Connected Vehicles Stdzn Diff							
This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). In the realm of connected and automated vehicles (CAVs), there are trade-offs between standardization, which enhances compatibility and interoperability, and differentiation. Students will consider which CAV features should be standardized (or differentiated), how quickly standardization should be pursued, and							

what role regulation should play in standardization. Student teams will incorporate ideas from law, engineering, information, business, and other fields to develop an innovative tool.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Campus Sex. Misconduct Prev.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Campus sexual misconduct affects many students in the U.S., with health, social, economic, and academic consequences. Universities struggle to fashion effective policies and other responses in the face of external political, legal, and social pressure. In this class, multidisciplinary teams of students will explore solutions to campus sexual misconduct, drawing on knowledge and expertise from law, nursing, public policy, social work, public health, sociology, education, organizational studies, and other disciplines to develop a novel solution to the problem.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Info Privacy, Survl. Exposure

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Today's information and communication technologies create opportunities for surveillance, tracking, and privacy infringements. Students will learn about privacy risks that a variety of exposure-sensitive populations face, including marginalized groups, immigrants, journalists, abuse survivors, and children. Multidisciplinary student teams will leverage insights from design thinking, law, information, public policy, and other disciplines to develop novel privacy solutions for such susceptible groups.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Hum Rghts Mineral Supply Chain

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The extraction of minerals used to manufacture automobile components, including electric vehicle batteries, comes at a high cost. Multidisciplinary teams of students will study the human rights implications of this supply chain, and their research will be informed by auto industry, NGO, and stakeholder perspectives. Students will incorporate insights from international law, business, engineering, environmental sciences, technology, and other fields to develop a solution for industry to implement.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Challenges Deliver MI Soc Svcs

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The federal government funds many crucial social services for the poor. However, individual states -- which are rarely the focus of policy debates about social services -- are usually responsible for overseeing the provision of those services. This course will focus on emerging challenges to the delivery of social services in Michigan, including Medicaid, food stamps, and TANF. Working closely with officials from the Michigan Department of Health and Human Services, students will devise potential solutions to problems with the

Chan, Lahiri

It is CRITICAL that students attend class from the beginning. Each laboratory session provides hands-on instruction and requires reserved time on a particular imaging system, making attendance for each class mandatory. If traveling during the winter break, plan ahead and allow sufficient time in order to be present at the start of the Winter Term.

First four classes will be held in 2185 LBME, the following locations will be provided by instructor.

17453	PD	LAB	002	W	130-530PM	ARR	Fowlkes, Batra

Data Analysis&Visualization							
An introduction to data analysis and visualization for climate and space scientists and engineers. This is an upper-level undergraduate course focusing on fundamental data science, and visualization techniques, using Python with examples from space physics and climate science. No experience with Python is required but familiarity with programming is recommended.							
26938	P LEC 004	MWF	130-230PM	2238 CSR			Ruf
Remote Sensing							
Weather and Reporting covers:							
Weather							
Weather analysis & forecasting							
Communicating weather to any audience							
Blurb							
"Andrew Humphrey, a CLASP alum and WDIV-TV Meteorologist and Reporter, is teaching an exciting new course this Winter 2019 semester. Weather and Reporting is a course designed to give students a basic understanding of weather and weathercasting to ensure accurate and responsible communication about weather phenomena to any audience.							
If you are interested, please consider registering for this course ASAP. Contact Andrew Humphrey at 1 (313) 410-5232 (m) or weather@umich.edu.							
Course Description

CEE 481 lecture should be taken by undergraduate students with no intention of counting this class towards a graduate program. No graduate credit will be granted for CEE 481.

CEE 581 - both lecture and lab - should be taken by students intending to use the class for graduate credit, including SUGS students.

Subsurface Energy Systems

This course is designed to introduce students to engineered subsurface systems with an emphasis on technologies relevant to the energy sector, including unconventional oil and gas production and geologic carbon storage. Students will be introduced to the fundamentals of reservoir geology, flow through porous and fractured media, fluid-rock interactions, and geochemical alterations resulting from fluid injection and extraction. Course deliverables will include a design project using reactive transport modeling to study fluid fate and transport within the context of a particular engineered subsurface system. The goal of this course is to help students gain a broad understanding of subsurface energy systems and learn to view these complex topics through a lens that also assesses the environmental sustainability of emerging energy technologies.

33815 P W LEC 067 MW 230-4PM 2147 GGBL Filipov

Deployable & Reconfig Struct

This course covers the theory, analysis, and design of deployable and reconfigurable structures. A review of existing and emerging structural systems will cover bar linkages, pantographs (scissor mechanisms), origami structures, and bi/multi-stable units. Conceptual topics will include deployment kinematics, stability, geometric constraints, mechanical behaviors, energy formulations, and matrix analysis of the systems. Practical areas discussed in the course will include structural design, material systems, actuation technologies, and fabrication methods. The course will include a student project to explore engineering applications of the structures in architecture, aerospace, robotics, and beyond.

Urban Environmental Systems Urban Environmental Systems: Project-Based Experiences for Students is a multi-disciplinary, project-based course that focuses on developing solutions to water-based challenges in cities. We include information on both domestic and international cities, and specifically highlight the opportunities and challenges in lower resource settings. A case study is centered around Addis Ababa, Ethiopia. Each class will be divided between the discussion of content material (first class hour) and group work (second class hour) related to on-going or emerging projects in Ethiopia and elsewhere.

Robot Modeling and Control

Kinematics and dynamics of robots; methods of control; force control; robust and adaptive control; feedback linearization; Lyapunov design methods; passivity and network control; control of multiple and redundant robots.

Upon successful completion of this course, students will:

1. have a basic understanding of the kinematics of robot manipulators and mobile robots.
2. understand the dynamics of Lagrangian mechanical systems and be able to compute the dynamic equations of motion of any robot manipulator.
3. have a basic understanding of nonlinear control methods such as feedback linearization, passivity-based, robust, and adaptive control, and be able to analyze the stability and tracking performance of closed loop systems using Lyapunov theory.
4. be able to model, design, and simulate nonlinear controllers for manipulators and mobile robots.

Bioinspiraton

Nature is full of biological organisms that are specialized for specific tasks. By examining the process by which natural selection shapes biological forms, we can learn from nature to inspire technological design. This course will explore biological strategies for swimming, flying, terrestrial locomotion, adhesion, sensing, and construction. This will be an interdisciplinary endeavor with team-based robotic design projects.

Electrical Engr & Computer Sci

Electrical Engineering And Computer Science (EECS)

IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, THE ELECTRICAL ENGINEERING AND COMPUTER SCIENCE DEPARTMENT MAY GIVE AWAY A STUDENT'S PLACE IN A CLASS IF THEY DO NOT ATTEND THE FIRST WEEK OF LECTURES AND LABS/DISCUSSIONS (AS APPROPRIATE) FOR ANY EECS COURSES.

AT THE SAME TIME, THE EECS DEPARTMENT IS NOT OBLIGATED TO WITHDRAW STUDENTS OFFICIALLY FROM THE COURSE, EVEN THOUGH THE STUDENT HAS BEEN INFORMED THAT HIS/HER PLACE IN A COURSE HAS BEEN TAKEN AWAY. STUDENTS ARE RESPONSIBLE FOR THE ACCURACY OF THEIR SCHEDULES AND MUST BE SURE THAT ALL DROPS ARE PROCESSED THROUGH THE REGISTRATION SYSTEM DURING THE NORMAL DROP/ADD PERIOD.

Bus Entr in Thought & Action

Sophomore standing and above. Non BBA Students. This course is designed to introduce non-business students to core business concepts and to learn how to apply these concepts through the lens of an entrepreneur. This course is designed for students in all schools and colleges, with the expectation that students have an understanding of basic algebra.

25279 A LEC 005 W 3-4PM 165 CHRYS Root

Intro to Entrepreneurial Des

* Students from ALL schools and colleges may take this course.

* More information about this and other ENTR courses can be found at cfe.umich.edu/courses

* Questions as to whether this course will count toward your degree or the Entrepreneurship minor should be directed to your academic advisor(s).

* YOU CANNOT DIRECTLY ENROLL IN THIS LECTURE. You must pick a lab first (ENTR 390.006 - 010).

250 **Creative Process** 4.00 75.00
 24578 AR LEC 100 W 5-6PM 2104 A&AB Rush, AbuSeir, Moldwin, Chavasse, Tobier

In this course sponsored by ArtsEngine, students explore the creative process through a structured sequence of exercises in four studio modules: sound, motion, visual images/objects, and verbal/symbolic language. Faculty from Art & Design (Andrew Thompson); Music, Theatre & Dance (Amy Chavasse); Architecture (Gregory Saldana); and

CAT#	Course Title	CR	PREREQ	LAB FEE			
Class #	CODE CMP SEC	DAYS	TIME	LOCATION	INSTRUCTOR		

Engineering (Jeremy Bond) introduce a variety of creative strategies for generating problem solving ideas through hands-on projects. Weekly colloquia (Stephen Rush), discussions, and readings supplement projects. Grading is based upon attendance, class participation, a journal, four mini-projects, evidence of intellectual and creative process development, and a final culminating project. This course is appropriate for UM undergraduate students at all levels and in all disciplines. It is a fast paced, information-rich educational experience, offering insights that will make creativity and innovation an integral part of life and work.

STUDENTS ELECTING LAB (102-105) WILL BE AUTO-ENROLLED IN LEC 100 & DIS 101 (meditation session, which is optional).

Engagement in Research Process

Engagement in the Research Process - a course aimed at directing incoming students to develop a coherent idea into a more completed product. The product could take the form of a proposal, white paper, or review paper of interest to each student. Students will be encouraged to bring individual ideas worthy of further development or as part of their engagement in their individual research groups.

31698 P LEC 043 TTH 430-6PM 1024 FXB Tuteja

Surface and Interfacial Engr

Surface and Interfacial Engineering - This course will present and analyze the surfaces of a wide range of biological species, such as lotus leaves, rose petals, water striders, arctic spring tails, sharks, desert beetles, and pitcher plant leaves. We will understand the unique surface functionality associated with each of these biological species by examining the roles of surface composition and surface texture. Subsequently, we will discuss how this fundamental understanding can be used to engineer bio-inspired surfaces of the future for a range of applications such as stain resistant fabrics, micro-robots, anti-fingerprint displays, drag reduction for ships,

Cancer Bioengineering						
Cancer Bioengineering - Cancer refers to a collection of heterogeneous but related diseases recognized primarily by uncontrolled cellular proliferation, invasion, and spread into surrounding tissues. This course is designed to be an introduction to cancer biology from an engineering and systems perspective. It will provide a basic understanding of cancer biology including (but not limited to) cancer genetics, signal transduction, metabolism, angiogenesis, tumor microenvironment and the metastatic cascade, and will discuss how new technologies and engineering approaches improve our understanding of the tumorigenesis process and our ability to diagnose or treat cancer. The course is designed primarily for engineering graduate students and senior undergraduate students. It will cover both basic concepts and engineering approaches as applied to cancer biology. This is a highly interdisciplinary field where knowledge from various disciplines needs to be presented and integrated. It will be divided into three sections: (1) biological concepts and cancer biology, (2) engineering and systems approaches to the study of these concepts, and (3) engineering solutions to cancer diagnostics and treatment.						
31697	P LEC 058	TTH	230-4PM	ARR	Heron	
Fundamentals of Quantum Matrls						
Fundamentals of Quantum Materials - This class will serve as an introduction to recent materials and topics of interest in the field. The class focuses on synthesis and characterization of quantum materials as well as the control and manipulation of quantum materials for applications. Topical systems are those with electronic correlations and systems with topological order, particularly systems with ferroic order and spin textures. The course will focus on magnetism, frustration, non-trivial electronic and magnetic structures, multiferroics, phase transitions, metal-insulator transitions, spin-orbit coupling and Hall effects, and interfaces. The course will also impart practical knowledge through the discussion of: 1) synthesis methods for the growth of bulk materials, thin film materials, controlled interfaces, and nanostructures and 2) characterization methodologies such as electron microscopy, optical spectroscopy, charge and spin transport.

Data-Driven Matls Design & Gen						
Data-Driven Materials Design and Genomics						
The Materials Genome Initiative (MGI) is an ongoing U.S. initiative to discover, manufacture, and deploy advanced materials twice as fast, at a fraction of the cost. Many MGI efforts are enabled by large-scale materials informatics employing methods such as high-throughput computing, data-driven materials optimization, and knowledge discovery in materials databases. In this course, students will learn how to use Python to access big-data from existing materials databases, and how to design and execute a data-driven research project in MSE. State-of-the-art methods in statistical analysis, supervised and unsupervised machine-learning, and data visualization will be covered, with computational labs to teach proficiency in these techniques. We will review examples of MGI efforts in the design of novel lithium ion batteries and structural alloys. A capstone project will provide an opportunity for students to design and propose new MGI initiatives.

