biased ways against racial minorities? Why is it so often the case that the arguments we remember best are the ones that happen to fit with our existing beliefs?

Many psychological and behavioral economic models have been created to explain the myriad ways that people act irrationally. In this policy seminar, we will examine some of the ways in which people are predictably irrational and the implications of this irrationality for policy. We will review research from behavioral economics and psychology to explore how factors such as heuristics, implicit attitudes, social norms, self-serving biases, and emotions can shape our decisions often in ways we're not even aware of. Assignments include four short policy memos that include peer review, and one longer policy memo on a topic of the student's choice.

Counterterrorism
 PUBPOL 495 (Policy Seminar) is for students currently enrolled in the Public Policy Undergraduate Program only, no exceptions. Enrollment is by permission only. Please contact fssp-registrar@umich.edu with any questions.

Topic: Counterterrorism Strategy and Policy

Introduction/Description: Counterterrorism policy and strategy in the United States has ebbed and flowed over the last several decades as a result of changes in the terrorist threat landscape, the development of new counterterrorism tools, resources, and capabilities, and the introduction of counterterrorism authorities and legislations. Still, there are gaps and seams in the existing US counterterrorism architecture, and new threats emerge, old ones recede, and other national security priorities rise in prominence.

This class is designed to provide a foundational overview of US counterterrorism policy and strategy stretching back thirty years contrasted with an ever-changing threat environment over distinct stretches beginning with the Clinton administration. As a result, it does not focus exclusively on a particular terrorist threat nor one particular policy or counterterrorism approach, but rather provides a more holistic perspective.

Course Learning Objectives: The course has four key objectives and students will: a) assess the features of the U.S. counterterrorism enterprise, key definitions and authorities, and legal foundations; b) examine the complex terrorist threat phenomenon to the United States and compare and contrast different terrorist adversaries; c) evaluate the strengths and weaknesses of different counterterrorism approaches over the last thirty years, and d) develop practical analytic, writing, and oral presentation skills relevant to national security career fields.

Police Reform
 PUBPOL 495 (Policy Seminar) is for students currently enrolled in the Public Policy Undergraduate Program only, no exceptions. Enrollment is by permission only. Please contact fssp-registrar@umich.edu with any questions.

This course examines crime and criminal justice policy in the United States. In the first part of the course, we will develop a framework for evaluating criminal justice policy organized around four values: Safety, censure, liberty, and equality. Through a brief review of recent reforms and critiques of criminal justice practices, we will examine how this range of values both justifies public efforts to control crime and motivates important policy actors. In the second part of the course, we will use our framework to analyze contemporary proposals for reform in each of the three major criminal justice institutions: The police, the courts, and corrections. Topics are likely to include drug courts, order maintenance policing, indigent defense, prisoner reentry, gun control, marijuana legalization, and victim's rights, among others. In each case, we will review current research and analysis of different strategies, seeking to understand which proposals strike a tolerable balance among the competing aims of the field.

Dangerous Peacemaking
 PUBPOL 495 (Policy Seminar) is for students currently enrolled in the Public Policy Undergraduate Program only, no exceptions. Enrollment is by permission only. Please contact fssp-registrar@umich.edu with any questions.

The international law of individual accountability for human rights atrocities, which emerged after World War II, has evolved rapidly since the 1990s. A variety of mechanisms has been used to bring justice for atrocities committed by people, groups and governments against those under their political and social control. These mechanisms include investigatory commissions such as the South African Truth and Reconciliation Commission; United Nations ad hoc tribunals for trying perpetrators of human rights atrocities such as the International Criminal Tribunal for Rwanda (ICTR); and a hybrid national-international court such as the Special Court for Prosecuting Atrocities in Sierra Leone; United Nations Peacekeepers and externally supported Electoral Commissions in the DRC. What has been the role and use of transitional justice policy frameworks, instruments, and mechanisms such as truth commissions, special courts and tribunals for shaping reparative frameworks as part of the democratic state's quest for greater social cohesion and peace after conflict? How are conflicting interests sometimes the cause of the preceding conflict addressed systemically? How are the legacies of power abuses and violent social control effectively redressed after new democracies are inaugurated? What are the political, legal, economic and social policy challenges faced by nations who have experienced internal conflict? How do such nations recover after extended periods of administrative violence during oppressive systems? How do the politics inherent to collective, institutional and group interests strategically influence such political systems, policy frameworks and their corresponding social, political and economic outcomes? What trials, tribulations and hopes play into peacemaking, nation-building, plural systems and democratic consolidation over time? Why do seemingly stable states slide into civil war? How is the public policy, political and legal meanings of the terms implicated in the state's search for socio-political, ethico-judicial, sustainable peace and human rights?

