17221	A R LEC 001 W			1230-130PM	2918 COOL	Kripfgans, Swanson, Xu, Dewaraja, Chan, Goodsitt			

It is CRITICAL that students attend class from the beginning. Each laboratory session provides hands-on instruction and requires reserved time on a particular imaging system, making attendance for each class mandatory. If traveling during the winter break, plan ahead and allow sufficient time in order to be present at the start of the Winter Term.

First four classes will be held in 2185 LBME, the following locations will be provided by instructor.

Remote Sensing

Introduction to the use of electromagnetic remote sensing to study planetary atmospheres and surfaces from space. Topics include: 1) interactions between geophysical properties and propagating electromagnetic waves; 2) design of orbiting sensors to measure them; 3) interpreting the measurements to estimate the geophysical properties.

Intro to Smart Infrastruc Sys												
Provides a graduate-level introduction to (1) infrastructure system design principles, operations, and security and (2) how these systems are modeled and analyzed. Intended as a first course in infrastructure modeling both for those seeking to model infrastructure in practice and those planning to pursue more in-depth training and research in other courses.												
30506	P LEC 067	MW	130-3PM	1024 FXB	Filipov			7				Y
Dynamc Cntrl Connected Vehicle												
This course covers the theory, analysis, and design of deployable and reconfigurable structures. A review of existing and emerging structural systems will cover bar linkages, pantographs (scissor mechanisms), origami structures, and bi/multi-stable units. Conceptual topics will include deployment kinematics, stability, geometric constraints, mechanical behaviors, energy formulations, and matrix analysis of the systems. Practical areas discussed in the course will include structural design, material systems, actuation technologies, and fabrication methods. The course will include a student project to explore engineering applications of the structures in architecture, aerospace, robotics, and beyond.												
35851	P LEC 071	TTH	330-5PM	136 EWRE	Steglitz			12				Y
Engr Soln to Drinking Wtr Chal												
Students will learn about water quality parameters and how they influence application of water treatment technologies, using the City of Ann Arbor's Water Treatment Plant as a backdrop. Students will learn about the history of the safe drinking water act and how drinking water regulations have impacted utilities and technology application. The course will involve a group project where students will be assigned a treatment problem and the groups will develop a technical memorandum typical of a consulting engineer, as well as an oral presentation of their final recommendations. The class will involve a lab at the City's Water Treatment Plant where students will have a hands on experience with water treatment processes.

Bioinspiration Nature is full of biological organisms that are specialized for specific tasks. By examining the process by which natural selection shapes biological forms, we can learn from nature to inspire technological design. This course will explore biological strategies for swimming, flying, terrestrial locomotion, adhesion, sensing, and construction. This will be an interdisciplinary endeavor with team-based robotic design projects.											
27382	A LEC 002	TTH	130-230PM	1050 FMCRB		Moore

Focus on Fundamentals (DIS 016): Regular attendance is expected for students who enroll in this discussion. The "Focus on Fundamentals" discussions will meet for two hours each week instead of one, to provide additional time to review and solidify concepts from the week, and apply these concepts to practice problems. The additional time will allow for more discussion, working through practice problems at a slower pace, and more time for student questions. There will be a focus on working through practice problems in small groups.

STUDENTS MUST ELECT LAB AND LECTURE SECTIONS. CSE Majors and Minor only. Course will open to EE UG who meet course prerequisites on December 14, 2021.					Honeyman			
22545	S R LEC 002	MW	1030-12PM	1571 GGBL				
The remote lecture section (LEC 3) is being offered because of classroom capacity constraints. Students in the remote section still must attend the exams in-person. Students in the remote sections are welcome to attend lectures in-person whenever there are seats available. Regardless of the section enrolled in, students can choose to consume lecture and discussion material remotely via lecture recordings and notes posted to Canvas.

STUDENTS MUST ELECT DISCUSSION AND LECTURE SECTIONS. EECS Undergraduate Majors. Remote lecture 002 section is added to allow the class to enroll students beyond the assigned lecture room capacity. All students in both sections will have access to the lecture recordings and in-person lecture attendance is optional. The students in the remote section can also attend the in-person lecture if there is seating space. Office hours may be in-person or remote.

23893	ADR LEC 100	W	5-6PM	2104 A&AB	Rush, Chavasse she-her-they, Willis, Thompson, Moldwin			
In this course sponsored by ArtsEngine, students explore the creative process through a structured sequence of exercises in four studio modules: sound, motion, visual images/objects, and verbal/symbolic language. Faculty from Art & Design (Andrew Thompson); Music, Theatre & Dance (Amy Chavasse); Architecture (Gregory Saldana); and Engineering (Jeremy Bond) introduce a variety of creative strategies for generating problem solving ideas through hands-on projects. Weekly colloquia (Stephen Rush), discussions, and readings supplement projects. Grading is based upon attendance, class participation, a journal, four mini-projects, evidence of intellectual and creative process development, and a final culminating project. This course is appropriate for UM undergraduate students at all levels and in all disciplines. It is a fast paced, information-rich educational experience, offering insights that will make creativity and innovation an integral part of life and work.								
STUDENTS ELECTING LAB (102-105) WILL BE AUTO-ENROLLED IN LEC 100 & DIS 101 (meditation session, which is optional).

Making Things: Three Million Years of Materials and Culture This course explores the connections between the discovery of new materials -- such as ceramics, concrete, precious stones and metals, glass, steel, plastics, and semiconductors -- and social transformations worldwide. To see these connections, the course will fuse basic concepts in materials science and engineering with perspectives and methods from anthropological archaeology.

Advanced Biomaterials
Advanced Biomaterials.

Biomaterials have important roles and growing impact on broad applications, including medical devices, implants, regenerative medicine, tissue engineering, sensors, diagnostics, and drug delivery. This graduate level course is designed primarily for graduate and senior undergraduate students in engineering or biological sciences, as a complement to BME 410. It will cover both basic concepts and contemporary concepts and applications in advanced biomaterials.

Soft Robotics Materials
Soft Robotics Materials

While traditional robots are typically composed of rigid and brittle materials, the growing field of soft robotics explores flexible and deformable materials to achieve compliance and properties akin to that of biological systems,

CAT#	Course Title					CR	PREREQ	LAB FEE		
Class #	CODE CMP SEC	DAYS	TIME	LOCATION	INSTRUCTOR			OPEN SEATS	WL	
safer for physical interaction with humans and for operation in dynamic environments. However, the use of soft materials in robotics restricts traditional approaches in design, actuation, and power, especially at milli- and microscales. This course will explore the fundamentals and new approaches in soft actuation across length scales, with focus on leveraging the properties and structures of soft materials for programmable complex actuation. Topics will cover soft materials design, tethered/untethered actuation methods, microscale actuation, and applications of soft robots and microrobots.										
29230	P LEC 033	W	5-8PM	2150 DOW	Shtein			22		N
Tech-Driven Innov. and Bus.										
Technology is the "lever of riches," historically responsible for economic development and global improvement in the standard of living. In the 20th and 21st centuries, particularly in the US, tech-driven innovation has created more wealth than in all the preceding epochs combined. However, in the process, the over-reliance of traditional heavy industries on natural resources and the associated adverse climate change have presented challenges and opportunities for technological innovation that can create prosperity, but do so more sustainably. This course considers the key questions on the path of technology commercialization, links technology attributes with viable business models, and applies these insights to guide research and development activities.										
29233	P LEC 034	TTH	1030-12PM	185 EWRE	Thornton			24		N
Data-Driven Matls Design & Gen										
The Materials Genome Initiative (MGI) is an ongoing U.S. initiative to discover, manufacture, and deploy advanced materials twice as fast, at a fraction of the cost. MGI efforts are enabled by a synergetic combination of computational modeling, experimental tools, and large-scale materials informatics, employing methods such as high-throughput computing, data- and simulation-driven materials optimization, and knowledge discovery in materials databases. In this course, students will learn how to design a MGI research project and take a first step toward executing it. State-of-the-art methods in computational materials science, statistical analysis, supervised and unsupervised machine-learning, and data visualization will be covered, with computational labs to develop proficiency in these techniques. Students will use Python to access big-data from existing materials databases and also review examples of MGI efforts in the design of battery materials, structural alloys, etc. A capstone project will provide an opportunity for students to design and propose new MGI initiatives.