Space Nuclear Power&Propulsion							
This course focuses on the design of low-noise analog circuits for the readout of signals from radiation sensors. The student will learn the fundamentals and state-of-the-art techniques for low-noise amplification and signal processing. A project will be assigned where the student will design a low-noise circuit from concept to transistor-level. Open to students in all levels in NERS, EECS, and Physics. Prior coursework in Analog circuits is recommended.

Connected Vehicles Stdzn Diff

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). In the realm of connected and automated vehicles (CAVs), there are trade-offs between standardization, which enhances compatibility and interoperability, and differentiation. Students will consider which CAV features should be standardized (or differentiated), how quickly standardization should be pursued, and what role regulation should play in standardization. Student teams will incorporate ideas from law, engineering, information, business, and other fields to develop an innovative tool.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system

Campus Sex. Misconduct Prev.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Campus sexual misconduct affects many students in the U.S., with health, social, economic, and academic consequences. Universities struggle to fashion effective policies and other responses in the face of external political, legal, and social pressure. In this class, multidisciplinary teams of students will explore solutions to campus sexual misconduct, drawing on knowledge and expertise from law, nursing, public policy, social work, public health, sociology, education, organizational studies, and other disciplines to develop a novel solution to the problem.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Info Privacy, Survl. Exposure

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Today's information and communication technologies create opportunities for surveillance, tracking, and privacy infringements. Students will learn about privacy risks that a variety of exposure-sensitive populations face, including marginalized groups, immigrants, journalists, abuse survivors, and children. Multidisciplinary student teams will leverage insights from design thinking, law, information, public policy, and other disciplines to develop novel privacy solutions for such susceptible groups.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Hum Rghts Mineral Supply Chain

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The extraction of minerals used to manufacture automobile components, including electric vehicle batteries, comes at a high cost. Multidisciplinary teams of students will study the human rights implications of this supply chain, and their research will be informed by auto industry, NGO, and stakeholder perspectives. Students will incorporate insights from international law, business, engineering, environmental sciences, technology, and other fields to develop a solution for industry to implement.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Challenges Deliver MI Soc Svcs

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The federal government funds many crucial social services for the poor. However, individual states -- which are rarely the focus of policy debates about social services -- are usually responsible for overseeing the provision of those services. This course will focus on emerging challenges to the delivery of social services in Michigan, including Medicaid, food stamps, and TANF. Working closely with officials from the Michigan Department of Health and Human Services, students will devise potential solutions to problems with the administration of state benefits for vulnerable populations.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking

260 Intelligent Machines

This is the first of the SI 3-course entrepreneurship sequence (SI 260, SI 360, SI 460). It is recommended that you take these courses in this order.

ATTN BSI Students: SI 260 is a lower-level elective course and will not count toward the 45-credit SI degree requirements.

Students should not take this course if they took SI 206 prior to fall 2016. It is CRITICAL that students attend classes from the beginning of the term. Even though students may be registered officially for a course, the instructor may give away places in a course if students do not attend the first day of class. Students MUST attend the discussion for which they are enrolled.

Connected Vehicles Stdzn Diff

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). In the realm of connected and automated vehicles (CAVs), there are trade-offs between standardization, which enhances compatibility and interoperability, and differentiation. Students will consider which CAV features should be standardized (or differentiated), how quickly standardization should be pursued, and what role regulation should play in standardization. Student teams will incorporate ideas from law, engineering, information, business, and other fields to develop an innovative tool.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Campus Sex. Misconduct Prev.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Campus sexual misconduct affects many students in the U.S., with health, social, economic, and academic consequences. Universities struggle to fashion effective policies and other responses in the face of external political, legal, and social pressure. In this class, multidisciplinary teams of students will explore solutions to campus sexual misconduct, drawing on knowledge and expertise from law, nursing, public policy, social work, public health, sociology, education, organizational studies, and other disciplines to develop a novel solution to the problem.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Info Privacy, Survl. Exposure

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Today's information and communication technologies create opportunities for surveillance, tracking, and privacy infringements. Students will learn about privacy risks that a variety of exposure-sensitive populations face, including marginalized groups, immigrants, journalists, abuse survivors, and children. Multidisciplinary student teams will leverage insights from design thinking, law, information, public policy, and other disciplines to develop novel privacy solutions for such susceptible groups.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Hum Rghts Mineral Supply Chain

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The extraction of minerals used to manufacture automobile components, including electric vehicle batteries, comes at a high cost. Multidisciplinary teams of students will study the human rights implications of this supply chain, and their research will be informed by auto industry, NGO, and stakeholder perspectives. Students will incorporate insights from international law, business, engineering, environmental sciences, technology, and other fields to develop a solution for industry to implement.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Challenges Deliver MI Soc Svcs

CAT#	Course Title	CR	PREREQ	LAB FEE
Class #	CODE CMP SEC DAYS	TIME	LOCATION	INSTRUCTOR

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The federal government funds many crucial social services for the poor. However, individual states -- which are rarely the focus of policy debates about social services -- are usually responsible for overseeing the provision of those services. This course will focus on emerging challenges to the delivery of social services in Michigan, including Medicaid, food stamps, and TANF. Working closely with officials from the Michigan Department of Health and Human Services, students will devise potential solutions to problems with the administration of state benefits for vulnerable populations.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Physical Education (PHYSED)							
140	Beginning Swim				1.00		
13541	PD W LAB 001	MW	7-8PM	ARR	Winkelseth		
Class will be held at CCRB in the Bell Pool. Students must register through the Kinesiology Community Programs (KCP) website (kines.umich.edu/community-programs) or in Rm 3064 CCRB and request an override. To drop/request override, contact kebwink@umich.edu . Little or no swim experience? This course is for you. You'll start with entering the pool and getting comfortable. You'll progress to front crawl, back crawl, elementary backstroke, breaststroke, sidestroke, and butterfly. And you'll learn jumping in, treading, and water safety. Goal: one length of the pool. Goggles recommended. Attendance in at least one of the first two classes is mandatory for evaluation or you may lose your spot in class to those on a waitlist. No enrollments are accepted after the class meets a third time.							
30499	PD W LAB 002	TTH	7-8PM	ARR	Winkelseth		
Class will be held at CCRB in the Bell Pool. 141	Begin Swim II				1.00	ADVISORY	
14638	PD W LAB 001	MW	8-9PM	ARR	Winkelseth		
Class will be held at CCRB in the Bell Pool. Students must register through the Kinesiology Community Programs (KCP) website (kines.umich.edu/community-programs) or in Rm 3064 CCRB and request an override. To drop/request override, contact kebwink@umich.edu . Beginning Swim II is for students who are already comfortable in the water and who can swim across the pool (the short way). The course works on building endurance and improving technique in freestyle, backstroke, elementary backstroke, breaststroke, sidestroke, butterfly, diving and treading water as well as water safety. Flip turns and other activities will be offered as skills advance. Goggles recommended. Attendance in at least one of the first two classes is mandatory for evaluation or you may lose your spot in class to those on a waitlist. No enrollments are accepted after the class meets a third time.

435 Sport&the Consumer 3.00 ADVISORY

32448 P RW LEC 001 MW 1130-1PM 1100 OBL Kwak

Students enrolled in more than five upper division SM courses will be disenrolled from one of the excess courses.

We are all consumers of sport to some extent?as a participant, spectator, and/or viewer. This course focuses on various factors (e.g., situational, cultural, personal, psychological) that affect sport consumer behavior and decision making process. In particular, this course will discuss various theories and concepts that have been documented in psychology, marketing, communication, and sport management, and will connect them to reflect current marketing trends and challenges in the sport setting. A major project in this course is to conduct an empirical study that applies one of theories/concepts discussed in class to deepen their learning and analytical skills in consumer behavior. Readings will be assigned. No textbook required.

436 Race Rel,Cul Images 3.00 ADVISORY

Students enrolled in more than five upper division SM courses will be disenrolled from one of the excess courses.								
Today's brands have transcended beyond mere marks of ownership, which aid commercial exchange, to become full-fledged cultural producers. This transcendence was no act of serendipity or result of happenstance. Rather, marketers have committed themselves to building strong brands that have relevance and global reach. Understanding the strategic decisions that go into building such brands will arm future marketers with the skills they need to develop, manage, and grow these brands themselves. This course, therefore, is designed to explore the building-blocks of branding and how marketers communicate brand ideas through effective advertising campaigns and powerful creative ideas. Led by Prof Marcus Collins- award-winning advertiser and Adage '40 Under 40' recipient, the course will leverage his experience working on blue-chip brands (Apple, Nike, AB-InBev, Beyonce) and major sport teams (Brooklyn Nets, LA Clippers, Detroit Pistons) to unpack the characteristics of what makes brands strong; how to build one; how to extend it and leverage it; how to value it, guard it and grow it; and lastly, how to impute these characteristics through compelling advertising.

Literature, Sci, and the Arts

NOTE--IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, DEPARTMENTS MAY GIVE AWAY STUDENT'S PLACES IN A COURSE IF THEY DO NOT ATTEND:
 ---THE FIRST MEETING OF BIOLOGY, CHEMISTRY, AND PHYSICS LABORATORIES;
 ---THE FIRST MEETINGS OF HISTORY 396 AND 397;
 ---EITHER OF THE FIRST TWO MEETINGS OF ENGLISH COURSES;
 ---EITHER OF THE FIRST TWO MEETINGS OF ANY COURSE OFFERED BY THE DEPARTMENT OF ROMANCE LANGUAGES;
 ---THE FIRST TWO MEETINGS OF COURSES IN OTHER DEPARTMENTS.

AT THE SAME TIME, DEPARTMENTS ARE NOT OBLIGATED TO WITHDRAW STUDENTS OFFICIALLY FROM THE COURSE, EVEN THOUGH THE STUDENT HAS BEEN INFORMED THAT HIS/HER PLACE IN A COURSE HAS BEEN TAKEN AWAY. STUDENTS ARE RESPONSIBLE FOR THE ACCURACY OF THEIR SCHEDULES AND MUST BE SURE THAT ALL DROPS ARE PROCESSED THROUGH THE REGISTRATION SYSTEM DURING THE NORMAL DROP/ADD PERIOD.

English Language Institute

English Language Institute (ELI)

ELI courses fall into three categories:

1. English for Academic Purposes courses for graduate students;
2. Language and teacher training courses for international GSIs;
3. Teacher training courses for students planning to teach ESL in local communities or abroad.

For assistance in choosing an appropriate course, please go to the ELI Academic Advising website:
<http://bit.ly/eliadvising> or e-mail: eliadvisor@umich.edu to make an appointment to speak with an advisor.

Connected Vehicles Stdzn Diff							
This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). In the realm of connected and automated vehicles (CAVs), there are trade-offs between standardization, which enhances compatibility and interoperability, and differentiation. Students will consider which CAV features should be standardized (or differentiated), how quickly standardization should be pursued, and what role regulation should play in standardization. Student teams will incorporate ideas from law, engineering, information, business, and other fields to develop an innovative tool.							
This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.							
Non-law graduate/professional students may apply for the course using the PSI application system (https://problemsolving.law.umich.edu/) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu .

Campus Sex. Misconduct Prev.							
This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Campus sexual misconduct affects many students in the U.S., with health, social, economic, and academic consequences. Universities struggle to fashion effective policies and other responses in the face of external political, legal, and social pressure. In this class, multidisciplinary teams of students will explore solutions to campus sexual misconduct, drawing on knowledge and expertise from law, nursing, public policy, social work, public health, sociology, education, organizational studies, and other disciplines to develop a novel solution to the problem.							
This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.							
Non-law graduate/professional students may apply for the course using the PSI application system (https://problemsolving.law.umich.edu/) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu .

Info Privacy, Survl. Exposure							
This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Today's information and communication technologies create opportunities for surveillance, tracking, and privacy infringements. Students will learn about privacy risks that a variety of exposure-sensitive populations face, including marginalized groups, immigrants, journalists, abuse survivors, and children. Multidisciplinary student teams will leverage insights from design thinking, law, information, public policy, and other disciplines to develop novel privacy solutions for such susceptible groups.							
This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.							
Non-law graduate/professional students may apply for the course using the PSI application system (https://problemsolving.law.umich.edu/) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu .

Hum Rghts Mineral Supply Chain							
This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The extraction of minerals used to manufacture automobile components, including electric vehicle							

batteries, comes at a high cost. Multidisciplinary teams of students will study the human rights implications of this supply chain, and their research will be informed by auto industry, NGO, and stakeholder perspectives. Students will incorporate insights from international law, business, engineering, environmental sciences, technology, and other fields to develop a solution for industry to implement.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Challenges Deliver MI Soc Svcs

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The federal government funds many crucial social services for the poor. However, individual states -- which are rarely the focus of policy debates about social services -- are usually responsible for overseeing the provision of those services. This course will focus on emerging challenges to the delivery of social services in Michigan, including Medicaid, food stamps, and TANF. Working closely with officials from the Michigan Department of Health and Human Services, students will devise potential solutions to problems with the administration of state benefits for vulnerable populations.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

History Department

History (HISTORY)

--IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, THE DEPARTMENT MAY GIVE AWAY PLACES IN A COURSE IF STUDENTS DO NOT ATTEND THE FIRST TWO COURSE MEETINGS.

--ALL STUDENTS MUST TAKE ACTION THROUGH THE REGISTRATION PROCESS TO MAKE SURE THAT THEIR OFFICIAL COURSE SCHEDULES MATCH THE COURSES THEY ARE ATTENDING.

--100 THRU 500 LEVEL 4 CREDIT HOUR COURSES ARE 4 CREDIT HOURS FOR UNDERGRADUATES ONLY.

--SURVEY AND INTRODUCTORY COURSES ARE FOR FRESHMEN AND SOPHOMORES.

--SURVEY COURSES REQUIRE BOTH LECTURE AND DISCUSSION SECTIONS. DISCUSSION SECTIONS DO NOT MEET UNTIL AFTER FIRST LECTURE.

Introduction to Intl Studies

This section is reserved for Honors students only. Please note that there is no time conflict between the lecture and discussion. Discussion sections for this class will meet approximately 8 times during the Winter 2020 term, instead of the Thursday lecture. On days when discussion is held, lecture will not be. Dates will be noted on the Winter 2020 syllabus. Questions regarding this class should be directed to is-advising@umich.edu.

Mathematics Department

Mathematics (MATH)

---MATH DEPARTMENT POLICY REQUIRES THAT STUDENTS ATTEND BOTH OF THE FIRST TWO CLASS MEETINGS (OR NOTIFY THE INSTRUCTOR IN ADVANCE OF THEIR ABSENCE) OR THEY MAY BE DROPPED FROM THE CLASS.
 ---ALL STUDENTS MUST TAKE ACTION THROUGH THE REGISTRATION SYSTEM TO MAKE SURE THAT THEIR OFFICIAL SCHEDULE OF COURSES MATCHES THE COURSES THEY ARE ATTENDING.

---MATHEMATICS DEPARTMENT POLICY LIMITS STUDENTS TO A MAXIMUM OF 4 CREDITS FOR COURSES NUMBERED BELOW 112.

285	Honor Multiv& Vector				4.00 ADVISORY
25097	P W LEC 002	MWF	830-10AM	2437 MH	Guo
Please add your name to the waitlist if you're interested in this section. Enrollment priority is given to students who have taken Math 186 or Math 176. Incoming freshmen must speak with an honors math advisor for permission into Math 285.					
286	Hnr Diff Equations				3.00 ADVISORY, ENFORCED
11660	P RW LEC 001	MWF	10-11AM	4153 USB	Barannyk
Students wishing to take this course should add themselves to the waitlist. Completion of 285 or permission of honors advisor/instructor required.					
289	Problem Seminar				1.00
25463	P W SEM 001	W	4-5PM	1866 EH	Derksen
296	Honors Math II				4.00 ADVISORY
11661	P W LEC 001	MWF	230-4PM	3401 MH	Koch
Students in Math 295 (Fall term) should add to the wait list in order to receive an override. Others require permission of an Honors advisor.					
297	Intro to Analysis				4.00 ENFORCED
27541	P RW LEC 001	MWF	1-230PM	3866 EH	Schneider
Students interested in taking this course should add themselves to the waitlist and email the instructor to discuss enrollment possibilities. Students will be expected to have done extremely well in Math 217.					
310	Chance and Choice				3.00 ADVISORY
19545	P W LEC 001	MW	1-230PM	4096 EH	Dunworth
Explorations in Randomness					
Prerequisites- Sophomore standing and one previous university math course.					
Permission through wait list only. Students are welcome to email the instructor directly to demonstrate interest in the course.					
316	Differential Equatn				3.00 ADVISORY, ENFORCED
20062	P RW LEC 001	MWF	1-2PM	3330 MH	Silverman

Sweetland Center for Writing

Gayle Morris Sweetland Center for Writing (WRITING)

100 Practice of Writing 3.00
 18690 PI W REC 001 MW 2-3PM 1155 NQ Babcock
 <P>Writing 100 is designed to help students of all levels improve their writing, but is best suited to those who have yet to fulfill the First-Year Writing Requirement. Upper-level students should have a compelling academic reason for enrolling in Writing 100.</P>

<P>Normal waitlist procedures apply for students who attend the first two classes. Students who wish to join Writing 100 after the first two class sessions must email the instructor to set up a meeting to discuss enrolling. Based on this discussion, the student and instructor will then make a determination on whether or not it is appropriate for the student to enroll.</P>

200 Dig Media Writing 3.00

Statistics (STATS)

---IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, THE DEPARTMENT MAY GIVE AWAY PLACES IN A COURSE IF STUDENTS DO NOT ATTEND THE FIRST TWO COURSE MEETINGS.

---ALL STUDENTS MUST TAKE ACTION THROUGH THE REGISTRATION SYSTEM TO MAKE SURE THAT THEIR OFFICIAL SCHEDULE OF COURSES MATCHES THE COURSES THEY ARE ATTENDING.

This lab is a CSP lab. CSP sections are scheduled for more hours per week than a routine section of the same course. Some of that time is devoted to workshop activities, e.g., problem solving, practice tests, review of assignments and instruction in learning skills. There is also provision for more individual instruction in the form of additional office hours, instructor conferences, appointments with a Course Assistant, etc.

Please note that if you have not met the required or advisory prerequisite for this course you may still be able to register, please email the course director for an override.								
Human Neuroanatomy --- This course focuses on key structural aspects of the human brain with an emphasis on function. We will make heavy use of clinical case studies largely in small working groups to uncover how and why symptoms linked to neurological disorders exist. For these case studies, 3-dimensional visualization tools and hands-on examination and limited dissections of human brains will be used to highlight the elegant anatomical relationships of sensory, motor, emotional, and cognitive systems.

West African
Course Description:

In this course, we will uncover the history, context, and techniques of several West-African rhythms and dances that derive from the African civilizations associated with the people of modern-day Ghana, Guinea, Mali, and Senegal. Throughout the semester we will focus on the polyrhythmic nature of the dances, songs, rhythms, folklore traditions, customs, and music. Together as we journey throughout the entirety of this course, we will grow to develop a deeper understanding and appreciation of West-African music, dance, and culture.

Objectives and Learning Outcomes:

Students will gain integrated skills in West-African music, dance performance, and creativity through an influential and holistic learning experience.
Students will learn the importance of this dance genre as an ancient communication system rooted in the relationship between the drummer and the dancer.
Students will learn the basic fundamental techniques of West-African music and dance forms.
Students will acquire analytical, interpretative, evaluative, appreciative, and critical skills relating to West-African music, dance, and culture.
Students will develop collaborative skills needed for teamwork, community building, and social harmony.

20479	P W LAB 006	MW	5-6PM	DANCE STUDIO A	Rosario		
-------	-------------	----	-------	----------------	---------	--	--

Hip Hop

This is a beginning level dance course that will introduce students to the street dance style of hip-hop. This course will focus on the performance and exhibition aspects of the technique. We will touch on the history of hip-hop culture and discuss influences within the genre of music and dance. Freestyle and creativity are fundamental parts of hip-hop. Dancers will be asked to practice freestyling and to exercise their creativity as they learn choreography.

Intro to Funk Styles

Funk styles in street dance culture was inspired by funk music, a genre developed by James Brown and George Clinton in the 1960s. This class will introduce students to West Coast Funk Styles including Boogaloo, Locking, Popping, Waving, Gliding, Strobing, Animation, Robotting, and Tutting. Through videos, readings, and physical practice,

students will learn the history and movement of various funk styles to understand their impact on popular dance culture.

20482 P W LAB 009 TTH 9-10AM DANCE STUDIO A Peters

Movement Improvisation

Movement Improvisation is an introduction to various concepts and approaches in improvisational dance. From games to specific movement tasks, we will work together to unlock new ways of allowing our body to move and respond in the moment, to surprise ourselves, and to take chances. We will discover our own styles and learn what holds us back, discovering a creative process that can be applied well beyond the dance studio. No dance experience required, just a willingness to try!

20483 P W LAB 010 TTH 9-10AM DANCE STUDIO B Brading

Modern

The Limon technique is based upon the movement style and philosophy of theater developed by modern dance pioneers, Doris Humphrey and Charles Weidman. We will use Limon principles to find freedom in our joints, connection to the earth, suspension in the body, and texture in movement. Using the concepts of weight, breath and suspension, we will explore the movement of our unique bodies in community. We will have space for repeating exercises and discussing movement, allowing students to grow into the material presented. We will complement our studio practice with short reading and writing assignments and end the semester by creating and sharing our work in a final showing.

Essence of Groove

This course will explore the nature of movement in spaces inspired by rhythm and expression of emotion. Improvisation will play a big role as we display identity and individuality through dance. The definitions of groove and groovin? have evolved over time. We will take a look at the origin of the term, aspects of groove that stayed the same, and what has been lost. Movement and music will have roots in jazz, soul, funk, disco, house, and urban jazz. Dancers will be asked to explore movement through improvisation and to exercise their creativity as they learn choreography.

Contemporary

Using Humphrey/Limon principles as an underlying base, we will take a somatic and investigative approach to our contemporary dance practice. We will contemplate problem-solving for our specific bodies and finding the next level of our dancing while respecting the safety and wellbeing of the mind and body. We will experiment with yoga and other practices of mindfulness to discover what serves us in the dance space. During the semester we will be making personal tool boxes to be used across a wide range of movement and support students in university dance life and beyond. This class will be largely participation based and complemented with writing and reflection assignments concerning forms of contemporary dance and our own personal practice.

Commercial Hip Hop

Through readings, videos, discussion, reflection, and physical practice, this course will address issues around race, privilege, and access in the commercialization of hip hop dance. We will learn the history and evolution of hip hop dance, learn hip hop dance terminology and techniques, and apply them in choreography. During class, we will also work on retention and execution of choreography, the art of freestyling and expression, audience engagement, and performing for the camera. Students will be required to attend one hip hop dance event/battle

Functional Training Lab

The functional training class helps to provide you with the strength, stability, and mobility you need to thrive in your dance life. You use basic functional movement patterns like pushing, pulling, hinging, squatting, rotating, carrying and gait patterns?walking and running?every day. Functional training utilizes exercises that improve your movement proficiency in these primary patterns to give you an edge so you can achieve your goals safely and with good health. Working on specific muscle groups will prepare you to have a better muscle respond in your Dance Tech Classes.

West-African

Course Description:

In this course, we will uncover the history, context, and techniques of several West-African rhythms and dances that derive from the African civilizations associated with the people of modern-day Ghana, Guinea, Mali, and Senegal. Throughout the semester we will focus on the polyrhythmic nature of the dances, songs, rhythms, folklore traditions, customs, and music. Together as we journey throughout the entirety of this course, we will grow to develop a deeper understanding and appreciation of West-African music, dance, and culture.

Objectives and Learning Outcomes:

Students will gain integrated skills in West-African music, dance performance, and creativity through an influential and holistic learning experience.

Students will learn the importance of this dance genre as an ancient communication system rooted in the relationship between the drummer and the dancer.

Students will learn the basic fundamental techniques of West-African music and dance forms.

Students will acquire analytical, interpretative, evaluative, appreciative, and critical skills relating to West-African music, dance, and culture.

Students will develop collaborative skills needed for teamwork, community building, and social harmony.

442	Screendance					3.00	
20516	PD W LEC 001	F	9-12PM	LEC RM 1 MLB	Brissey		
This course examines the creative potential of integrating choreography and technology through projects in experimental video, social media and the internet, interactive performance, improvisation, and sound design. Supplemental screenings and readings will provide historical and theoretical context to inspire new possibilities for pursuing mediated choreographic practices. We will broadly consider the term "choreography" to research the ways in which bodies and information move through time and space via a multitude of technological infrastructures. We will discuss what becomes identified as "technology" and the social, political, and ecological consequences of engaging with these systems. Critical attention will be given to the relationship between technology and visibility, specifically in regard to race, gender, sexuality, class, and ability. Through what labor do technological systems come into the world and who benefits from their being here? Each student will write a treatment for a final project of their own design which can take shape in a variety of forms: video, essay, live performance, etc. As a class, we will organize a public event to share final projects with the community.