Econ Grow,Depress,Inequal
 PUBPOL 495 (Policy Seminar) is for students currently enrolled in the Public Policy Undergraduate Program only, no exceptions. Enrollment is by permission only. Please contact fssp-registrar@umich.edu with any questions.

The combination of slow economic growth and rising inequality has meant that the material living standards of the median American household have improved only slowly since the early 1970s. Similar economic stagnation has afflicted many other developed economies. These economic conditions are arguably in large part responsible for growing political polarization and the rise of populist movements.

This course will place these recent trends in context by studying the 20th century economic history of the U.S., Europe, and Japan. We will examine (1) the origins of modern economic growth in the 19th century and the forces that increased growth in the 20th century; (2) the tremendous economic disruption of the Great Depression; (3) the growth success of the 1950s and 1960s; and (4) the cyclical and structural economic problems faced by the U.S., Europe, and Japan since 1973. The focus of this course will be on the economics of these events and the responses of economic policymakers. But we will also look to history and political science for alternative perspectives.

In addition to short writing assignments, students will write two five page papers.

500	MPP ILE		1.00
34132	P RW SEM 001	ARR	Hanson

510	Politics of Pub Pol		3.00
33902	PDRWREC 002	TTH 230-350PM	1230 WEILL Lin

This is a core course restricted to Ford School students only. Registration is by permission only.

The primary objective of this core course in the MPP curriculum is to equip students with the knowledge and skills needed for effective political analysis of public policy issues and decisions. The course covers conceptual and analytic frameworks for understanding political processes, institutions, stakeholders, contexts and policy decision making. In addition, the course builds written and verbal communication skills, emphasizing the ability to convey clear and concise political analyses in a variety of formats, including policy memos.

This section of 510 has been extensively revised to teach students to employ strategies for effective policy advocacy, focusing on the American political system but including cases from other countries and political systems.

We will consider advocacy for change within a political system (for instance, efforts to obtain civil rights for populations within a country) and across political systems (for instance, efforts to promote human rights in a different country). We pay special attention to the difference between political strategies, political structures, and political systems, exploring how they strengthen or constrain each other. We will also explore efforts to dismantle oppressive structures and systems, considering whether "the master's tools can never dismantle the master's house." (Lorde 1984) By the end of the course, students will be able to identify the tradeoffs implicit in the political strategies that they adopt, the coalition allies they choose, and the context and venues in which they must work. They will also be able to write concisely, analytically, and persuasively about the decisions they make.

522 MPA Writing Seminar 1.00

26742 P RW SEM 001 F 1130-1250PM 2120 WEILL Ralph

The class meets once a week and is open only to MPA students.

In this ten-week course, students will learn to write for a public policy audience. Students will research a policy topic and will write about it in three separate documents (an op-ed and two memos), each of which will undergo extensive revision. Through workshops, class discussion, and instructor feedback, students will finish the course with a strong writing sample and greater confidence in policy writing norms and style.

32978 P RW SEM 001 TTH 1-220PM 1110 WEILL Yang

This course surveys what we do and don't know about economic growth and poverty alleviation in developing countries. We begin by discussing alternative perspectives on the goals of development. The substantive sections of the course address specific topics relevant to developing countries, such as: technology and growth; international trade and investment; international migration and remittances; coping with risk; public health and education; corruption and governance; and public finance.