Literature, Sci, and the Arts

NOTE--IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, DEPARTMENTS MAY GIVE AWAY STUDENT'S PLACES IN A COURSE IF THEY DO NOT ATTEND:
 ---THE FIRST MEETING OF BIOLOGY, CHEMISTRY, AND PHYSICS LABORATORIES;
 ---THE FIRST MEETINGS OF HISTORY 396 AND 397;
 ---EITHER OF THE FIRST TWO MEETINGS OF ENGLISH COURSES;
 ---EITHER OF THE FIRST TWO MEETINGS OF ANY COURSE OFFERED BY THE DEPARTMENT OF ROMANCE LANGUAGES;
 ---THE FIRST TWO MEETINGS OF COURSES IN OTHER DEPARTMENTS.

AT THE SAME TIME, DEPARTMENTS ARE NOT OBLIGATED TO WITHDRAW STUDENTS OFFICIALLY FROM THE COURSE, EVEN THOUGH THE STUDENT HAS BEEN INFORMED THAT HIS/HER PLACE IN A COURSE HAS BEEN TAKEN AWAY. STUDENTS ARE RESPONSIBLE FOR THE ACCURACY OF THEIR SCHEDULES AND MUST BE SURE THAT ALL DROPS ARE PROCESSED THROUGH THE REGISTRATION SYSTEM DURING THE NORMAL DROP/ADD PERIOD.

This special section will include activities and discussions informed by dialogic pedagogy. Of interest to students who would like to explore topics of social identity and social justice, this section will allow them to make connections between course content and current conversations around issues of race and ethnicity. Students who participate in the section can earn credit towards the Minor in Intergroup Relations Education.

English Language Institute

English Language Institute (ELI) Open Sections

ELI courses fall into three categories:

1. English for Academic Purposes courses for graduate students;
2. Language and teacher training courses for international GSIs;
3. Teacher training courses for students planning to teach ESL in local communities or abroad.

For assistance in choosing an appropriate course, please go to the ELI Academic Advising website:
<http://bit.ly/eliadvising> or e-mail: eliadvisor@umich.edu to make an appointment to speak with an advisor.

History Department

History (HISTORY) Open Sections

--IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, THE DEPARTMENT MAY GIVE AWAY PLACES IN A COURSE IF STUDENTS DO NOT ATTEND THE FIRST TWO COURSE MEETINGS.
 --ALL STUDENTS MUST TAKE ACTION THROUGH THE REGISTRATION PROCESS TO MAKE SURE THAT THEIR OFFICIAL COURSE SCHEDULES MATCH THE COURSES THEY ARE ATTENDING.
 --100 THRU 500 LEVEL 4 CREDIT HOUR COURSES ARE 4 CREDIT HOURS FOR UNDERGRADUATES ONLY.
 --SURVEY AND INTRODUCTORY COURSES ARE FOR FRESHMEN AND SOPHOMORES.
 --SURVEY COURSES REQUIRE BOTH LECTURE AND DISCUSSION SECTIONS. DISCUSSION SECTIONS DO NOT MEET UNTIL AFTER FIRST LECTURE.

Mathematics Department

Mathematics (MATH) Open Sections

---MATH DEPARTMENT POLICY REQUIRES THAT STUDENTS ATTEND BOTH OF THE FIRST TWO CLASS MEETINGS (OR NOTIFY THE INSTRUCTOR IN ADVANCE OF THEIR ABSENCE) OR THEY MAY BE DROPPED FROM THE CLASS.
 ---ALL STUDENTS MUST TAKE ACTION THROUGH THE REGISTRATION SYSTEM TO MAKE SURE THAT THEIR OFFICIAL SCHEDULE OF COURSES MATCHES THE COURSES THEY ARE ATTENDING.
 ---MATHEMATICS DEPARTMENT POLICY LIMITS STUDENTS TO A MAXIMUM OF 4 CREDITS FOR COURSES NUMBERED BELOW 112.

Romance Languages Department

French (FRENCH) Open Sections

--DROP POLICY: A student who misses either of the first two meetings of any course offered by the Department of Romance Languages may be dropped from the course for non-attendance.
 --PLACEMENT TEST: Students with any previous study of French must take the French placement test before enrolling.
 Placement test dates are online at:

www.lsa.umich.edu/rll/undergraduate/languageplacement/languageplacementtests.

This does not apply to students enrolling in French graduate-level courses.

--OVERRIDE REQUEST INFORMATION:

www.lsa.umich.edu/rll/langinstruct/overrides.html

101	Elementary					4.00	ADVISORY, ENFORCED		
23406	PIR REC 002	TF	9-10AM	REMOTE				3	Y
101	Elementary					4.00	ADVISORY, ENFORCED		
	P R REC 002	MTH	9-10AM	1509 NUB	Kreps			3	Y

For students with no previous study or by placement. Students with any previous study of French or prior instruction in French must take the placement test before enrolling. Students with any prior French experience that do not take the placement exam and self enroll in French 101 will be dropped from French 101.

The textbook Portails can be purchased through the online bookstore or directly from the publisher at <http://vistahigherlearning.com/store/umichigan.htm>.

For Winter 2022: This class will meet in-person Mondays & Thursdays, and remotely on Tuesdays & Fridays. Remote class meetings will be held synchronously with the times listed for the class. Students are expected to be available during all scheduled class times.

Also, please note, the schedule for *French 102* is changing -- starting in Winter 2022, French 102 will be offered only in Winter terms. French 102 is the next course in the sequence after French 101.

100	Practice of Writing	3.00							
18419	PI REC 001	TTH	3-4PM	1155 NQ	Conway			12	Y
<p><P>Writing 100 is designed to help students of all levels improve their writing, but is best suited to those who have yet to fulfill the First-Year Writing Requirement. Upper-level students should have a compelling academic reason for enrolling in Writing 100.</P></p> <p><P>Normal waitlist procedures apply for students who attend the first two classes. Students who wish to join Writing 100 after the first two class sessions must email the instructor to set up a meeting to discuss enrolling. Based on this discussion, the student and instructor will then make a determination on whether or not it is appropriate for the student to enroll.</P></p>

Students MUST have completed SOC 225 or an equivalent community-engaged course, preferably within the last year. It is also recommended that students take SOC 310: Sociological Research Methods or an equivalent research methods course prior to enrolling in SOC 325, but this is not required. Students will be required to submit an application and be approved by the Faculty Director in order to receive an override to enroll in the course.								
Please complete the SOC 325 application. You will be contacted within three business days after completing the SOC 325 application.