496	Special Topics					1.00-3.00	
34630	PI LEC 001	TTH	830-10AM	DANCE STUDIO C	Neslund		
Therapeutic Kinesiology							
An introduction to the principles of kinesiology through the topics of exercise physiology, biomechanics, and motor control. Students gain an appreciation for the study of human movement from a scientific perspective. This class provides fundamental theories, applications, and personal experiences necessary for a comprehensive understanding of relationships between fitness, physical activity, health and well-being. The study of body mass regulation including the understanding of food, digestion, metabolism, and different intervention strategies such as a diet and exercise are also addressed, while students will learn assessment principles and techniques. The course seeks to increase student understanding of human physiology during exercise under environments and physiological conditions that limit physical performance.

<p>This course examines the creative potential of integrating choreography and technology through projects in experimental video, social media and the internet, interactive performance, improvisation, and sound design. Supplemental screenings and readings will provide historical and theoretical context to inspire new possibilities for pursuing mediated choreographic practices. We will broadly consider the term "choreography" to research the ways in which bodies and information move through time and space via a multitude of technological infrastructures. We will discuss what becomes identified as "technology" and the social, political, and ecological consequences of engaging with these systems. Critical attention will be given to the relationship between technology and visibility, specifically in regard to race, gender, sexuality, class, and ability. Through what labor do technological systems come into the world and who benefits from their being here? Each student will write a treatment for a final project of their own design which can take shape in a variety of forms: video, essay, live performance, etc. As a class, we will organize a public event to share final projects with the community.</p>

Arts Leadership Forum				
This course is designed to provide access to the greatest leaders from the fields of performing arts, arts administration, arts leadership and philanthropy. Students will have the opportunity for multi-faceted in-depth engagement and reflection. The premise of the class is to ignite learning through inspiration from and role modeling by successful leaders and direct mentorship. Students will meet with the visitor for a facilitated interactive experience and conversation, engage each speaker in a facilitated Q and A and process the materials in an interactive group discussion. Students will also write response pieces to each speaker, providing their own perspectives and takeaways from the absorbed material. Finally, as the final project, students will present a mini-lecture, engage in a peer Q and A and provide critical feedback. The response papers will be submitted after each visit. Each visitor may also assign a reading for the preparatory discussion, and possibly, for the visit itself.				
29301	P LEC 002 TH	1230-230PM	ARR	Dworkin
IDEA:Inclu/Div in Educ Artists				
Students will participate in SphinxConnect, shadow Sphinx staff and plan webinars and other post-conference work, gain an inside view on DEI work, and reflect on how DEI practices may be relevant to their careers.				
34715	P LEC 003 M	630-830PM	2044 MOORE	Arthur
Art/Social Action: CommPerform				
What are the tools needed to harness the power of the performing arts to impact social change? How do theatre, dance, music and interdisciplinary art forms offer critical sites for transforming cultural and social structures within society? This course will explore a wide range of performance-based methods that serve as a catalyst for change. If you have ever wanted to learn more about specific social justice principles and how to incorporate them into your work, this is the course is for you

Arts Entrepreneurship Essentials is a comprehensive journey that begins with developing one's mindset of conceiving, vetting and formulating an idea and then implementing them into successful, sustainable creative ventures. Students will have the opportunity to explore entrepreneurship through the prism of their own arts or life focus and specialization. Required texts, coupled with class lectures, collaborative projects and engaged discussions are designed to help develop the core skillsets necessary to awaken and develop young creative entrepreneurs. As a practicing arts and social entrepreneur having founded several successful, ongoing creative initiatives and organizations, Professor Dworkin will introduce a unique and practical course informed by his own life experiences, including building a thriving non-profit with a 5 million dollar annual budget and a 20-year track record. As an overall philosophy, this course demystifies entrepreneurship and illustrates how an authentic passion and commitment to creativity and learning serve as key pillars for a successful, fulfilling life. The final Capstone Project will tie together the material covered in all modules, showcasing each student's ability to formulate and make the case for a creative venture.

Beginning Guitar							
Guitar 111 is a course is for beginners - those who have never played guitar. If you do not own a guitar one will be provided for you to use during the semester. Students with more than a year of playing experience should not register for the course.							
The purpose of GUITAR 111 is to help students develop their guitar skills, with a primary focus on using the guitar as an accompaniment instrument. Right Hand skills covered will include finger picking, flat picking, and a variety of strumming patterns. Left Hand skills will include open chords, barre chords, melody chords, and basic scale patterns. Introduction to reading of standard music notation, guitar tablature, and chord symbols will be covered. Other topics that will be presented include improvisation, playing by ear, and using the capo for transposition.

Fund Rhythm B							
This is a companion course to "Fundamentals of Rhythm A: the grid," but does not require this course as a prerequisite. "Fundamentals of Rhythm A" explored rhythms on human made grid systems such as even pulses, quantized subdivisions, metric cycles and song forms. This course will look at rhythms that more generally fall "off the grid" or "in the cracks." This includes rhythms of speech, gesture, and rhythms of the natural world. In musical applications, we will look at some of the varieties of experience that fall into the category of "feel," including groove, flow, pocket and swing. As in the first semester course, students will not bring instruments to class. All work will be done with singing and clapping in order to developing, hearing, memory, and internalization

This is a companion course to "Fundamentals of Rhythm A: the grid," but does not require this course as a prerequisite. "Fundamentals of Rhythm A" explored rhythms on human made grid systems such as even pulses, quantized subdivisions, metric cycles and song forms. This course will look at rhythms that more generally fall "off the grid" or "in the cracks." This includes rhythms of speech, gesture, and rhythms of the natural world. In musical applications, we will look at some of the varieties of experience that fall into the category of "feel," including groove, flow, pocket and swing. As in the first semester course, students will not bring instruments to class. All work will be done with singing and clapping in order to developing, hearing, memory, and internalization

Music Performance (MUSPERF)

NOTE - STUDENTS ELECTING COURSES NUMBERED 591, 891, 990, AND 995 MUST FILL OUT APPLICATION FOR INSTRUCTION IN MUSIC PERFORMANCE AT 2277 SCHOOL OF MUSIC DURING REGISTRATION.

200 Special Course **2.00-3.00**
 22581 P LEC 001 TTH 1130-1PM G127 AH Langland, Clague

Engaging Performance

This course connects undergraduate students directly to the touring, world-class artists who perform music, theater, and dance on the U-M campus. Students will attend live performances, talk with the artists and the arts administrators who help get them here, and explore how the performing arts are an integral part of our lives and the world at large. Class will include lectures (including some by guests and visiting artists), weekly discussion sections, required attendance at evening performances, interactive classroom activities, weekly readings, reaction papers about the performances, and group presentations and/or performances from students in class.

Students will attend live performances of:

Urban Bush Women's Hair & Other Stories

Underground Railroad Game, a daring new theatre work about race in the United States;

singer-songwriter Gabriel Kahane's new song cycle Book of Travelers;

an opera in concert production of the Gershwins' Porgy and Bess;

Company Wang Ramirez's Borderline, a contemporary dance work fusing cultures and styles;

a concert at the Michigan Theater capturing the blues tradition in the Piedmont region of the United States;

the dance-theatre work of Nederlands Dans Theater

legendary jazz pianist Chick Corea with the Lincoln Center Orchestra

These performances constitute the course's primary 'textbook' and the full package of tickets is available to students enrolled in the course for the dramatically reduced rate of \$120. Engaging Performance is made possible through a grant from the Andrew W. Mellon Foundation and a partnership between the University of Michigan and the University Musical Society (UMS)

Media Technology Careers				
This course explores how today's leading technology companies bring products to market and how artists, musicians, composers, engineers, business and computer science students might contribute and become part of these companies. Topics include best practices to department functions. Online resources offer insights into real, working companies. Instructor will visit campus to meet with students.

Got Rhythm							
"Music," Henry Wadsworth Longfellow once said, "is the universal language of humankind." Indeed, the belief that there is something language-like about music has long fascinated not only poets like Longfellow, but also scientists, philosophers, and thinkers from a variety of other backgrounds not to mention linguists and music theorists. This course builds on this age-old interest from an interdisciplinary perspective, to see how music and language are related, and how they are also different. So we will explore, for example, how music and language function in different cultural contexts, as described by anthropologists, and how they evolved, and allow us to think, express and be creative, as philosophers, psychologists and biologists have discussed and in the process, we will explore things as diverse as birdsongs and Beethoven symphonies, fractals and Neanderthal flutes, and grunge rhythms and the music of New Guinea. To help us ground our comparison of music and language, we will learn some linguistics too?within a framework known as generative linguistics, developed by linguists like Noam Chomsky and we will see how this perspective suggests that music and language might actually be identical. Graduate students elect Theory 560.

Connected Vehicles Stdzn Diff

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). In the realm of connected and automated vehicles (CAVs), there are trade-offs between standardization, which enhances compatibility and interoperability, and differentiation. Students will consider which CAV features should be standardized (or differentiated), how quickly standardization should be pursued, and what role regulation should play in standardization. Student teams will incorporate ideas from law, engineering, information, business, and other fields to develop an innovative tool.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Campus Sex. Misconduct Prev.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Campus sexual misconduct affects many students in the U.S., with health, social, economic, and academic consequences. Universities struggle to fashion effective policies and other responses in the face of external political, legal, and social pressure. In this class, multidisciplinary teams of students will explore solutions to campus sexual misconduct, drawing on knowledge and expertise from law, nursing, public policy, social work, public health, sociology, education, organizational studies, and other disciplines to develop a novel solution to the problem.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Info Privacy, Survl. Exposure

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Today's information and communication technologies create opportunities for surveillance, tracking, and privacy infringements. Students will learn about privacy risks that a variety of exposure-sensitive populations face, including marginalized groups, immigrants, journalists, abuse survivors, and children. Multidisciplinary student teams will leverage insights from design thinking, law, information, public policy, and other disciplines to develop novel privacy solutions for such susceptible groups.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Hum Rghts Mineral Supply Chain

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The extraction of minerals used to manufacture automobile components, including electric vehicle batteries, comes at a high cost. Multidisciplinary teams of students will study the human rights implications of this supply chain, and their research will be informed by auto industry, NGO, and stakeholder perspectives. Students will incorporate insights from international law, business, engineering, environmental sciences, technology, and other fields to develop a solution for industry to implement.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Challenges Deliver MI Soc Svcs

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The federal government funds many crucial social services for the poor. However, individual states -- which are rarely the focus of policy debates about social services -- are usually responsible for overseeing the provision of those services. This course will focus on emerging challenges to the delivery of social services in Michigan, including Medicaid, food stamps, and TANF. Working closely with officials from the Michigan Department of Health and Human Services, students will devise potential solutions to problems with the administration of state benefits for vulnerable populations.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Public Health in Action: National --- An intensive course to prepare students for a culminating week-long practice-based experience designed to address existing and emerging public health priorities as defined by the respective communities and their academic partners. Students will be engaged directly with communities in Mississippi and exposed to the contextual, cultural, political and economic factors impacting rural health. This field experience will occur May 10-16, 2020. Students will work directly with census data to build organizational capacity. This course is open to SPH undergraduates and graduates.

Connected Vehicles Stdzn Diff

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). In the realm of connected and automated vehicles (CAVs), there are trade-offs between standardization, which enhances compatibility and interoperability, and differentiation. Students will consider which CAV features should be standardized (or differentiated), how quickly standardization should be pursued, and what role regulation should play in standardization. Student teams will incorporate ideas from law, engineering, information, business, and other fields to develop an innovative tool.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Campus Sex. Misconduct Prev.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Campus sexual misconduct affects many students in the U.S., with health, social, economic, and academic consequences. Universities struggle to fashion effective policies and other responses in the face of external political, legal, and social pressure. In this class, multidisciplinary teams of students will explore solutions to campus sexual misconduct, drawing on knowledge and expertise from law, nursing, public policy, social work, public health, sociology, education, organizational studies, and other disciplines to develop a novel solution to the problem.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Info Privacy, Survl. Exposure

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Today's information and communication technologies create opportunities for surveillance, tracking, and privacy infringements. Students will learn about privacy risks that a variety of exposure-sensitive populations face, including marginalized groups, immigrants, journalists, abuse survivors, and children. Multidisciplinary student teams will leverage insights from design thinking, law, information, public policy, and other disciplines to develop novel privacy solutions for such susceptible groups.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Hum Rghts Mineral Supply Chain

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The extraction of minerals used to manufacture automobile components, including electric vehicle batteries, comes at a high cost. Multidisciplinary teams of students will study the human rights implications of this supply chain, and their research will be informed by auto industry, NGO, and stakeholder perspectives. Students will incorporate insights from international law, business, engineering, environmental sciences, technology, and other fields to develop a solution for industry to implement.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking

Challenges Deliver MI Soc Svcs

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The federal government funds many crucial social services for the poor. However, individual states -- which are rarely the focus of policy debates about social services -- are usually responsible for overseeing the provision of those services. This course will focus on emerging challenges to the delivery of social services in Michigan, including Medicaid, food stamps, and TANF. Working closely with officials from the Michigan Department of Health and Human Services, students will devise potential solutions to problems with the administration of state benefits for vulnerable populations.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

250	Energy&Climate Chng					3.00
32155	P	RW	LEC	001	MW	10-1120AM 1120 WEILL Raimi, Beeler

Greenhouse gas emissions associated with energy use are the leading cause of global climate change, and they are growing. The challenge of sharply reducing emissions while continuing to provide energy to a growing population is an enormous global challenge, one that policymakers have not yet solved.