This class counts as the second economics course required for the MPP degree.

554 Econ for Pub Affairs 3.00

This is a core course restricted to Ford School students only.

This course begins a two-term sequence designed to provide students with an understanding of the economic implications of public policies and with analytic tools useful in system design and policy planning. Major topics include production, costs, prices, resource allocation, governmental involvement in economic activity, and the operation of market systems.

23385 P RW DIS 002 F 10-1120AM 1120 WEILL

557 Data Visualization 3.00

26928 P RW LAB 001 TTH 230-350PM 3117 WEILL Worthington

This course will provide students with fundamental principles of and practical experience in presenting data in a visual form for communication and analysis. The class will cover collection of data, management of data for visualization, creating a workflow for visualization, collaboration with designers and coworkers, and examples of visualization which communicates effectively. For students of Public Policy, mastering the skills of persuasive communication with empirical evidence is essential, and visual communication can be a powerful tool in that skillset.

The course is comprised of four core modules: principles/fundamentals of design and visualization and review of visualization programming in Excel, STATA, and R/ggplot. In each of those modules, students will learn how to translate quantitative data (or coded qualitative data) into visualizations for examining patterns which reveal

insights about the world. At the end of this class, students should have a baseline understanding of visualization for use in their own work and development of their own skills. The course includes a course-long data visualization portfolio project. Students are not expected to have experience or prior knowledge of software or principles, but a baseline understanding of statistical concepts is recommended.

Combined w/ PubPol 457.

Pre-requisite - PubPol 639: Quantitative Methods for Program Evaluation

Students will understand how to design, execute, and interpret the results from advanced estimation techniques beyond the standard OLS model. Topics will include models for binary and categorical dependent variables, instrumental variables, selection models, regression discontinuity models, survival/duration models, time-series analysis, panel and time-series-cross-sectional models.

577	R for Pubol	1.50	
26932	P RW LAB 001 TTH	1130-1250PM	3117 WEILL
			Worthington

This course is an introduction to programming in the R statistical language. R is a flexible, open-source statistics platform which has gained broad adoption in a variety of fields. Through interacting with R, RStudio, and elements of the ?Tidyverse? (a collection of R packages for data manipulation, analysis, and visualization), students will learn the fundamentals of working in R. By completing this class, students should have the baseline skills necessary to continue their self-study in R on topics suited to their own interests.

This course covers fundamentals of programming in R, object types and structure, import and use of packages for expanding R?s capabilities, data management, and basic analysis. The course is graded credit/no credit (pass/fail), with weekly review ?tasks? in R. Students are not expected to have prior experience in R or other programming, but familiarity with basic concepts in statistics is recommended.

587 Public Management 2.00
 34100 P RW SEM 001 M 4-550PM 1210 WEILL Little
 Public Management: Organizational Causes of Large Scale Technology Failure

Gas plants explode, planes crash, and nuclear power plants suffer meltdowns. Human beings make mistakes and complex technologies fail in unexpected ways. Often unrecognized in accidents and disasters are the organizational features that made these disasters possible or likely. This course examines the organizational features, system defects, and bureaucratic dysfunctions that contribute to large technology failures.

Organizations affect the occurrence of accidents at every level. Internal characteristics like poor communication, loose coupling, and principal-agent problems lead to accidents. External factors like ineffective regulation and enforcement likewise contributes to disaster. A recent example illustrating many of these failures is the design and certification of the Boeing 737 Max aircraft. Through case studies, sociological analysis, and organizational study this course will help students think more fully about safety and accident in our technologically complex world. Learning will occur through study of detailed real-world case studies as well as social-scientific analysis of the workings of various organizations and agencies and the actors within them.