This lab is a CSP lab. CSP sections are scheduled for more hours per week than a routine section of the same course. Some of that time is devoted to workshop activities, e.g., problem solving, practice tests, review of assignments and instruction in learning skills. There is also provision for more individual instruction in the form of additional office hours, instructor conferences, appointments with a Course Assistant, etc.

Program in Biomedical Sciences

Biomedical Sciences (PIBS) Open Sections

504	Rigor in Research							1.00		
28388	P DIS 001		T		1-3AM	ARR	Barolo		52	N
This class will be taught several times over the course of the semester, much like PIBS 503, students will only need to attend one session. Sessions will be posted for sign up after January 4th.										
600	Biomed Sci Ind Std							1.00-8.00	ADVISORY	
	IND +					ARR	ARR		5	N
722	Manuscript Writing							2.00		
28595	P LEC 001		W		3-430PM	ARR	Puthenveedu		21	N
class room is yet to be determined for 2022										
800	PIBS Seminar							1.00		
21318	P R SEM 001		T		4-5PM	ARR	Barolo		13	N
class held in										
This course is for first year PIBS students only. Class will be held in NLH Med Sci II										

Cancer Biology Graduate Program

Music, Theatre & Dance

--Performance Instruction in the School of Music (Individual Studio Assignment in Music Performance): All students requesting performance instruction must apply online at <https://smt.d.umich.edu/current-students-2/policies-procedures/academic-procedures/#mfw-accordion-action-11>, click on the 'students' tab and then click on the 'online individual studio assignment in music performance' form. Do not register until you have received an email verifying placement in a studio.

Department Of Dance

Dance (DANCE) Open Sections

100	Intro to Dance					1.00	ADVISORY			
19850	P LAB 001	MW	9-10AM	DANCE STUDIO 1	West			13		Y
Modern										
Taught by dance students enrolled in DANCE 482.										
20117	P LAB 002	MW	9-10AM	DANCE STUDIO 2	O'Donnell she-her			16		Y
Improvisation										
In this class, we will practice several methods of dance and movement improvisation using prompts, narration, sound and sensation, guided sessions, games of chance, journaling, and more. Sometimes, we will focus on process over product. Other times, we will explore how improvisation can help us to generate structured material. We will work individually and in groups, offering supportive feedback and discussion along the way. No prior dance experience is necessary.										
20118	P LAB 003	MW	9-10AM	DANCE STUDIO 3	Taylor			19		Y
Afro-Fusion										
20119	P LAB 004	MW	2-330PM	DANCE STUDIO 3	O'Donnell she-her			17		Y
Contemporary										
In this class, we will move together, learn original choreography, practice improvisation, and experiment with some low pressure creations of our own. We will keep journals and discuss our curiosities, desires, and discoveries in the field of contemporary dance. We will survey influential choreographers and companies, look at historical artistic movements and methods, and view performances to deepen our understanding of what contemporary dance is and where we might see ourselves within.										
20120	P LAB 005	MW	9-10AM	DANCE STUDIO 4	Mitchell			15		Y
Intro to Tap										
This is an introductory level course that will cover the history and fundamentals of tap dance. We will focus on rhythm, musicality, and basic tap technique. We will also discuss the evolution of tap dance from its folk origins to the hoofing and Broadway styles popular today. This class will improve your rhythm, coordination and expand your knowledge of American tap dance. No prior dance experience is required. Tap shoes are recommended but not required. The class will culminate in a virtual performance of the historic tap dance the Shim Sham Shimmy.										
20122	P LAB 007	MW	1-2PM	DANCE STUDIO 4	Taylor			15		Y
Healing Dance and Drum Circle										
20124	P LAB 009	TTH	9-10AM	DANCE STUDIO 3	Beck			16		Y
Intermediate Ballet										
20125	P LAB 010	TTH	9-10AM	DANCE STUDIO 4	Rutherford			22		Y
Afro-Jazz										
20126	P LAB 011	TTH	10-1130AM	DANCE STUDIO 4	Mitchell			2		Y
Body Language & Jazz Funk										
Body Language is a course that uses movement to empower one to explore their sensuality. The class encourages people of all shapes and sizes to embrace their body as a beautiful instrument for dance resulting in the development of full-body awareness and connection. You can expect to reflect on your personal ideas of sensuality and sexuality, explore how to embody sensuality through movement, and learn to fully express your sensuality through dance choreography. The class will focus on posture, walking/moving with confidence, musicality, dynamics, isolations, undulations, lines, and increasing flexibility and strength. Heels are encouraged but not required. This class will also discuss Body Language's relationship to and definition of commercial dance and explore commercial dance in comparison to concert dance.										
20284	P LAB 012	TTH	12-1PM	DANCE STUDIO 3	Davis			13		Y
Intro to Modern										
20312	P LAB 013	TTH	1-2PM	DANCE STUDIO 3	Rutherford			14		Y
Afro-Contemporary										
20897	P LAB 014	TTH	4-5PM	DANCE STUDIO 4	Wilson			15		Y
Modern										
Taught by dance students enrolled in DANCE 482.										
28232	P LAB 015	TTH	12-130PM	DANCE STUDIO 2	Howard			15		Y
Contemporary										
37882	P LAB 016	TTH	4-5PM	DANCE STUDIO 2	Howard			12		Y

Acting								
In this course, performers will take a deep dive into their acting practice - no need for prior training. It will be wild, messy, fun and intense. This course will challenge you to look deeply into the moment at hand and to activate how you bring your truth into space and being. We will explore Sanford Meisner exercises that guide performers to listen more astutely to themselves and their partners, and will engage in practices that enliven the power of imaginary circumstances. Additionally, we will collectively tackle scene study analysis, parsing the intentions and guiding forces at play in the characters, the space, and the moment. The course will culminate with the preparation and performance of a monologue.								
19583	PD LAB 003	F	10-12PM	DANCE STUDIO 3	Whyatt		24	Y
Franklin Somatics								
This Franklin Somatics Lab will focus on dynamic neuro-cognitive imagery and movement education based in the Franklin Method. This is a scientifically studied and practiced way to utilize the plasticity of the brain, via imagery, to improve physical function, strength, mobility, coordination and performance. Based in Ideokinesis, students will utilize mental imagery, structural anatomy, biomechanics and movement to bring awareness to and improve dance movement performance.