This course will provide an introduction to the global energy system and its role in climate change, with a focus on the United States. It will begin with a review major energy technologies, the markets in which they operate, and how both have changed over time. It will then turn to the fundamentals of climate change, with a basic overview of the science, the economic principles that can guide policymaking to reduce emissions, and key social dynamics that shape policies and markets. We will then turn to the real-world application of public policies at the international and national level, developing an understanding of how these policies are designed along with their effectiveness.

The course will conclude with a series of case studies on potential approaches to addressing the interconnected spheres of energy and climate. Case studies will focus on the sometimes difficult trade-offs that arise in trying to prevent the worst impacts of climate change while provide the energy that underpins the global economy. We will examine the political, economic, technological, and psychological aspects of pursuing alternative approaches to achieve these interconnected goals.

300	Persuasive Policy Wr					3.00
25721	P	RW	SEM	001	TTH	10-1120AM 1210 WEILL Chimera

This course, structured as a seminar and writing workshop, intensively develops students' persuasive writing and critical reading skills through abundant practice and feedback. Weekly writing assignments and exercises will focus on every stage of the writing process, from brainstorming and research through drafting and revision, in three vital areas of political writing: the short opinion piece, the policy memorandum, and the polemical essay. We will read and analyze a wide variety of examples from traditional print and online media, from journalistic, government, and academic sources. We will also explore ethical considerations of policy writing, considering the ways in which our rhetorical choices, tone, word choice, even syntax construct our subjects and frame contentious issues for target audiences.

313	Environ Mgmt&Policy					1.50
33565	P	RW	LEC	001	W	830-950AM 1210 WEILL Rabe

This 1.5 credit module will introduce students to the roles that governmental agencies play in environmental protection at the federal and state levels in the United States. It will review the historical evolution of such entities as the Environmental Protection Agency and Department of Interior as well as their state-level counterparts and explore how they address such issues as working across jurisdictional boundaries and environmental media of air, water, and land. Moreover, cases will be examined to study such issues as political control of agency staff and operations as well as response to legislative mandates to measure and advance performance. The module will allow students to select a case study for review in a short paper that will be presented at the end of the term.

413	Prof and Lead Dev					1.00
24222	P	R	SEM	001	F	830-220PM 1210 WEILL Scheerer

Pathways to Prof. Success

Course meets in person on January 31 and February 7 only.

Non-Ford students can enroll Ford elective courses beginning December 5.

The goal of this course is to enhance the students' ability to bring about the individual and organizational changes they want to see. This course begins by addressing (1) what effective managers really do and (2) why some high-potential managers succeed while others fail. As effective managers know, the ability to develop and manage relationships with others is critical to a manager's success. This course is based on three foundations: The first focuses on developing self-awareness. After all, managing relationships depends first and foremost on knowledge of individual personal strengths and weaknesses and the impact of these strengths and weaknesses on others. The second foundation focuses on developing an understanding of others. The third foundation focuses on managing specific types of relationships on the job—those with subordinates, peers, and bosses.

418	Facilitating Dialogue					3.00
33623	P	RW	SEM	001	TH	4-650PM 1230 WEILL Henry

Non-Ford students can enroll Ford elective courses beginning December 5.

This is a course in facilitating complex and difficult dialogic moments of engagement in the social, professional and institutional spheres of the public arena. Its purpose is to provide the possibility for actual engagement with tense social issues and phenomena bedeviling complex societies. It will briefly explore the historical and theoretical contexts, which give rise to sometimes painful and traumatic moments that filter in and color what may otherwise be perceived as simplistic conversations and interactions. It will introduce students?regardless of

perceived color, gender, class, or ethnicity categorization?to the necessity for transcending their subject locations. In order to facilitate, mediate, and engage in trans-formative moments of learning, dialogue, leadership and communal capacity building with due regard of difference and the respect of mutuality.

423 Pol Campaign Strateg **3.00**
 22398 P RW LEC 001 T 530-820PM 1110 WEILL Alper
 This course will introduce you to the art and science of political campaigning. Topics to be covered include a heavy emphasis on political communications, including speeches and debates, crafting and framing a message, earned media, paid media, digital and social media, voter contact, and field.

PubPol 423 will also examine campaign planning and management, polling and research, identifying, targeting and turning out voters, coalitions and interest groups, budgeting and fundraising, the political environment and Get Out The Vote efforts.

456 Local Gov: Opp Activ **3.00** **ENFORCED**
 34395 P RW LEC 001 TTH 230-350PM 1210 WEILL Hieftje

Non-Ford students can enroll Ford elective courses beginning December 5.

Taught by John Hieftje, former Mayor of Ann Arbor.

Cities are leading the fight against climate change. Around the world they are experiencing the devastating effects as hurricanes intensify, sea levels rise, ?heat islands? multiply and storm water systems are overwhelmed, along with city budgets. And yet, people are flocking to cities to experience their booming economies, plentiful jobs and exciting cultural communities. But for every successful city, there is a downside as gentrification spreads and all but the wealthy are forced to move further out as housing prices rise. The need for better transportation into and within cities has never been greater. Our federal government offers no help. In response a new generation of activists are pushing elected leaders to respond. This class will hear directly from activists, state and local elected leaders and top professionals in their field. Finally, students will develop and host the first debate of the 2020 campaign for Ann Arbor City Council.

467 STATA for PubPol **1.50**
 29325 P RW LAB 001 TTH 230-350PM 3117 WEILL Worthington

Non-Ford students can enroll Ford elective courses beginning December 5.

This course is an introduction to programming and working in STATA, a core statistical program in the social sciences. In a variety of fields, STATA remains the baseline program for analysis, data management, and visualization. In this class, students will learn workflow management in STATA, data import, manipulation, and managements, and fundamentals of analysis in the software environment. At its conclusion, students should be ready to begin using STATA in their own analysis and to move forward through self-study.

This course covers basics of STATA?s command, object, memory, and interface fundamentals, data import and management, creation of basic statistical summaries, linear regression and regression diagnostics, analysis for binary and categorical outcomes, and basics of time series and panel data analysis. The course is graded credit/no credit (pass/fail), with weekly review ?tasks? in STATA. Students in the class are not expected to have prior knowledge or experience in STATA, but a baseline knowledge of statistical concepts is highly recommended.

474 Values & Ethics **3.00**
 28838 P RW LEC 001 MW 230-350PM 1220 WEILL Rohde

Science Policy
 Topic: Science Policy

Science and technology intersect with many areas of public policy. Think of concerns about government surveillance and data privacy, the debates over climate change mitigation policies, the economic and social challenges posed automation, and religious and ethical concerns about the implications of human gene editing. This course examines competing approaches to bringing science and technology to bear on the public good. It will familiarize you both with the central role that science and technology play in contemporary policy while acquainting you with a set a concepts and approaches for reasoning and writing about the normative challenges that operate in public policy. Topics may include: automation and the future of work, AI and national security, climate change mitigation policies, human gene editing, health care access, and water security. No background in science or technology is necessary.

31978 P RW LEC 002 MW 1-220PM 1210 WEILL Morse

Lying & Public Policy
 Topic: Lying and Public Policy

Lying has been getting a lot of attention lately and for good reason. Democracies demand the truthful exchange of information between rulers and the ruled, as well as a healthy media to inform the public on matters related to government and policy. Lying therefore poses a legitimate threat to the political stability of our nation. And yet despite the current ubiquity of terms like "post-truth" and "alternative facts", lying is not a twenty-first century cultural or political aberration, lying permeates the social fabric, playing a significant role in our daily conversations with others and with ourselves. As research has shown, we lie (frequently) to avoid social embarrassment or hurting the feelings of others, or to manipulate situations for our own gain. Political philosophers like Plato and, most notoriously, Machiavelli, have argued that lying is an essential tactic in the ruler's toolkit, used to preserve social cohesion or persuade the public to agree with a policy that, in the ruler's opinion, may be for the social good. Lying can also be necessary to protect the minorities from exploitation or oppression. In this values and ethics course, we will read broadly in literature, philosophy, history, and politics, and we'll watch a few films and TV shows as well in order to determine when, if ever, lying is justified, and we will apply these lessons learned to examine important policy topics of our own era. Possible topics include: the creation and cultivation of national myths, passing, propaganda, diplomacy, fake news, advertising, and the extent to which lying compromises government services such as entitlement programs, voting,

and the police.
 32157 P RW LEC 003 TTH 10-1120AM 1120 WEILL Tompkins-Stange
 Philanthropy
 Topics: Philanthropy

Private philanthropic foundations in the U.S. are fundamentally private organizations that operate within the public arena, and have long played central roles in advancing social change and shaping.

 GreatDepressGreatRecess
 Topics: From the Great Depression to the Great Recession

Non-Ford students can enroll Ford elective courses beginning December 5.

Since the 2008 financial crisis, developed countries have suffered high unemployment and slow growth. What are options for policymakers in this environment? This course will analyze central issues in macroeconomic policymaking through the lens of history. Students will apply analytical tools to understand the consequences of monetary, fiscal and financial market policy in the Great Depression, in Japan after 1990, and in the current Great Recession.

32158 P RW SEM 002 MW 4-520PM 1210 WEILL Hausman
 Gov Reg Ind & Envir
 Topic: Government Regulation of Industry & the Environment

Non-Ford students can enroll Ford elective courses beginning December 5.

This course examines environmental and energy policies. We discuss the sources of environmental problems and what regulations are available to remedy these problems. We also cover energy markets, including fossil fuel extraction and electricity. Examples of policies analyzed include pollution taxes, renewable energy subsidies, efficiency standards, cap-and-trade programs, and electricity deregulation. Throughout the course, we discuss concepts such as externalizations, valuation of the environment, and cost-benefit analysis. The course presumes some prior knowledge of microeconomics.

32159 P RW SEM 003 TH 4-650PM 3117 WEILL
 P RW SEM 003 TTH 1130-1250PM 1230 WEILL Farley, Neidert
 Politics of 2020 Census
 Topics: Moving Power and Money: The Politics of the 2020 Census

Non-Ford students can enroll Ford elective courses beginning December 5.

Course meets in 1230 Weill Hall on March 10, 12, 17,19, 24.

Census Lab meets in 3117 Weill Hall on March 12 and March 19 only.

The United States has had the longest continuing history of census taking in the world. It is in our Constitution with the express purpose of redistributing power across the states every decade. It is also used to geographically distribute funds. The census is inherently political because of the redistribution of power and not surprisingly there have been controversies over time including who and where people should be counted, differential undercount of the population, confidentiality of responses, and what census methodology is appropriate for the Census Bureau to employ.

32562 P RW SEM 004 MW 1-220PM 1230 WEILL Hall
 Campaign Finance Reform
 Topics: Campaign Finance Reform

Non-Ford students can enroll Ford elective courses beginning December 5.

Federal election spending from all sources has doubled over the last twenty years and the 2018 election continued the trend. Campaign spending in the midterms exceeded \$5 billion for the first time, much of it coming from Super PACs and "dark money" organizations unfettered by federal regulation. Spending in many state elections has followed this trend. But is that a bad thing? We will begin the course by reviewing the campaign finance system at the federal level. We then examine critically the basic claims used to justify campaign finance regulations. What is the social scientific evidence that spending, by candidates or independent groups, influences election outcomes? What is the evidence that contributions influence elected officials post-election? What is the case against regulation? Do restrictions on campaign contributions and spending violate the First Amendment protection of free speech? In the second half of the course, we will consider the constitutional and practical merits of various campaign finance proposals at the local, state, and federal level. Students will work in teams to evaluate campaign finance policy in a particular state or locality and write policy briefs to public officials on how to improve their campaign finance system, then defend their recommendations in a public forum.

480 Global Engag Seminar 3.00
 27621 PDRW SEM 001 MW 1130-1250PM 1220 WEILL Collins
 Costa Rica Trip

This advanced seminar challenges public policy majors to consider how policy issues are framed and addressed in a non-US context. (Costa Rica will be the initial focus and location of the study tour but the country may vary in subsequent year.) Student will study a small number of contemporary policy problems in light of the country's specific political, economic, historical and cultural context. The winter break study tour will provide students an opportunity to discuss the policy issues with local stakeholders. Upon return, students will work in groups to produce short, formal policy reports that account for country-specific condition.