589 Conflict Resolution 1.00
 34103 P RW SEM 001 W 1130-1250PM 1210 WEILL Shaefer

Conflict is an inevitable part of the human experience--in relationships, at the work place, in public administration and especially in the public policy making process. Unresolved conflict can hinder decision making and impede organization change, but when conflict is addressed, managed or transformed, it is possible for relationships, organizations, and systems to grow and succeed. Drawing on empirical research and case studies, this skills-based course will begin with a discussion of the impact of conflict in systems and a taxonomy of forms of conflict with an eye toward public administration. Then the course will focus on the development of strategies that can be used to resolve or manage conflicts, with opportunities for students to develop those skills through in-class exercises. Special attention will be paid to skills that can be used to address conflicts that emerge across differences such as race and ethnicity, political orientation, and gender.

626 Hist & Futr Detroit 1.00
 37465 P RW REC 001 TTH 1130-1250PM 1120 WEILL Farley

No large American city grew more rapidly than Detroit from 1900 to the 1930s. Thanks to Henry Ford and the automobile manufacturing, Detroit became the prosperous axis mundi of the world vehicle industry. After World War II, Detroit seemed poised to continue growing. In 1947, there were 325 manufacturing plants in the city. Many of those factories were old so firms built modern ones in the suburbs. The federal government subsidized home building in this era so, at very low cost, whites but not African American could easily buy an attractive suburban home. The city's population began to fall in 1950. Retail trade followed the migration to the suburbs. By 1990, racial attitudes had changed and African Americans moved in great numbers from the city to the suburbs. By 2010, the city's population was only 38% of what it was in 1950. Detroit lost its tax base and, in 2012, entered bankruptcy.

Coming out of bankruptcy, the city had some funds to improve its very deficient city services. Major philanthropies began investing in improving the quality of life in Detroit. Then major employers including Quicken Loans, Little Caesars, General Motors, Ford and Fiat-Chrysler started making major investments that are bringing more jobs to the city. Downtown, Midtown and the east waterfront are prospering. The city's government began to address long standing problems including neighborhood deterioration.

The course focuses upon the history of Detroit emphasizing both the long history of labor-management and black-white conflicts and recent efforts to make Detroit a diverse, welcoming city with a higher quality of life and numerous job opportunities.

There are readings for each class meeting and you will be asked to write a short op-ed essay. For additional information: renf@umich.edu

647 Excel for PubPol 1.50
 26930 P RW LAB 001 TTH 1130-1250PM 3117 WEILL Worthington

This course is an accelerated introduction to a variety of Public Policy research and analysis-related skills in the Microsoft Excel environment. This course is designed to familiarize students with core skills in data access, manipulation, analysis, and presentation using Excel (and Excel-like alternatives). Spreadsheet programs remain an important part of professional life, and this course will prepare students for basic and intermediate use of aspects of the program in that setting.

This course covers data import, formatting, and management. Analysis topics include: producing tables (including summarization), visualizations, varieties of statistical analysis (ANOVA, regression, etc.). The course is graded credit/no credit (pass/fail), with weekly review ?tasks? in Excel. No prior knowledge of Excel is expected, but familiarity with basic concepts of statistics is recommended.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Even pre-pandemic, the U.S. faced a childcare crisis. Many parents need childcare while they work, insufficient licensed childcare programs exist for infants and toddlers, and such programs often cost too much for families. Childcare businesses also operate at thin margins and struggle to stay in business due to rising operational costs and challenges finding qualified staff. Multidisciplinary student teams will hear from leading experts and incorporate problem-solving tools and insights from law, social work, policy, business, and other fields to propose solutions to relevant stakeholders.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) March 14-28, 2022. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Diplomacy in Indo-Pacific
 Topics: U.S. Diplomacy in the Indo-Pacific

The course will examine the past, present, and future of diplomatic interactions between the United States and the other nations of the Indo-Pacific region, starting with the 1951 signing of the Treaty of San Francisco that ended the state of war in the Pacific after World War II. We will evaluate 1) how current diplomatic problems in the region developed historically, 2) how governments are seeking to use diplomacy, amid constraints, to address such problems today, and 3) what conditions might make it possible for future diplomats to address effectively at least some of the unfinished business from the Treaty of San Francisco in 1951. The course will focus on matters involving Mainland Southeast Asia, Maritime Southeast Asia, and the Korean Peninsula.