PBT Conditioning								
Progressing Ballet Technique (PBT) is a body-conditioning and strengthening program for dancers of any form of dance, as well as athletes. With the use of exercise balls and a theraband, the class will focus on core strength, weight placement, and alignment of the body that triggers muscle memory. This course helps with injury prevention and rehabilitation, improves technique, and enhances the ability of artistic athletes to perform at their best. Contact instructor for required equipment.								
28242	PD LAB 008	MW	2-330PM	DANCE STUDIO 3	O'Donnell she-her		17	Y

Acting								
In this course, performers will take a deep dive into their acting practice - no need for prior training. It will be wild, messy, fun and intense. This course will challenge you to look deeply into the moment at hand and to activate how you bring your truth into space and being. We will explore Sanford Meisner exercises that guide performers to listen more astutely to themselves and their partners, and will engage in practices that enliven the power of imaginary circumstances. Additionally, we will collectively tackle scene study analysis, parsing the intentions and guiding forces at play in the characters, the space, and the moment. The course will culminate with the preparation and performance of a monologue.								
19586	PD LAB 003	F	10-12PM	DANCE STUDIO 3	Whyatt		24	Y
Franklin Somatics								
This Franklin Somatics Lab will focus on dynamic neuro-cognitive imagery and movement education based in the Franklin Method. This is a scientifically studied and practiced way to utilize the plasticity of the brain, via imagery, to improve physical function, strength, mobility, coordination and performance. Based in Ideokinesis, students will utilize mental imagery, structural anatomy, biomechanics and movement to bring awareness to and improve dance movement performance.								
28253	PD LAB 006	TTH	12-130PM	DANCE STUDIO 2	Howard		15	Y
Contemporary								
28254	PD LAB 007	F	2-4PM	DANCE STUDIO 3	Jelinkova		21	Y
PBT Conditioning								
Progressing Ballet Technique (PBT) is a body-conditioning and strengthening program for dancers of any form of dance, as well as athletes. With the use of exercise balls and a theraband, the class will focus on core strength, weight placement, and alignment of the body that triggers muscle memory. This course helps with injury prevention and rehabilitation, improves technique, and enhances the ability of artistic athletes to perform at their best. Contact instructor for required equipment.								
28255	PD LAB 008	MW	2-330PM	DANCE STUDIO 3	O'Donnell she-her		17	Y
Contemporary								
In this class, we will move together, learn original choreography, practice improvisation, and experiment with some low pressure creations of our own. We will keep journals and discuss our curiosities, desires, and discoveries in the field of contemporary dance. We will survey influential choreographers and companies, look at historical artistic movements and methods, and view performances to deepen our understanding of what contemporary dance is and where we might see ourselves within.

Fund Rhythm A
Fundamentals of Rhythm A: The Grid

This course is taught entirely by ear, without instruments or written materials. We will explore rhythms on human made grid systems such as even pulses, quantized subdivisions, metric cycles and song forms. Students will develop rhythmic accuracy, beginning with linear figures and working towards polyrhythmic structures. Special emphasis will be given to rhythmic concepts from India, West Africa, and other oral traditions that fall outside of the typical Western canon. All work will be done with singing and clapping in order to develop hearing, memory, and internalization.

Engaging Performance

This course connects undergraduate students directly to the touring, world-class artists who perform music, theater, and dance on the U-M campus. Students will attend six live performances, talk with the artists and arts administrators, and explore how the performing arts are an integral part of our lives and the world at large. Class will include lectures (including some by guests and visiting artists), weekly discussion sections, required attendance at evening performances, interactive classroom activities, weekly readings, response papers about the performances, and group presentations from students in class.

Students are required to attend six live performances: three dance performances, two musical performances, and one theater piece. The dance pieces include Requiem: Fire in the Air of the Earth, a piece which reimagines Mozart's Requiem, reflecting on death and the myths of reincarnation from an explicitly Black perspective; Ballet Folklorico de Mexico de Amalia Hernandez, one of the world's foremost performers of mexican folkloric dance; and SW!NG OUT, a production celebrating America's competitive and partnered dance form, the Lindy Hop. The musical performances include Imani Winds with the Catalyst Quartet, a program of chamber works exploring different pathways of migration; and National Arab Orchestra, an ensemble dedicated to preserving and performing classical and contemporary Arab music. The Theatre performance is a musical adaptation of the classic afro-futurist, science fiction novel: Octavia E. Butler's Parable of the Sower.

This course requires attendance at these performances:

Requiem: Fire in the Air of the Earth - January 8, 2022 8PM
 Imani Winds with the Catalyst Quartet - January 29, 2022 8PM
 Ballet Folklorico de Mexico de Amalia Hernandez - February 6, 2022 4PM
 National Arab Orchestra - March 19, 2022 8PM
 Octavia E. Butler's Parable of the Sower - March 26, 2022 8PM
 SW!NG OUT - Friday April 1, 2022 8PM

These performances constitute the course's primary texts, and the full package of tickets is available to students enrolled in the course for the dramatically reduced rate of \$75. Additional funds are available to support students who cannot cover the cost. Engaging Performance is made possible through a grant from the Andrew W. Mellon Foundation and a partnership between the University of Michigan and the University Musical Society (UMS).

Media Technology Careers								
This course explores how today's leading technology companies bring products to market and how artists, musicians, composers, engineers, business and computer science students might contribute and become part of these companies. Topics include best practices to department functions. Online resources offer insights into real, working companies. Instructor will visit campus to meet with students.

Public Policy (PUBPOL) Open Sections

201	Systematic Thinking	4.00	ADVISORY	
37584	P R DIS 002 F	1110 WEILL	Stafanson	4 Y
<p>This course provides an introduction to public policy design and analysis using "systematic thinking" from the social sciences and humanities, with the application of scientific methods and knowledge more generally. Systematic thinking about how social problems are defined/understood and how policy both creates and can address societal problems is essential to the design and evaluation of public policies.</p> <p>This 4-credit course consists of three hours of lecture and one section meeting each week. The course will cover policy definitions/frameworks, the policymaking process, and how to evaluate and justify public policy through the lenses of science, ethics and social equity. In addition, the course will include a number of short modules, this year focusing on key policy issues that are being discussed in the context of an election year, such as public policies regarding the environment/climate change, public health and health care, education, social welfare, immigration, international trade, and science/technology. A number of guest faculty experts will assist with the short modules.</p> <p>There are no pre-reqs for this course. PubPol 201 provides an introduction to the field of public policy. Course requirements include two exams, 3 short papers and active class participation (including debates). Students who like 201 might want to look into the Ford School's major and minor in public policy.</p>

300	Persuasive Policy Wr	3.00		
24833	P R SEM 001 TTH	1220 WEILL	Chimera	3 Y
<p>This course, structured as a seminar and writing workshop, intensively develops students' persuasive writing and critical reading skills through abundant practice and feedback. Weekly writing assignments and exercises will focus on every stage of the writing process, from brainstorming and research through drafting and revision, in three vital areas of political writing: the short opinion piece, the policy memorandum, and the polemical essay. We will read and analyze a wide variety of examples from traditional print and online media, from journalistic, government, and academic sources. We will also explore ethical considerations of policy writing, considering the ways in which our rhetorical choices, tone, word choice, even syntax construct our subjects and frame contentious issues for target audiences.</p> <p>*Non-Ford students must receive instructor permission in order to enroll in the course.*</p>

35366	P R LEC 001 MW	1210 WEILL	Stevenson	14 Y
<p>Understanding Public Policy Using an Economics Framework</p> <p>This course will help you develop the supertools of economic thinking and better understand how the economy works. Learning how to think like an economist will help you see the world more clearly, empowering you to make better decisions at work, at home, and in your community and help you understand how other people make decisions. Every decision is an economic decision and you'll discover in this class the economic forces that shape the world around you. These tools will be used to understand how public policy shapes behavior and why policy makers don't always get the outcomes they were hoping for with their policies. This course is for anyone who knows that economics will help them better understand the world, but only wants to take one semester of economics as an undergraduate.</p>

Non-Ford students can enroll Ford elective courses beginning December 7.