The country to be studied will be selected by faculty leading the Global Engagement seminar. Approximately 15 Ford School undergraduate students will be selected to practice in the course, on the basis of application forms to be submitted early in the fall semester. Priority is accorded to students with a strong interest in international affairs and/or limited previous experience with travel and study outside the US. There is a modest program fee to help offset experiences of the study tour; need based financial assistance may be available.

Irrational Actors

PUBPOL 495 (Policy Seminar) is for students currently enrolled in the Public Policy Undergraduate Program only, no exceptions. Enrollment is by permission only.

Classic economics is based on the idea of rational actors, people making decisions that maximize their own utility based on their preferences. However, most psychological models of behavior don't assume that people are particularly rational. Some even claim that the vast majority of our decisions are not based on conscious preferences and deliberate choices, but are instead influenced by factors that are invisible to us. For example, why is that people who are desperately trying to save money end up splurging on unnecessary purchases? How is that people who don't think of themselves as racist and even go out of their way to reject racist beliefs can still act in biased ways against racial minorities? Why is it so often the case that the arguments we remember best are the ones that happen to fit with our existing beliefs?

Many psychological and behavioral economic models have been created to explain the myriad ways that people act irrationally. In this policy seminar, we will examine some of the ways in which people are predictably irrational and the implications of this irrationality for policy. We will review research from behavioral economics and psychology to explore how factors such as heuristics, implicit attitudes, social norms, self-serving biases, and emotions can shape our decisions often in ways we're not even aware of.

This course will place these recent trends in context by studying the 20th century economic history of the U.S., Europe, and Japan. We will examine (1) the origins of modern economic growth in the 19th century and the forces that increased growth in the 20th century; (2) the tremendous economic disruption of the Great Depression; (3) the growth success of the 1950s and 1960s; and (4) the cyclical and structural economic problems faced by the U.S., Europe, and Japan since 1973. The focus of this course will be on the economics of these events and the responses of economic policymakers. But we will also look to history and political science for alternative perspectives.

-------	--------------	-----	---------	------------	-------	--	--	--

Apology, Peace, Reparations

PUBPOL 495 (Policy Seminar) is for students currently enrolled in the Public Policy Undergraduate Program only, no exceptions. Enrollment is by permission only.

How do nations founded through political conflict and extreme social traumas come to systemic terms with the evolution of discourses on human rights after 1948? What has been the role of transitional justice mechanisms such as truth commissions and public apologies in shaping reparative frameworks as part of the post conflict nation's quest for greater social cohesion after the legal recognition of such historical conflicts? What are the psycho-social, socio-cultural, political and economic challenges faced by democratic nations who have previously experienced colonization and extended periods of administrative violence?

This comparative public policy seminar will explore the currency of transitional justice mechanisms, reparative processes and public apologies that have come about through long, complex and ongoing civic struggles for indigenous rights in South Africa, New Zealand, Australia, Canada and the USA. The questions of equality, justice and rights so central to democratic nationhood are not so easily settled once a nation has been officially inaugurated. Such questions are a constant part of what is at stake in the political, social, economic, and moral context of public policy during the post conflict phases of democratic consolidation. This course will address how our ability as future leaders, policy analysts and policymakers may be improved by developing a deeper understanding of the complex nature and discourse on human rights and the politics of nationhood. It will be informed by an ongoing reflection of our proximity as leaders to violence and our responsibility as policy makers to the ongoing public engagement with the 'unfinished business' of history making.

This course provides an overview of international financial economics, developing analytic tools and concepts that can be used to analyze world economic policy debates. It covers the international implications of macroeconomic policies, international monetary arrangements and institutions, and stabilization programs for developing countries. The course will be structured around the tools (models) of open economy macroeconomics, using primarily graphs, and occasionally equations. However, motivation for these tools and examples of their use will always be taken from current and recent real-world macroeconomics events and conditions. This course presumes prior knowledge of intermediate microeconomics and graduate standing. Course assignments will include problem sets that involve short essays, data collection and analysis, and problem solving, and a group project that involves an assessment of the macroeconomic performance and problems in a particular country.

558 Economic Analysis 3.00 ADVISORY, ENFORCED

32161 A RW LEC 001 MW 230-350PM 1110 WEILL Stange, Fletcher
 A continuation of PubPol 555 (Micro A), this course will deepen students' understanding of key economic concepts and principles and importantly apply them to the practice of policy analysis. Students will thus gain applied policy analysis skills through an economic lens, focusing on the efficiency and equity consequences of resource allocation, regulation, and other policy interventions. We will develop and hone an array of tools, including graphical analysis, cost-benefit and cost-effectiveness analysis, sensitivity analysis, and different approaches to valuation. We will apply these tools to specific applications in a handful of public policy domains including the environment, early childhood and education, labor markets, trade, crime, and transportation. Throughout the course will focus on the skills and approaches that public policy professionals use in practice. In fact, we'll see several examples of economic analysis being done by or used by our own Ford alumni!

Leadership Within the 3rd Sec
Taught by Phyllis Meadows, Senior Fellow, Health, The Kresge Foundation.

Non-Ford students can enroll Ford elective courses beginning December 2.

This course will focus on understanding opportunities and building skills for leadership and management within and across the non-profit and governmental sectors. The course will expose students to exemplary leaders and organizations focusing on the design and delivery of health and human services. Over the course of seven weeks, students will have the opportunity to explore methods and approaches for leading cross-sector partnerships and for managing issues in governance, relationships, politics, planning, and financing. This course will provide a blend of short lectures, case-studies and practice opportunities in leading and management. This course is especially designed for students who aspire to be on the cutting edge of leadership in the future.

-------	--------------	---	---------	------------	------

Strategic Comm for Advocacy
Taught by Ali Webb, Founder and Principal, Ali Webb Strategies.

This course will introduce students to a range of communication strategies to move public policy forward in public policy areas from climate change to public education, health reform to anti-poverty efforts. For new public policy to emerge, policy experts must learn skills to translate their analytical content to the public audiences that ultimately decide the fate of reform. Class members will examine policy reform from the strategic communications perspective including understanding audiences, identifying partners, developing key messages, storytelling, media relations, delivering the messages through effective channels and measuring impact. Students will develop policy advocacy campaigns which demonstrate the interplay between strategic, effective, targeted communications and achieving and sustaining policy change.

Fundraising Strategies for Non
Taught by Katherine (Kat) Walsh, director of student engagement and director of diversity, equity, and inclusion initiatives, U-M Office of University Development (OUD).

Non-Ford students can enroll Ford elective courses beginning December 2.

Social change cannot occur without an infusion of financial resources particularly as the public service sector does not have the financial capital to invest in solving every pressing social issue. Fundraising promotes a culture of possibility --- it's the intersection of personal passions and organizational needs. Increasing your knowledge of industry best practices and gaining fundraising skills are critical to your success in social impact work. This mini-course serves as an opportunity to engage theory in practice (praxis) through the study of fundraising for nonprofit organizations in the United States. We will learn about fundraising history, principles, best practices, and shortfalls through guest lectures from industry leaders, readings, self-reflection, group dialogue, and an applied learning project. This year's applied learning project involves Food Gatherers, a local nonprofit in Ann Arbor.

28974	P RW SEM 004	T	530-720PM	1230 WEILL	Hajra
-------	--------------	---	-----------	------------	-------

Policy & Manage in Nonprofit
Taught by Neel Hajra, the President & CEO at the Ann Arbor Area Community Foundation.

Non-Ford students can enroll Ford elective courses beginning December 2.

The nonprofit sector has emerged as one of the cornerstones of American society, and yet remains very much a work in progress. The "third sector" faces unique and evolving pressures in areas such as social enterprise, philanthropy, mission focus, performance measurement, sector blur, and more. In our class we will examine how some of these broad issues intersect with the day to day operation of nonprofit organizations. By considering sector tensions from a management perspective, ultimately we will each develop our own informed view on the appropriate role and function of the nonprofit sector within society. Future policy makers and nonprofit managers alike will enhance their ability to formulate positions on policy issues that impact the sector.

Working in Diverse Orgs
The workforce of the 21st century is increasingly diverse. Productive managers cannot afford to ignore this diversity, and can benefit greatly from it. Yet we are often nervous about discussing and embracing issues of diversity, equity, and inclusion and many otherwise strong leaders are blind to the ways their own biases might affect their teams. In this module, students will learn about potential blind spots such as unconscious bias and its effects on employee hiring and retention, how the desire to avoid negative emotions might get in the way of productive management, and the dangers of groupthink, as well as learning strategies to avoid or address these problems. The readings will draw on empirical research from social psychology and organizational behavior, as well as real-world examples of diversity issues in the workplace.

	Non-Ford students can enroll Ford elective courses beginning December 2.			

This course serves as an introduction to qualitative methods for MPP/MPA students. While we will examine a range of qualitative methodological approaches, the course's core focus will be on the case study method, with special emphasis on observational and interview-based research.

638	Integ Policy Exercise	1.00	ADVISORY	
11497	P RW SEM 001	Smith		
	This course will be held January 10-11, 2020.			

The Integrated Policy Exercise provides students with a week long opportunity to work intensively on a policy issue. All students participate as part of a team representing different constituencies with an interest in the problem being studied. Working in groups of 7 to 10, students are assigned a role such as lobbying firm or political operative, or economic group. Groups prepare a political strategy to achieve their clients' objectives and to develop policy positions for their group. The week culminates in a negotiation process among all the groups involved. Topics vary each year.

This course developed from an initiative of the International Policy Students Association (IPSA) at the Ford School of Public Policy. It will be in two parts.

Section 1: Traditional Class Format (1.5 credits)

This seven-week, 1.5-credit course focuses on the evolution of a given country's economic, political and social institutions and policies, beginning with the historical origins of the country. Students examine why the country embarked on the development strategies in different periods and what the consequences of those strategies were. The

course will progress to the current period and examine the pressing policy issues facing the country today and how the leaders are dealing with those problems given the internal and external constraints. The country to be studied will be selected in the early part of the previous fall term by the group of students who applied and were selected by IPSA and the faculty advisor for the study tour.

During the seven-weeks, students who will be participating in the second part of the course (the country tour) will choose topics to study and to be further discussed with policy makers in the country. They will also organize meetings with the relevant individuals in the country.

Part 2: Country Tour (1.5 credits)

This course is limited to approximately 20 students who are selected by IPSA and a faculty advisor during the previous fall semester. Those students who have completed PUBPOL674-001 and participated in organizing the trip (including fund raising), will travel to the chosen country during the U-M Spring Break and meet with individuals from a variety of institutions, based on their interests developed in the seven-week course. Upon their return, they will be expected to write a report and to produce web-site material and other deliverables for the Ford School in order to receive credit.

This course examines alternative approaches to the study of poverty and development. Attention is directed primarily to problems confronted in the global South, with some comparative perspective on Western industrialized countries. Policy choices are considered in view of the opportunities offered and constraints imposed by aid agencies and international organizations. This course provides a graduate-level, policy-oriented introduction to issues and problems in the area of international development. It exposes students contending approaches to international development/poverty, with the intent of helping them think critically and inspect the assumptions that underlie the various studies. A substantial portion of the course will be spent looking at questions surrounding politics and policies of bilateral and multilateral aid programs.

Connected Vehicles Stdzn Diff

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). In the realm of connected and automated vehicles (CAVs), there are trade-offs between standardization, which enhances compatibility and interoperability, and differentiation. Students will consider which CAV features should be standardized (or differentiated), how quickly standardization should be pursued, and what role regulation should play in standardization. Student teams will incorporate ideas from law, engineering, information, business, and other fields to develop an innovative tool.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Campus Sex. Misconduct Prev.

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Campus sexual misconduct affects many students in the U.S., with health, social, economic, and academic consequences. Universities struggle to fashion effective policies and other responses in the face of external political, legal, and social pressure. In this class, multidisciplinary teams of students will explore solutions to campus sexual misconduct, drawing on knowledge and expertise from law, nursing, public policy, social work, public health, sociology, education, organizational studies, and other disciplines to develop a novel solution to the problem.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Hum Rghts Mineral Supply Chain

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The extraction of minerals used to manufacture automobile components, including electric vehicle batteries, comes at a high cost. Multidisciplinary teams of students will study the human rights implications of this supply chain, and their research will be informed by auto industry, NGO, and stakeholder perspectives. Students will incorporate insights from international law, business, engineering, environmental sciences, technology, and other fields to develop a solution for industry to implement.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Challenges Deliver MI Soc Svcs

This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The federal government funds many crucial social services for the poor. However, individual states -- which are rarely the focus of policy debates about social services -- are usually responsible for overseeing the provision of those services. This course will focus on emerging challenges to the delivery of social services in Michigan, including Medicaid, food stamps, and TANF. Working closely with officials from the Michigan Department of Health and Human Services, students will devise potential solutions to problems with the administration of state benefits for vulnerable populations.