First, we will analyze diplomatic efforts to integrate Mainland Southeast Asia into a broader regional order. We will assess how problems involving Burma/Myanmar, including the Rohingya issue, hinder the integration of the Association of Southeast Asian Nations (ASEAN) today and consider what might be done in the future to address such problems.

Second, we will analyze efforts to manage tensions in Maritime Southeast Asia, centering on the South China Sea. We will examine current attempts to conclude an ASEAN-China South China Sea Code of Conduct and evaluate how claims and conduct issues might be settled in the future.

Third, we will discuss efforts to bring stability to the Korean Peninsula. We will examine the challenges the United States currently faces in resuming diplomacy with the Democratic People's Republic of Korea (DPRK) and consider what it might take in the future to resolve the DPRK nuclear issue diplomatically. Assignments will include policy papers, presentations, and participation in three in-class simulation exercises focusing on future diplomacy.

Racial Foundations of PubPol
 Topics: Racial Foundations of Public Policy

Racial Foundations of Public Policy is a Fall speaker series that focuses on the historical roots and impact of race in shaping public policy as both a disciplinary field and as a course of action. The series invites renowned scholars to deliver virtual presentations on the racial genealogy of public policy and the historical roots and contemporary currents of race in areas such as economic, housing, criminal justice, education, and immigration policy. Participants in the series will develop the skills needed to discuss, understand, and inquire about formal and informal racial structures and institutions in which policy is formulated, implemented, and experienced. Undergraduate and graduate students will have the option of receiving 1.5 credits for their participation in the series and the accompanying discussion-based course. The course will be offered in partnership with the Center for Racial Justice and will be led by the Center's Director, Dr. Celeste Watkins-Hayes.

35081 P RW LEC 004 TTH 4-520PM 1220 WEILL

US Foreign Policy Leadership
 Topics: U.S. Foreign Policy Leadership

Meets 08/29/22-10/14/22 (Drop/Add Deadline: 09/12/22)

Instructor: Stephen E. Biegun

This course will focus on understanding the modern conditions and challenges facing American foreign policy makers in the 21st century. The class will be taught from a practitioner's perspective and will seek to illustrate and assess the choices available to American leaders in the post-Cold War period when making foreign policy decisions on matters such as the Balkan wars after the collapse of Yugoslavia, NATO enlargement, the war in Afghanistan (and the larger Global War on Terrorism), the war in Iraq, the evolution of US policy toward China, and the Russian invasion of Ukraine. While class discussions will touch upon these issues and more, the method of teaching will be to deconstruct the tools and processes that are essential to the successful execution of American foreign policy in

the modern era.

Taught as a half semester course at the beginning of the Fall 2022 semester, the course will be broken down into seven weekly topics including sessions on US interests; American values; US foreign policy and national security tools and capabilities; the foreign policy interplay among US institutions and between the government and the public (to include Congress, the Executive Branch, the media, and public opinion - and politicians); when do we go to war, when don't we, and why; and we will be wrapping up the final two weeks with a focus on Grand Strategy.

In order to stir discussion and debate, in preparation for weekly classes we will read journal articles and book chapters presenting different perspectives (realism vs. idealism, values vs. interests, hard power vs. soft power, grand strategy pros and cons, etc.). The goal for this course is to focus not so much on teaching what to think about American foreign policy but rather to work with the students to develop a framework for how to listen, think and decide for themselves on our nation's contemporary foreign policy challenges and choices (all filtered through the lens of my own three decades of practical experience in and with government).