This course is designed to familiarize students with core skills in data access, manipulation, analysis, and presentation using Excel (and Excel-like alternatives). Spreadsheet programs remain an important part of professional life, and this course will prepare students for basic and intermediate use of aspects of the program in that setting. Students will learn about data import, formatting, and management. You will also learn about producing tables (including summarization), visualizations, varieties of analysis (ANOVA, regression, etc.), and basic programming. No prior knowledge of Excel is expected, but familiarity with basic concepts of statistics is recommended.

Note: Instructor consent required

Non-Ford students can enroll Ford elective courses beginning December 7.

This course is an introduction to programming and working in STATA, a core statistical program in the social sciences. In a variety of fields, STATA remains the baseline program for analysis, data management, and visualization. In this class, students will learn workflow management in STATA, data import, manipulation, management, and fundamentals of analysis in the software environment. At its conclusion, students should be ready to begin using STATA in their own analysis and to move forward through self-study.

This course covers basics of STATA's command, object, memory, and interface fundamentals, data import and management, creation of basic statistical summaries, linear regression and regression diagnostics, analysis for binary and categorical outcomes, and basics of time series and panel data analysis. The course is graded credit/no credit (pass/fail), with weekly review tasks in STATA. Students in the class are not expected to have prior knowledge or experience in STATA, but a baseline knowledge of statistical concepts is highly recommended.

Lying & Public Policy
Topic: Lying and Public Policy

Lying has been getting a lot of attention lately and for good reason. Democracies demand the truthful exchange of information between rulers and the ruled, as well as a healthy media to inform the public on matters related to government and policy. Lying therefore poses a legitimate threat to the political stability of our nation. And yet despite the current ubiquity of terms like "post-truth" and "alternative facts", lying is not a twenty-first century cultural or political aberration, lying permeates the social fabric, playing a significant role in our daily conversations with others and with ourselves. As research has shown, we lie (frequently) to avoid social embarrassment or hurting the feelings of others, or to manipulate situations for our own gain. Political philosophers like Plato and, most notoriously, Machiavelli, have argued that lying is an essential tactic in the ruler's toolkit, used to preserve social cohesion or persuade the public to agree with a policy that, in the ruler's opinion, may be for the social good. Lying can also be necessary to protect the minorities from exploitation or oppression. In this values and ethics course, we will read broadly in literature, philosophy, history, and politics, and we'll watch a few films and TV shows as well in order to determine when, if ever, lying is justified, and we will apply these lessons learned to examine important policy topics of our own era. Possible topics include: the creation and cultivation of national myths, passing, propaganda, diplomacy, fake news, advertising, and the extent to which lying compromises government services such as entitlement programs, voting, and the police.

Psychology of Climate Change
Non-Ford students can enroll in Ford School electives beginning December 7.

Topic: Psychology of Climate Change

Climate change often feels like a problem that our brains have been hardwired to ignore. Climate change is abstract and complex, making it hard for non-scientists (including policy-makers) to understand. For most Americans, it is a problem that will harm people who are far away in time and geography. And the significant political polarization surrounding climate change has turned it into a form of identity politics. Yet like so many environmental problems?from habitat destruction to overconsumption of natural resources?climate change is the result of human behavior. If we want to solve or mitigate these problems, we must first understand what is driving these beliefs and behaviors.

Most policy to address environmental issues such as climate change has focused on legal or economic tools such as prohibiting certain forms of pollution or giving subsidies for renewable energy. In this discussion-based policy seminar, we will examine an alternative framework for motivating environmentally-friendly behavior: psychological and social incentives. We will explore factors affecting climate change beliefs and related behaviors, including reactions to and support for policies. The focus will be primarily on the US, and we will discuss policy programs and private interventions that have incorporated social psychological research to promote climate change mitigation as well as potential new applications of this research. Although this class will mainly cover climate change and other environmental issues, the psychological tools we will discuss are used in other domains as well, so will be

Japanese Economy

Non-Ford students can enroll in Ford School electives beginning December 7.

Topics: Lessons from the Japanese Economy

This course meets in the first half of the semester (January 6 - February 22).

This course will provide an overview of recent Japanese economic history and the current state of the Japanese economy. We will consider what economic policymakers around the world can learn from Japan. In particular, we will examine Japan's monetary policy response to two decades of slow economic growth (so-called Abenomics), the economic implications of Japan's declining population, and the consequences of Japan's large government debt. Students will write a short paper exploring an aspect of the Japanese economy and / or a lesson that Japanese economic policy may have for the rest of the world.

-------	-----	---------	----	-----------	------------	-----	--	---	---

National Security Policy

Non-Ford students can enroll in Ford School electives beginning December 7.

Topics: Policy Frameworks in National Security

The decisionmaking process for national security is a complex subject that involves the intersection of several factors to include the role of the President, the National Security Council, U.S. government departments and agencies with key roles and functions, and Congress, among others. Key to understanding how national security decisions are evaluated, decided, and ultimately approved is the legal and policy foundation that impacts how military and intelligence operations are carried out abroad, how domestic intelligence and law enforcement works within the United States, and where these international and domestic authorities overlap or even come into conflict depending on the national security issue at stake. Understanding the relationships between these different elements is critical for those interested in this career field.

Assignments include two policy memos, five evaluations of assigned readings, and participation in a panel discussion with other students on select national security laws and authorities.

	P R	SEM 005	MW	1130-1250PM	1230 WEILL	Farley, Neidert		9	Y

Non-Ford students can enroll in Ford School electives beginning December 7.

Topic: Data for Policy Analysis

This class will meet in person on:

January 19

January 24

January 26

January 28 - Lab (10:00-11:50am, 3117 Weill Hall)

January 31

February 2

February 4 - Lab (10:00-11:50am, 3117 Weill Hall)

The development of public policies in the United States is strongly influenced by key indicators of the social and economic status of the population such as the unemployment rate, the poverty rate, the rate of inflation and mortality rates. The federal government gathers, tabulates and releases these data frequently. But they reflect decisions about what to measure and how to measure a concept. How does the nation define unemployment, or poverty or income? The first aim of this course is to provide information about the politics of the federal statistical system and how it is changing.

As a policy expert, you will likely be obligated to make several presentations each year to an audience of legislators, investors, or foundation executives. You will not want to present the elaborate statistical models that you would include in a journal article. You will want to present illustrative charts and figures that may show how a policy has or will reduce poverty, increase college enrollment rates, or minimize racial and gender gaps in earnings or wealth. The second aim of this course is to introduce students to sites that concisely present data from the federal statistical system that may be used for such reports.

This one-credit course will meet in a classroom five times for 80 minutes each. There were be two sessions in a computer lab where you will access and download data. These will each be two-hour session. During the lab, the instructors will provide you with several policy-relevant examples to choose from. There will be guidance for using the data and how you might proceed. After each lab session, you will be asked to prepare a very brief report based on what you did in the lab. You are free to base this on something that is of interest to you. It does not have to be based on one of the examples provided by the instructors. At the end of the course, you will be asked to prepare a four- or five-page policy brief incorporating the skills you learned to access and present data about key issues.