This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Non-law graduate/professional students may apply for the course using the PSI application system (<https://problemsolving.law.umich.edu/>) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu.

Budgeting and financial planning impacts nearly all aspects of organizational life in the public service arena. Indeed, few politicians and administrators are ever successful in accomplishing their goals without significant knowledge (or even mastery) of the budgeting process. This course focuses on understanding the theoretical foundations and hands-on applications related to budgeting. The course is organized into four major themes: (1) budget process and policy reform; (2) operating and capital budget development; (3) planning and program analysis; and (4) performance management. The course will utilize examples and exercises related to federal, state and local, and nonprofit organizations. In addition, the instructor periodically relies on speakers that are practitioner and consultants that work in the budgeting field.

Intro to Chinese Policy
Non-Ford students can enroll Ford elective courses beginning December 2.

This first portion of the course, held in Ann Arbor, will introduce students to China and its policy and economic environments. Drawing on the expertise of Ford School faculty and outside guests, each class will focus on a different policy area. Themes will include (but are not limited to):

- 1) Government and civil society (including the Beijing bureaucracy, local politics, and the role of advocacy groups);
- 2) Economic development (including business, the emergence of a middle class, and rural development projects);
- 3) Environmental issues (including the Three Gorges Dam, pollution problems, and "green" energy projects); and
- 4) US/China relations (including Chinese perceptions of the west, international security issues such as Taiwan, and trade).

This is a course in facilitating complex and difficult dialogic moments of engagement in the social, professional and institutional spheres of the public arena. Its purpose is to provide the possibility for actual engagement with tense social issues and phenomena bedeviling complex societies. It will briefly explore the historical and theoretical contexts, which give rise to sometimes painful and traumatic moments that filter in and color what may otherwise be perceived as simplistic conversations and interactions. It will introduce students?regardless of perceived color, gender, class, or ethnicity?to the necessity for transcending their subject locations. In order to facilitate, mediate, and engage in trans-formative moments of learning, dialogue, leadership and communal capacity building with due regard of difference and the respect of mutuality.

History, Reparations and Polic
Non-Ford students can enroll Ford elective courses beginning December 2.

Through the use of case studies, we will explore the history and social conditions that have spurred the call for reparations in the United States. The course will begin with an overview of the contemporary calls for reparations, which have generally been led by African American legislators, policy makers, activists and journalists. But as you will learn in this course, other communities and groups have aligned themselves with a call for reparations at various times, often driven by specific historical events. Moreover, as you will read and we will discuss, the call for reparations is not limited to the United States.

As a matter of social policy, some of the earliest claims followed the emancipation of nearly 4 million formerly enslaved African Americans. But the idea of reparations also included Native Americans who saw their lands claimed as they were sent first to the Indian territories in Oklahoma and ultimately reservations across the country. Here we must confront the question of sovereignty and the use and some may say abuse of treaties. Both the case studies of Native Alaskans and Japanese Americans add additional texture to the history of the battle for reparations in the United States.

To widen the lens a bit so that we can better understand the American story, we will take brief looks at Germany and South Africa as well.

Ultimately, we will return to today's public debates and ask and discuss whether there is a public policy case for reparations for African Americans. If so, which people of African descent? What should be the contours of the reparation?

Course meets on March 13 and March 20

Non-Ford students can enroll Ford elective courses beginning December 2.

The goal of this course is to enhance the students' ability to bring about the individual and organizational changes they want to see. This course begins by addressing (1) what effective managers really do and (2) why some high-potential managers succeed while others fail. As effective managers know, the ability to develop and manage relationships with others is critical to a manager's success. This course is based on three foundations: The first focuses on developing self-awareness. After all, managing relationships depends first and foremost on knowledge of individual personal strengths and weaknesses and the impact of these strengths and weaknesses on others. The second foundation focuses on developing an understanding of others. The third foundation focuses on managing specific types of relationships on the job—those with subordinates, peers, and bosses.

740 Leadership Assessment 0.50 ADVISORY

32504 PIRW SEM 001 W 4-550PM 1220 WEILL Lantz

The Ford School defines leadership as the behavioral process of having a positive influence on others, organizations and communications. This short course will meet 4 times, during which students will have the opportunity to take 1 or 2 different types of leadership assessments and then use them for self reflection and personal planning. The purpose of this course is to provide students the opportunity to take a moment to assess their current leadership traits and strengths, and create a tailored plan for building leadership goals and skills into the future.

Course will meet in person on the following dates:

Wednesday, January 15

Wednesday, January 22

Wednesday, January 29

Wednesday, February 5

741 Pr Fin&Glo Mkt 3.00 ADVISORY

31989 P RW SEM 001 TTH 830-950AM 1220 WEILL Hausman

Non-Ford students can enroll Ford elective courses beginning December 2.

Finance is fundamental to many public policy questions. When the financial sector works well, it transfers resources from savers to borrowers, allowing individuals to save and businesses to invest. But when the financial sector works badly, resources are misallocated and financial crises threaten the entire economy. This course provides an overview of financial markets and institutions, and then considers the causes, consequences, and possibly policy responses to financial crises.

744 Econ of Publ Sect 3.00 ADVISORY

31990 P RW LEC 001 TTH 830-950AM 1230 WEILL Stevenson

Non-Ford students can enroll Ford elective courses beginning December 2.

This is a course on how economists think about government revenue and government expenditures ? how governments raise and spend public money. Public Finance is a subfield of microeconomics. In the course, we will begin by delving more deeply into rationales for government intervention in the market, including public goods, externalities, and equity. We will then use the tools of economics to analyze a number of important public policy issues, such as public health insurance, social security, and anti-poverty programs. The second part of the course will cover tax policy, and we will explore how the burden of taxation is distributed, how taxes affect the economic behavior of individuals and firms, and options to reform the tax system. The course will cover the theory of public finance in depth, but the ultimate aim will always be to apply the concepts to real world policies and programs.

Toward that end, we will spend substantial time both inside and outside of the classroom applying the concepts and reviewing existing empirical evidence. The course focuses on the US, but we will discuss comparisons with other countries from time to time.

746 Welfare Policy 3.00 ADVISORY

28477 P RW LEC 001 MW 830-950AM 1120 WEILL Shaefer

Social Welfare Policy

Non-Ford students can enroll Ford elective courses beginning December 2.

This course examines U.S. social welfare programs and policies targeting the nonelderly poor, emphasizing what we know from social science research about the strengths and weaknesses and the intended and unintended effects of these policies. The course begins by addressing basic questions about the measurement and incidence of poverty in the U.S., and then surveys the scope of current social welfare programs. What does it mean to be poor in the U.S. today? How do the extent of poverty and income inequality and the scope of social welfare programs in the U.S. compare to those in other industrialized countries? A primary focus will be to explore changes to public provision for poor families that were adopted during the 1990s, including expansions of refundable tax credits, changes to the Supplemental Nutrition Assistance Program (formerly the Food Stamp Program) and public health insurance for children, and the 1996 welfare reform. A final segment of the course will examine how policies not primarily targeting poverty can nevertheless greatly impact disadvantaged families. This conversation will be embedded in work being conducted in Detroit by Poverty Solutions faculty experts. Course assignments include a policy analysis research paper in two parts (with a problem analysis and solution analysis), and a final examination.

750 Special Topics 1.50-3.00 ADVISORY

Topic: Introduction to Financial Technology and the Future of Financial Services

Non-Ford students can enroll Ford elective courses beginning December 2.

Throughout history, financial services has played a vital role in the global economy, and similarly, technology has been an integral part of financial services. Although the combination of financial services and technology isn't new, the advent of mobile technologies along with a post-financial crisis world have led to a financial technology, or fintech, revolution. New products and services have emerged, causing financial services to look very different

than it did 10, or even four, years ago. But fintech is still a relatively new industry, and many questions remain about the benefits and the risks of fintech, how it will impact incumbent institutions and systems, what it will mean for consumers, and how governments should view these developments. How are recent technological advances different than past innovations? How is technology changing financial services today and how will it change the industry in the future? What impact does this change have on stakeholders, including consumers? What are the benefits and risks of this change? This course will examine these questions and others.

29631 P RW LEC 002 TH 530-650PM 1220 WEILL Harris
 FinTech Entrepreneurship
 Topic: FinTech Entrepreneurship

Non-Ford students can enroll Ford elective courses beginning December 2.

Total global fintech investment increased from \$50.8 billion in 2017 to a full \$111.8 billion in 2018, according to KPMG's The Pulse of Fintech, and there are no signs that growth in this sector will slow down. What are the latest trends in fintech and how do innovators, entrepreneurs, and other stakeholders see the space developing? Beyond the general trends, how do fintech entrepreneurs, incumbents, and investors identify and assess opportunities in fintech? And what does the lifecycle of a fintech company? from ideation, to investment, to growth and maybe acquisition? look like? This course will provide a strong foundation for those with a working level of knowledge in fintech and who are interested in starting or investing in fintech companies.

 GreatDepressGreatRecess
 Topic: From the Great Depression to the Great Recession

Non-Ford students can enroll Ford elective courses beginning December 2.

Since the 2008 financial crisis, developed countries have suffered high unemployment and slow growth. What are options for policymakers in this environment? This course will analyze central issues in macroeconomic policymaking through the lens of history. Students will apply analytical tools to understand the consequences of monetary, fiscal and financial market policy in the Great Depression, in Japan after 1990, and in the current Great Recession.

28975 P RW LEC 004 W 4-650PM 1230 WEILL Udow-Phillips
 Health Insur Reform US
 Topic: Health Insurance Reform in the U.S.

Non-Ford students can enroll Ford elective courses beginning December 2.

Taught by Marianne Udow-Phillips, the Executive Director of the Center for Healthcare Research & Transformation (CHRT) at the University of Michigan.

This course will explore the history, structure and politics around health insurance in the U.S. The course will include policy analyses of health insurance with a focus on the underlying policy, political and philosophical issues related surrounding the financing reform debate in private health insurance, Medicaid and Medicare. In addition, the course will provide an overview of the basic features of private health insurance: from rating and underwriting practices, to operational challenges and requirements, to cost and quality controls. Some comparison will also be provided to international systems as a means for better understanding the unique aspects of the American system.

29053 P RW LEC 005 TTH 230-350PM 1110 WEILL Hampshire
 Smrt Citi Future Mobility
 Topic: Smart Cities and the Future of Mobility

Non-Ford students can enroll Ford elective courses beginning December 2.

What are smart cities? What makes them smart? Are they equitable and accessible? The aim of this hands-on applied policy course is to introduce students to smart cities and the rapidly evolving mobility ecosystem. The transportation/mobility system is a major component of a smart city. Hence, this course will focus on the rise of the new mobility ecosystem which includes micro-transit, autonomous vehicles, ride-hailing, bike-sharing, car-sharing, electric scooters, smart parking, etc.

The course will take a people centered approach to the technology, management and policy analysis for smart cities and the mobility ecosystem. We will take a critical approach that is concerned with ethics, values, human development and equity. The course features guest lectures from experts in smart cities and the new mobility space. Additionally, the students will participate in applied hands-on real world policy projects. This course welcomes students from across the university. To achieve the learning objectives of this course students will participate in class discussions, complete short weekly reflections on the readings, and conduct a final project.

 Diversity in Higher Ed
 Topic: Diversity Initiatives in Higher Education

Non-Ford students can enroll Ford elective courses beginning December 2.

The Diversity Initiatives in Higher Education course will provide graduate students with insight into policy issues related to diversity and inclusion efforts at public institutions in the United States. This course will expose students to a range of topical issues related to strategic and policy approaches to diversity in higher education and provide consideration for leadership who orchestrate organizational change. The course will provide students with a framework for examining organizational change initiatives such as the role of vision and mission in organizations, values conflict, and stakeholder management.

Students will engage with these issues through course readings, class discussions, and reflection on personal leadership behaviors. In addition, students will interact with personnel leading organizational change at the University of Michigan by analyzing current campus policies and strategic and policy responses to challenges they

face.

 Exercising Influence
 Topic: Exercising Influence: Corporate, Governmental, and NGO Diplomacy

Non-Ford students can enroll Ford elective courses beginning December 2.

The course is designed to explore through readings, exercises and discussion how governments, corporations and civil society influence each other to shape foreign policy outcomes. We will take up six big international issues, role-play the interactions, discuss the issue and players in detail, and identify potential solutions to the problem and how they might be reached. The goal is to understand how to work major foreign policy issues, how to craft strategies, identify allies and obstacles, how to advocate effectively to gain support with a view to resolving issues in the real world. In addition to the instructors, we will invite knowledgeable outsiders to provide briefings and answer questions during class.