31178 P RW LEC 005 F 1130-220PM 1220 WEILL Vieux

Courts in Int'l Human Rights

Topics: The Role of Courts in International Human Rights

This course will explore the legal enforcement of those human rights that are fundamental and are the birthright of all human beings. We will review the international political and legal framework established over the past fifty years to protect human rights. We will home in on how effectively those universally-accepted legal norms are enforced. Conventional legal wisdom holds that where there is a right, there is a remedy. We will explore whether this is, indeed, true in the international human rights context. Specifically, the central inquiry of this course is what needs to be done to give legal effect to the moral norms that embody human rights and fundamental freedoms?

Of those institutions of government charged with the responsibility of enforcing these moral norms, we will explore the particular role of the courts - international and certain domestic ones. In the area of human rights and liberties, the United States has traditionally been a beacon of hope. And so, we will be particularly attentive to the special role of the Supreme Court of the United States in giving meaning to the words of the Constitution and laws that guarantee basic rights.

Africa in Context

Topics: Africa in Context: Diplomacy, Democracy and Development

The African continent is often presented by the media (and many others) as a land of war, famine, disease, corruption, and underdevelopment. This course will present Africa's contemporary reality - the positive as well as the negative - by examining major current issues after briefly surveying Africa's history, geography, societies, culture, and development beginning from the pre-colonial era up to today. Themes covered will include: political development; civil war and foreign intervention; democracy and governance (including corruption, fundamental freedoms and gender issues); economic development and poverty reduction (including the role played by humanitarian intervention and bilateral/multilateral aid agencies); terrorism; the environment; and public health. The course will also examine Africa's role in setting global policy priorities.

Types of Assignments:

Country Briefings: Desk Officers are the U.S. State Department's experts on specific countries and are available to respond to U.S. officials on issues concerning "their" country. Each of you will become a "desk officer" for a specific African country you wish to cover. You will stay up to date on events in your country, present recent developments in your country using various communication tools (oral, social media, written diplomatic cables).

Final Research Paper: You will write a final paper on the country you select and expand on a specific issue or sector (e.g., petroleum in Nigeria; education in Rwanda, etc.); or (2) discuss a thematic issue (e.g., conflict minerals, hunger, terrorism, refugees) either continent wide or specific to a country or sub-region (e.g., the problem of narco states in West Africa). As part of the grade, you will also make a five (5) minute oral presentation of your paper near the end of the term. After each presentation, the other students will be encouraged to ask questions.

Supreme Court

Topics: Supreme Court

How do the judges on the Supreme Court make their decisions? What were the real issues in cases such as Roe v. Wade, and is it possible that the Court would overturn this decision? How do judges in different eras decide cases differently? The Supreme Court is a unique contributor to public policy in the United States, and as such is a frequent topic of academic and media discussion and analysis. You may be well acquainted with how some previous decisions are interpreted from a political perspective. Yet you may have been left wondering, why certain cases were decided the way that they were.

In this course, we will explore some of the most influential and significant cases, and how they came to be decided. Beginning with Marbury v. Madison, every week or two, we will analyze a new case. For each case, in addition to understanding the reasoning of the Court, we will understand the background, the political or social context of the case, the legal arguments involved, how select subsequent cases have interpreted it, and how the case influenced public policy.

Legislation and Regulation

In the modern regulatory state, the rules that most profoundly shape private conduct come not from the common law but, instead, from legislatures and agencies. This class will explore the lawmaking function of these institutions and the virtues and vices of administrative governance. Among other things, the class will cover: the nature of the legislative process; statutory interpretation; the justifications for regulatory intervention; regulatory tools and strategies; the allocation of authority between legislatures and agencies; the varied forms of agency decision-making; and judicial review of agency decisions. In offering a survey of public law, the course will introduce students to the essentials of both statutory interpretation and administrative law.