Elections under the Hood

Non-Ford students can enroll in Ford School electives beginning December 7.

Topics: Elections Under the Hood: How the Electoral Process Works (and sometimes doesn't) in America

For decades, one of the most important aspects of American democracy - the process of electing candidates for public office - was also one of the least scrutinized and least understood. Today, this lack of understanding has helped place elections and voting at the center of a contentious public policy debate. This course will look under the hood of elections in the United States and examine the complex web of laws, regulations, and procedures that govern the process. We will cover various aspects of election administration including voter registration, open vs. closed primaries, early voting, voting equipment, post-election vote canvasses and recounts, as well as unique and

CAT#	Course Title					CR	PREREQ	LAB FEE		
Class #	CODE CMP SEC	DAYS	TIME	LOCATION	INSTRUCTOR			OPEN SEATS	WL	

controversial aspects of presidential elections. The news media's significant role throughout the electoral process will be closely examined as well. The course will also address redistricting and gerrymandering, as well as numerous ways candidates and parties work within (and sometimes outside of) the election system to gain political advantage. We will examine the 2000 and 2020 presidential elections in particular detail, as well as examples from other federal, state, and local elections, along with comparisons with international systems. Students will be challenged to identify weaknesses in the current system and development policy prescriptions to address them.

-------	-----	---------	-----	-----------	------------	------	--	---	---

Racial Disparities in Policing
Topic: Racial Disparities in Policing: Causes, Consequences, and Correctives

The rise of the Black Lives Matter movement has brought renewed public attention to an enduring social problem in America: racial disparities in policing, and gaps in police-community trust. Where do these inequities come from? What processes contribute to disparities in policing? And what can we do to address them? The overarching goal of this course is to get "under the hood" of racial inequality in policing through organizational analysis: to identify the institutional and individual contributors to disparities, so that we can combat it.

One specific aim of this course is to introduce students to theoretical and empirical studies of disparities in policing. We will examine research from psychology, sociology, legal studies, and organizational behavior to understand how each of these perspectives sheds light on different aspects of race and police-community relations. In doing so, we will connect this issue to broader theories of organizational theory (discretion, organizational change) and psychology (implicit bias, procedural justice). A second goal of this course is to connect this research to social practice. In the second half of the course, we will examine the empirical support for interventions aimed at building trust and closing gaps in policing. Alongside these readings, we will have discussions with stakeholders working on these issues from a range of positions and perspectives: within law enforcement, community activism, policy change, and research.

This class is a meet-together between ORGSTUDY 495.001 and PubPol 475.008. If the seats in one section are taken, check on the other side for availability.

37785	P	SEM 009	TTH	10-1130AM	1339 MH	de Souza Leao		1	Y
-------	---	---------	-----	-----------	---------	---------------	--	---	---

Topic: Poverty and Inequality in the Global South

Why are some countries considered rich and others poor? Where does the term Global South come from and how can we use it to address pressing global poverty issues? This course answers these questions by introducing students to major concepts and debates in the sociology of development. The first half of the course familiarizes students with the historical roots of contemporary global inequalities, starting with the legacies of colonialism, the construction of the post-World War II world order, and the rise of neoliberalism. We will also compare major theories of development, including modernization, dependency, and world-systems. The second half of the course surveys different topics in the study and practice of development as it connects to poverty and inequality in countries of the so-called Global South, with the aim to critically approach themes such as gender, cash transfers, microcredit, and public health from a sociological perspective.

480	Global Engag Seminar					3.00			
26483	PDR	SEM 001	MW	230-350PM	1220 WEILL	Ciorciari		1	Y

This advanced seminar challenges public policy majors to consider how policy issues are framed and addressed in a non-US context. (Costa Rica will be the initial focus and location of the study tour but the country may vary in subsequent year.) Student will study a small number of contemporary policy problems in light of the country's specific political, economic, historical and cultural context. The winter break study tour will provide students an opportunity to discuss the policy issues with local stakeholders. Upon return, students will work in groups to produce short, formal policy reports that account for country-specific condition.

The country to be studied will be selected by faculty leading the Global Engagement seminar. Approximately 15 Ford School undergraduate students will be selected to practice in the course, on the basis of application forms to be submitted early in the fall semester. Priority is accorded to students with a strong interest in international affairs and/or limited previous experience with travel and study outside the US. There is a modest program fee to help offset experiences of the study tour; need based financial assistance may be available.

Energy & Climate
PUBPOL 495 (Policy Seminar) is for students currently enrolled in the Public Policy Undergraduate Program only, no exceptions. Enrollment is by permission only. Please contact fssp-registrar@umich.edu with any questions.

The climate is changing at an unprecedented rate, with implications for human well-being around the world. This course will analyze the evidence on climate change's impacts on the environment and the economy. Then we'll explore how different energy sectors (electricity, natural gas, etc) contribute to climate change. We'll delve into theories and when and how the government can or should regulate the sectors that contribute to climate change.

- Our goals are to:
- Think critically about policy issues and options related to climate change.
 - Understand the basics of some of the energy markets that contribute to climate change.
 - Develop excellence in conveying our ideas in written form.

510	Politics of Pub Pol					3.00			
24485	PD	REC 001	MW	830-950AM	1230 WEILL	Lin, Hiebert		8	Y

This is a core course restricted to Ford School students only. Registration is by permission only. Please contact fssp-registrar@umich.edu with any questions.

The primary objective of this core course in the MPP curriculum is to equip students with the knowledge and skills needed for effective political analysis of public policy issues and decisions. The course covers conceptual and analytic frameworks for understanding political processes, institutions, stakeholders, contexts and policy decision making. In addition, the course builds written and verbal communication skills, emphasizing the ability to convey

CAT#	Course Title	CR	PREREQ	LAB FEE						
Class #	CODE CMP SEC	DAYS	TIME	LOCATION	INSTRUCTOR			OPEN SEATS	WL	

clear and concise political analyses in a variety of formats, including policy memos.

This section of 510 has been extensively revised to teach students to employ strategies for effective policy advocacy, focusing on the American political system but including cases from other countries and political systems.

We will consider advocacy for change within a political system (for instance, efforts to obtain civil rights for populations within a country) and across political systems (for instance, efforts to promote human rights in a different country). We pay special attention to the difference between political strategies, political structures, and political systems, exploring how they strengthen or constrain each other. We will also explore efforts to dismantle oppressive structures and systems, considering whether the master's tools can ever dismantle the master's house. (Lorde 1984) By the end of the course, students will be able to identify the tradeoffs implicit in the political strategies that they adopt, the coalition allies they choose, and the context and venues in which they must work. They will also be able to write concisely, analytically, and persuasively about the decisions they make.

26334	PD	REC 002	TTH	1-220PM	1230 WEILL	Kabo, DeStefano		8	Y
-------	----	---------	-----	---------	------------	-----------------	--	---	---

This is a core course restricted to Ford School students only. Registration is by permission only. Please contact fspp-registrar@umich.edu with any questions.

The primary objective of this core course in the MPP curriculum is to equip students with the knowledge and skills needed for effective political analysis of public policy issues and decisions. The course covers conceptual and analytic frameworks for understanding political processes, institutions, stakeholders, contexts and policy decision making. In addition, the course builds written and verbal communication skills, emphasizing the ability to convey clear and concise political analyses in a variety of formats, including policy memos.