Politics of 2020 Census
 Topics: Moving Power and Money: The Politics of the 2020 Census

Non-Ford students can enroll Ford elective courses beginning December 2.

Course meets on March 10, 12, 17,19, 24.

Census Lab meets: March 12 and March 19 only.

The United States has had the longest continuing history of census taking in the world. It is in our Constitution with the express purpose of redistributing power across the states every decade. It is also used to geographically distribute funds. The census is inherently political because of the redistribution of power and not surprisingly there have been controversies over time including who and where people should be counted, differential undercount of the population, confidentiality of responses, and what census methodology is appropriate for the Census Bureau to employ.

This course will cover the history of census procedures, questions, apportionment, and controversies, with a particular focus on the 2020 Census. The course will consist of 5 lectures and 2 labs.

The grade in the class will be based on assignments completed during the labs and a short 2-page policy brief based on content covered in the lectures/labs. The lab assignments will use data from the Census Bureau to explore issues presented in the lectures. No statistical expertise or programming ability is required for the course.

Campaign Finance Reform
 Topic: Campaign Finance Reform

Non-Ford students can enroll Ford elective courses beginning December 2.

Federal election spending from all sources has doubled over the last twenty years and the 2018 election continued the trend. Campaign spending in the midterms exceeded \$5 billion for the first time, much of it coming from Super PACs and "dark money" organizations unfettered by federal regulation. Spending in many state elections has followed this trend. But is that a bad thing? We will begin the course by reviewing the campaign finance system at the federal level. We then examine critically the basic claims used to justify campaign finance regulations. What is the social scientific evidence that spending, by candidates or independent groups, influences election outcomes? What is the evidence that contributions influence elected officials post-election? What is the case against regulation? Do restrictions on campaign contributions and spending violate the First Amendment protection of free speech? In the second half of the course, we will consider the constitutional and practical merits of various campaign finance proposals at the local, state, and federal level. Students will work in teams to evaluate campaign finance policy in a particular state or locality and write policy briefs to public officials on how to improve their campaign finance system, then defend their recommendations in a public forum.

754	Res Sem Sci Tech PP			1.00-3.00	
17493	P RW SEM 001	W	130-3PM	220 CHRYS	Duderstadt, Graff

**Section -001 is a one credit course requiring attendance at the seminar from 1:30 to 3:00 in room 220 Chrysler.

**Section -002 is a three credit course requiring both attendance at the seminar and attendance at a discussion session from 12:30 to 1:30 (151 Chrysler), as well as a term project.

The aim of this course is to introduce students to topical issues in science and technology policy. The course will meet weekly for a formal seminar. Those currently in the science policymaking arena as well as experts in applied science policy research will be invited to campus to participate as seminar speakers. By interacting with those active in science policy circles, it is hoped that students will gain a real appreciation for the processes and underpinnings of current national science policy.

The course will be offered as a 1 credit seminar course and as a 3 credit seminar/discussion course. Students enrolled in the 3 credit course will also take part in discussion sessions to follow-up the seminar presentations, as arranged by the instructor. In addition, these students will be expected to write a term paper on one of the issues covered in the seminars and give a brief presentation late in the term.

Students enrolled in the Science, Technology, and Public Policy (STPP) Graduate Certificate Program must take this course for 3 credits.

756	Local Gov:Opp Activ				3.00		
34394	P RW LEC 001	TTH	230-350PM	1210 WEILL	Hieftje		

Non-Ford students can enroll Ford elective courses beginning December 2.

Taught by John Hieftje, former Mayor of Ann Arbor.

Cities are leading the fight against climate change. Around the world they are experiencing the devastating effects as hurricanes intensify, sea levels rise, ?heat islands? multiply and storm water systems are overwhelmed, along with city budgets. And yet, people are flocking to cities to experience their booming economies, plentiful jobs and exciting cultural communities. But for every successful city, there is a downside as gentrification spreads and all but the wealthy are forced to move further out as housing prices rise. The need for better transportation into and within cities has never been greater. Our federal government offers no help. In response a new generation of activists are pushing elected leaders to respond. This class will hear directly from activists, state and local elected leaders and top professionals in their field. Finally, students will develop and host the first debate of the 2020 campaign for Ann Arbor City Council.

This course is available only to Social Work, Nursing, and Education students. SW students must request enrollment under SW 540. Nursing students under HS 540; Education students under EDUC 540. This course is by departmental consent only.

This is a hybrid course which means that you will have a combination of web-based class sessions and face to face class sessions. This course will meet in person, in class on February 22 and all pre-learning work must be complete prior to this required session.

Outside of Class Pre-learning Work begins: 1/15/20

All Day Workshop: 2/22/20 at 426 North Ingalls Bldg, NIB1000

Outside of Class Post-work ends: 2/28/20

Please refer to Canvas or contact the course instructor for the additional required class assignments that must be completed outside of the in-person meeting.

SW students: For possible permission to register the Permission Request form for Trauma Basics (540) must be submitted: <https://ssw.umich.edu/my-ssw/class-related-forms>

For priority in consideration of possible enrollment permission submit the form by November 14, 2019.

Additional Info - In an era of evidence based practice, community workers, advocates, and evaluators will likely find that they need to interpret and visualize data from a wide variety of sources. Understanding, interpreting and visualizing data (including some basic coding) can make the difference in successfully or unsuccessfully advocating for communities, clients or programs, and for understanding the impact of programs on clients. Increasingly, data relevant to community, participant and client well-being are available from a broad range of sources, whether those be databases of volunteers and donors, the Census, the World Bank, in addition to many others. This course will be focused on the acquisition of concrete applicable skills and strategies for interpreting and visualizing community data, including learning in R, Tableau and QGIS.

Africentric Ap Prac Afr Am Fam				
New Leaders in African-Centered Social Work Scholars are expected to enroll in this class but it is open to other students.				
This course will apply African-centered values and principles in historical and contemporary context to the implementation of traditional methods in interpersonal practice with African American families. The course is bounded by a strengths and resilience framework in which students will 1) obtain an overview of the African worldview and the history, culture, and contributions to world civilization of African-descended people; 2) become familiar with literature that exemplifies the integration of the Africentric perspective in practice with African American families; and 3) utilize the case study method to apply knowledge gained. The course will be offered in a seminar format in which students have an active role in structuring their own learning, building on content delivered by guest lecturers and utilizing relevant reading materials (course pack), experiential activities and electronic media.				
33747	P LEC 003 F 12-1PM 1794 SSWB	Barinbaum		
Interprofes Educ Exper Seminar				
In this course, students will participate on an interprofessional team at the student-run health clinic in Pinckney, MI a minimum of 3 times in the term. They will also meet for individual and group supervision meetings with the course instructor throughout the term. Students will gain skills in interprofessional teamwork and communication. Students should enroll in 1 credit hour only.				
Pre-requisite: SW 515/531				
33812	P LEC 004 W 2-5PM 2629 SSWB	Chatters		
Rac&Ethn Health Dispar/Inequal				
This course examines disparities and inequities in acute, chronic, mental and physical health status and outcomes for diverse racial and ethnic groups in the United States. The life course health development (LCHD) framework and intersectionality and health equity (HE) perspectives are major organizing themes. Course content includes exploration of the socio-historical background and structural drivers (e.g., racism/White supremacy, sexism, colonialism) of health disparities/inequities and critiques of current explanatory models and frameworks (e.g., behavioral/lifestyle, Weathering Hypothesis, social determinants of health, structural factors, and systems perspectives). Students will gain an understanding of ethical and professional imperatives for confronting racial and ethnic health disparities/inequities and Social Work roles and strategies for their eradication.				
36017	PD LEC 005 ARR ARR	Crabb		
Prep for National SW Practice				
This class is to prepare National Community Scholars for professional practice outside of and away from the University Social Work community. We will examine the organizations where students are placed so that students are prepared to start quickly. Students will participate in trainings about entering and exiting communities and will examine the impact of their positionalities, assumptions, values and identify a practice framework that is ethical, relevant and effective to their new community setting. Students will explore skill sets available to learn in their new setting and identify how they might learn them in their national placement.				
714	Team-Based Decisions	2.00		
23407	PD REC 001 W 3-5PM 1840 SSWB	Brewster, Eldredge		
Registration is limited to Pharmacy, Social Work, Dentistry, Medical, and Nursing students who are eligible to enroll. Students will be assigned to an interdisciplinary group that will rotate between different buildings across campus. An email notifying students about their group and room assignments will be sent before the first class meeting.				
Social Work students: Priority is given to Detroit Clinical, Integrated Health, and HRSA Scholars. Scholars will receive an electronic permission to enroll in this course prior to registration. All others interested should submit the Course Enrollment Petition via the SSW web site, https://ssw.umich.edu/my-ssw/class-related-forms

Connected Vehicles Stdzn Diff This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). In the realm of connected and automated vehicles (CAVs), there are trade-offs between standardization, which enhances compatibility and interoperability, and differentiation. Students will consider which CAV features should be standardized (or differentiated), how quickly standardization should be pursued, and what role regulation should play in standardization. Student teams will incorporate ideas from law, engineering, information, business, and other fields to develop an innovative tool.							
This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.							
Non-law graduate/professional students may apply for the course using the PSI application system (https://problemsolving.law.umich.edu/) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu .

Campus Sex. Misconduct Prev. This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Campus sexual misconduct affects many students in the U.S., with health, social, economic, and academic consequences. Universities struggle to fashion effective policies and other responses in the face of external political, legal, and social pressure. In this class, multidisciplinary teams of students will explore solutions to campus sexual misconduct, drawing on knowledge and expertise from law, nursing, public policy, social work, public health, sociology, education, organizational studies, and other disciplines to develop a novel solution to the problem.							
This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.							
Non-law graduate/professional students may apply for the course using the PSI application system (https://problemsolving.law.umich.edu/) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu .

Info Privacy, Survl. Exposure This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). Today's information and communication technologies create opportunities for surveillance, tracking, and privacy infringements. Students will learn about privacy risks that a variety of exposure-sensitive populations face, including marginalized groups, immigrants, journalists, abuse survivors, and children. Multidisciplinary student teams will leverage insights from design thinking, law, information, public policy, and other disciplines to develop novel privacy solutions for such susceptible groups.							
This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.							
Non-law graduate/professional students may apply for the course using the PSI application system (https://problemsolving.law.umich.edu/) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu .

Hum Rghts Mineral Supply Chain This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The extraction of minerals used to manufacture automobile components, including electric vehicle batteries, comes at a high cost. Multidisciplinary teams of students will study the human rights implications of this supply chain, and their research will be informed by auto industry, NGO, and stakeholder perspectives. Students will incorporate insights from international law, business, engineering, environmental sciences, technology, and other fields to develop a solution for industry to implement.							
This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.

Challenges Deliver MI Soc Svcs This class is an interdisciplinary problem solving class offered at the Law School through the Problem Solving Initiative (PSI). The federal government funds many crucial social services for the poor. However, individual states -- which are rarely the focus of policy debates about social services -- are usually responsible for overseeing the provision of those services. This course will focus on emerging challenges to the delivery of social services in Michigan, including Medicaid, food stamps, and TANF. Working closely with officials from the Michigan Department of Health and Human Services, students will devise potential solutions to problems with the administration of state benefits for vulnerable populations.							
This class is open to all University of Michigan graduate and professional students. Please note: Non-Law students are responsible for checking with their own schools, colleges, or units to learn if a PSI class will count toward graduation or other departmental requirements.							
Non-law graduate/professional students may apply for the course using the PSI application system (https://problemsolving.law.umich.edu/) November 4-18, 2019. After the initial application period, students seeking to apply can contact problemsolving@umich.edu .

Course Description

Traditional cooking methods in Sub-Saharan Africa are typically inefficient. Basic, hand built cook stoves can reduce firewood use by 50% improving forest health and reducing girl chores. Eco-Explorers will meet once a week during winter term in preparation for a 3 week June Design Build trip in Tanzania. Language and cultural preparation, test stove design build and design process documentation will be completed prior to the field component. The June trip will include a study tour to major wildlife park areas of Tanzania, a project site visit to a Peace Corps Volunteer and 2 weeks living with Masai families during the design / build process. Enrollment by application / permission of instructor.

Course Description							
Through intensive studio sessions, this course focuses on drawing from the live model, both clothed and unclothed. Students investigate ways the figure is used and referenced in the work of contemporary artists and explore strategies for using the figure in drawings that are creative and expressive in nature. The goals of this course include gaining a better understanding of the figure and its significant role in the history of art, improving figure drawing skills, and pursuing unique methods of personal expression through the use of the figure in drawing.