763 Drgs, Crime & Terrorism 3.00

35184	P RW LEC 001	MW	4-520PM	1220 WEILL	Levitsky			
-------	--------------	----	---------	------------	----------	--	--	--

Students will explore the global issues of illegal drugs, and international drug trafficking, crime and terrorism. Course content emphasizes the study of organizations and networks, policy formulation and implementation, national and international approaches and programs, and the international legal and organizational framework to deal with these issues. The instructor will devote attention to the similarities and links between illegal drugs, crime and terrorism. Students will analyze the conflict between vigorous pursuit of solutions to these issues and other foreign and public policy objectives and how this affects the national interests and foreign policies of the nations and organizations involved. Students will assess lines of action that national and international policy makers might initiate to find solutions to these problems. The instructor will place emphasis on the tools and skills needed for policy analysis and the formulation of effective recommendations for decision making. Case studies, group exercises and simulations will be used throughout the course and there will be a number of policy writing assignments.

Assignments may include:

[1] Case Policy Memoranda. Students should read all seven cases for class discussion. Students will write a one-page policy paper on four of the seven cases listed above. All students will write a paper on the first case and then choose to write on either the Peru/Arciniega or the Human Trafficking case. You will then choose two of the next four cases on terrorism on which to write a paper.

[2] Group memorandum and oral presentation on the drug policies of the US, other countries and NGOs. Students will be divided into groups. Each group will be assigned a topic. Each group will research the issues involved and use the information to write a policy memorandum of up to five pages along with a one-page Principal Points summary sheet. Each group will make an oral presentation accompanied by visual displays as appropriate, followed by discussion with a designated critique group.

[3] Students will participate in a classroom bioterrorism simulation, taking the roles of U.S. government officials grouped into agencies or organizations.

[4] Each student will select a topic for a policy memorandum (or a policy paper) after consultation with and approval by the instructor. The paper should cover one or more of the three transnational issues studied: drugs, crime, and terrorism. The paper should be up to 10 pages in length.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Even pre-pandemic, the U.S. faced a childcare crisis. Many parents need childcare while they work, insufficient licensed childcare programs exist for infants and toddlers, and such programs often cost too much for families. Childcare businesses also operate at thin margins and struggle to stay in business due to rising operational costs and challenges finding qualified staff. Multidisciplinary student teams will hear from leading experts and incorporate problem-solving tools and insights from law, social work, policy, business, and other fields to propose solutions to relevant stakeholders.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) March 14-28, 2022. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

34861	PD	LAB 002	W	315-630PM	250 HUTCH	Guenther, Carr, Hess, Dickinson		
-------	----	---------	---	-----------	-----------	---------------------------------	--	--

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Environmental, Social and Governance (ESG) policies have taken center stage in the investment world, but requirements of investor ESG policies vary widely, and they may be challenging for investee companies to implement. In this course, multi-disciplinary student teams will work with faculty and subject matter experts to learn about ESG policies, how to assess their impact, and if there are ways to harmonize such policies. Students will leverage problem-solving skills and insights from fields including law, business, and policy to develop

innovative solutions to a challenge in this area.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) March 14-28, 2022. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

34869 PD LAB 003 W 315-630PM 0225 JEFFRIES CdeBaca
 This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The built environment bears the stamp of slavery supported by new forms of forced labor. Starting with an understanding that architecture isn't value-neutral and that racism intersects with urban planning, land use, and environmental problems, this class will confront such issues through a U-M/Yale partnership. Students will create a framework for the National Slavery Memorial in Washington, D.C., as multidisciplinary teams from law, planning, history, and other fields learn problem-solving skills, conduct research, and approach the politics, ethics, and mechanics of construction holistically.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) March 14-28, 2022. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

34877 PD LAB 004 TH 315-630PM 218 HUTCH Khanna, Bauguess
 This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The rise of the cryptoeconomy has implications for national security, data privacy, transaction costs, Web 3.0, and much more. In this class, multidisciplinary student teams will learn about the growth of the cryptoeconomy, varieties of cryptoassets, and an array of potential uses of such assets from experts in law, business, policy, information, and more. Students will apply research insights and problem-solving tools to develop a solution focused on regulating the cryptoeconomy.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) March 14-28, 2022. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.