This section helps students understand the political context of the policy process. Most of our understanding will be based on domestic frameworks, with some examples and extensions to comparative and/or international contexts. Students will be introduced to the aspects of the "policy cycle", from problem definition and framing to implementation, and analyze how aspects of the political context, both inside and outside government structures, influence different aspects of the policy cycle. In particular, we will consider agenda setting, framing and rhetoric, and discuss how the way that we define, understand and discuss problems impacts solutions to those problems. We will then explore how political influences both inside and outside the government influence this process by considering social movements, public opinion, the media and institutions. During the course, students will also develop strategies for responding to the political environment and improve both analytical and communications skills.

This course provides an overview of international financial economics, developing analytic tools and concepts that can be used to analyze world economic policy debates. It covers the international implications of macroeconomic policies, international monetary arrangements and institutions, and stabilization programs for developing countries. The course will be structured around the tools (models) of open economy macroeconomics, using primarily graphs, and occasionally equations. However, motivation for these tools and examples of their use will always be taken from current and recent real-world macroeconomics events and conditions. This course presumes prior knowledge of intermediate microeconomics and graduate standing. Course assignments will include problem sets that involve short essays, data collection and analysis, and problem solving, and a group project that involves an assessment of the macroeconomic performance and problems in a particular country.

556	Macroeconomics					3.00	ADVISORY		
35725	P R	LEC 001	TTH	1-220PM	1110 WEILL	Hausman		2	Y

This course teaches students the basic tools of macroeconomics and how to apply them to real world economic policy. The goals of the course are for students to (a) understand how to evaluate macroeconomic conditions such as unemployment, inflation, and growth (b) understand how monetary policy and fiscal policy can be used to influence macroeconomic conditions (c) understand media accounts of macroeconomic events. The course will cover a broad range of topics in macroeconomic policy. Examples of issues discussed include the role of fiscal and monetary policies in stabilizing the economy, the relationship between inflation and unemployment, the role of government policy in promoting long-term economic growth, monetary and fiscal policies in an open economy, deficits and debt, and European Monetary Union. The course is structured around the tools (models) of macroeconomics, using primarily graphs, and occasionally equations. Examples are taken from current and recent real-world macroeconomics events and conditions.

Prerequisite: PUBPOL 555 (Microeconomics) or permission of instructor.

This class counts as an option to fulfill the second economics course requirement for the MPP degree.

This course will introduce you to the fundamental leadership concepts and skills you need to successfully navigate and shape dynamic policy environments. You will have opportunities to develop a deeper understanding of yourself and build your ability to effectively lead teams. You will learn how to set a tone, a focus, and a direction for an organization, its members, and other stakeholders. You will practice leadership behaviors that will help you better connect across differences and enact change in complex, multi-layered contexts. Designed to provide you with opportunities for reflection, study, debate, and practice, this course will enhance your ability to make a positive and meaningful difference.

This course satisfies the MPP requirement of PubPol 586 & PubPol 587

Public Management: Performance Management in International Organizations

The Ford School defines leadership as, "the behavioral process of having a positive impact on individuals, organizations, and communities". This course will equip students with the skills and tools to manage organizations, teams, and self to better accomplish their intended positive impact. In particular, the course will focus on management in public and non-profit organizations, which orient their work towards having a positive public impact, working in pursuit of public good.

The course will be structured in 4 sections to introduce students to key concepts and leadership best practices, and develop an analytic toolkit to manage for positive impact, as follows:

- ? Mapping the Environment,
- ? Strategic Organizational Planning,
- ? Planning for Results, and
- ? Managing for Results.

Fundraising for Nonprofits
Public Management: Fundraising Strategies for Nonprofits

Social change cannot occur without an infusion of financial resources particularly as the public service sector does not have the financial capital to invest in solving every pressing social issue. Fundraising promotes a culture of possibility --- its the intersection of personal passions and organizational needs. Increasing your knowledge of industry best practices and gaining fundraising skills are critical to your success in social impact work. This mini-course serves as an opportunity to engage theory in practice (praxis) through the study of fundraising for nonprofit organizations in the United States. We will learn about fundraising history, principles, best practices, and shortfalls through guest lectures from industry leaders, readings, self-reflection, group dialogue, and an applied learning project. Past year's applied learning project involved Food Gatherers, a local nonprofit in Ann Arbor.

Strategic Communication
Public Management: Strategic Communication for Advocacy

This course will introduce students to a range of communication strategies to move public policy forward in public policy areas from climate change to public education, health reform to anti-poverty efforts. For new public policy to emerge, policy experts must learn skills to translate their analytical content to the public audiences that ultimately decide the fate of reform. Class members will examine policy reform from the strategic communications perspective including understanding audiences, identifying partners, developing key messages, storytelling, media relations, delivering the messages through effective channels and measuring impact. Students will develop policy advocacy campaigns which demonstrate the interplay between strategic, effective, targeted communications and

<p>achieving and sustaining policy change. Policy&Project Implementation Public Management: Managing Policy and Project Implementation</p> <p>Once a policy is passed or a project selected, the hard work of implementation begins. This course will introduce students to the key management and leadership concepts and skills that surround implementation of policies and projects with public funding. The course will adopt an international focus in readings and casework.</p> <p>This course includes three modules: First, students will explore management approaches for policy and project implementation, including new approaches to public management such as contracting, collaborative governance, public participation and street level bureaucracy. Second, students will build leadership skills for managing teams and managing people. The third module will introduce students to key tools for managing change within organizations. The course will include a series of workshop-style sessions where students will work in teams to apply class material to real-world international cases, and present their results to the class. Teams will then submit workshop write-ups. Students will also complete one individual memo and two short individual reflection papers.</p>								
36303	P R SEM 005	TTH	1130-1250PM	1110 WEILL	Raimi		15	Y
<p>Working in Diverse Orgs Public Management: Working in Diverse Organizations</p> <p>The workforce of the 21st century is increasingly diverse. Productive managers cannot afford to ignore this diversity, and can benefit greatly from it. Yet we are often nervous about discussing and embracing issues of diversity, equity, and inclusion and many otherwise strong leaders are blind to the ways their own biases might affect their teams. In this module, students will learn about potential blind spots such as unconscious bias and its effects on employee hiring and retention, how the desire to avoid negative emotions might get in the way of productive management, and the dangers of groupthink, as well as learning strategies to avoid or address these problems. The readings will draw on empirical research from social psychology and organizational behavior, as well as real-world examples of diversity issues in the workplace.</p>								
589	Conflict Resolution					1.00		
36463	P R SEM 001	TH	1130-1250PM	1110 WEILL	Qureshi		5	Y
<p>Conflict is an evitable part of the human experience--in relationships, at the work place, in public administration and especially in the public policy making process. Unresolved conflict can hinder decision making and impede organization change, but when conflict is addressed, managed or transformed, it is possible for relationships, organizations, and systems to grow and succeed. Drawing on empirical research and case studies, this skills-based course will begin with a discussion of the impact of conflict in systems and a taxonomy of forms of conflict with an eye toward public administration. Then the course will focus on the development of strategies that can be used to resolve or manage conflicts, with opportunities for students to develop those skills through in-class exercises. Special attention will be paid to skills that can be used to address conflicts that emerge across differences such as race and ethnicity, political orientation, and gender.</p>

Class will meet in 3117 Weill Hall.

This course is an accelerated introduction to a variety of Public Policy research and analysis-related skills in the Microsoft Excel environment. This course is designed to familiarize students with core skills in data access, manipulation, analysis, and presentation using Excel (and Excel-like alternatives). Spreadsheet programs remain an important part of professional life, and this course will prepare students for basic and intermediate use of aspects of the program in that setting.

This course covers data import, formatting, and management. Analysis topics include: producing tables (including summarization), visualizations, varieties of statistical analysis (ANOVA, regression, etc.). The course is graded credit/no credit (pass/fail), with weekly review ?tasks? in Excel. No prior knowledge of Excel is expected, but

This is a course on how economists think about government revenue and government expenditures - how governments raise and spend public money. Public Finance is a subfield of microeconomics. In the course, we will begin by delving more deeply into rationales for government intervention in the market, including public goods, externalities, and equity. We will then use the tools of economics to analyze a number of important public policy issues, such as public health insurance, social security, and anti-poverty programs. The second part of the course will cover tax policy, and we will explore how the burden of taxation is distributed, how taxes affect the economic behavior of individuals and firms, and options to reform the tax system. The course will cover the theory of public finance in depth, but the ultimate aim will always be to apply the concepts to real world policies and programs. Toward that end, we will spend substantial time both inside and outside of the classroom applying the concepts and reviewing existing empirical evidence. The course focuses on the US, but we will discuss comparisons with other countries from time to time.

Japanese Economy *Non-Ford students can register in Ford School electives beginning December 7*									
Topic: Lessons from the Japanese Economy									
This course will provide an overview of recent Japanese economic history and the current state of the Japanese economy. We will consider what economic policymakers around the world can learn from Japan. In particular, we will examine Japan's monetary policy response to two decades of slow economic growth (so-called Abenomics), the economic implications of Japan's declining population, and the consequences of Japan's large government debt. Students will write a short paper exploring an aspect of the Japanese economy and / or a lesson that Japanese economic policy may have for the rest of the world.

National Security Policy									

Non-Ford students can register in Ford School electives beginning December 7

Topics: Policy Frameworks in National Security

The decisionmaking process for national security is a complex subject that involves the intersection of several factors to include the role of the President, the National Security Council, U.S. government departments and agencies with key roles and functions, and Congress, among others. Key to understanding how national security decisions are evaluated, decided, and ultimately approved is the legal and policy foundation that impacts how military and intelligence operations are carried out abroad, how domestic intelligence and law enforcement works within the United States, and where these international and domestic authorities overlap or even come into conflict depending on the national security issue at stake. Understanding the relationships between these different elements is critical for those interested in this career field.

Assignments include two policy memos, five evaluations of assigned readings, and participation in a panel discussion with other students on select national security laws and authorities.

Ballot Initiatives

Non-Ford students can register in Ford School electives beginning December 7

Topic: Gaining Power Through Grassroots Democracy: Ballot Initiatives - Campaign Media & Strategy

Marijuana, affirmative action, redistricting--When citizens want change legislatures won't enact - they go to the ballot to win change. This course blends an academic review of the ballot initiative process along with the related experience of grassroots leaders. Students will gain an understanding of the initiative process and cutting-edge campaign approaches. The course will lean upon journals, books, media reports, videos and training materials to provide a 360-degree view of the strategies and the tactics used to win. Students will also engage with a number of international, national and state-based activist leaders and political consultants who will provide supplementary instruction and discussion.

Though students will be exposed to a variety of ballot initiative subjects and examples, the course will focus upon Michigan's Proposal 2 - a Michigan ballot initiative that created an Independent Citizens Redistricting Commission to end partisan gerrymandering in 2018. Prop 2 will serve as a fulcrum for many of our class discussions and draw upon the examples of several states who passed similar initiatives throughout the United States that year.

Diplomacy & Statecraft

Non-Ford students can register in Ford School electives beginning December 7

Topic: Diplomacy and Statecraft in an age of Globalization

Diplomacy (using non-lethal means to manage interstate relations and foreign threats) and statecraft (managing state power to promote national interests) are the key tools by which a nation's foreign policy is implemented. In other words, in the management of official relations between states and intergovernmental organizations to promote national interests through both cooperation and competition, diplomacy and statecraft are central aspects of the foreign policy toolkit in international politics. Yet, our world is increasingly interconnected, as demonstrated by the domestic impact of external issues. New subjects crowd the international agenda. At home and abroad, many actors participate in international affairs far beyond the realm of states or ministries of foreign affairs. This course will give students insight into the contemporary practice of, and challenges to, diplomacy through an examination of political, economic and development statecraft; multilateral statecraft, including with and through organizations such as the UN, World Bank, and regional organizations; and the use of public diplomacy to spread information (and disinformation), values and norms through educational opportunities, cultural activities, language, and exchange programs, to name a few. We will also review the manner in which diplomacy and statecraft have changed and adapted due to the novel coronavirus (COVID-19) pandemic and other recent global developments such as desertification and mass movements of people. Students will assess lines of action policy makers have initiated to find solutions and explore alternative approaches to these problems. I also place emphasis on the tools and skills needed for policy analysis and the formulation of effective recommendations for decision-making. I will use case studies and group exercises throughout the course and there will be a number of policy writing assignments and oral presentations. Students are encouraged to think, act, and write like diplomats and to appreciate diplomacy as a vocation. Through the course, students connect diplomatic trend lines with today's international headlines. Students will gain expertise on a contemporary diplomatic challenge of their choosing through research and readings policy project that culminates in a written policy memo to the next president.

 Elections under the Hood

Non-Ford students can register in Ford School electives beginning December 7

Class will meet in 1230 Weill Hall.

Topic: Elections Under the Hood: How the Electoral Process Works (and sometimes doesn't) in America

For decades, one of the most important aspects of American democracy - the process of electing candidates for public office - was also one of the least scrutinized and least understood. Today, this lack of understanding has helped place elections and voting at the center of a contentious public policy debate. This course will look under the hood of elections in the United States and examine the complex web of laws, regulations, and procedures that govern the process. We will cover various aspects of election administration including voter registration, open vs. closed primaries, early voting, voting equipment, post-election vote canvasses and recounts, as well as unique and controversial aspects of presidential elections. The news media's significant role throughout the electoral process will be closely examined as well. The course will also address redistricting and gerrymandering, as well as numerous ways candidates and parties work within (and sometimes outside of) the election system to gain political advantage. We will examine the 2000 and 2020 presidential elections in particular detail, as well as examples from other federal, state, and local elections, along with comparisons with international systems. Students will be challenged to identify weaknesses in the current system and development policy prescriptions to address them.

 Legislation and Regulation

Title: Legislation and Regulation

In the modern regulatory state, the rules that most profoundly shape private conduct come not from the common law but, instead, from legislatures and agencies. This class will explore the lawmaking function of these institutions and the virtues and vices of administrative governance. Among other things, the class will cover: the nature of the legislative process; statutory interpretation; the justifications for regulatory intervention; regulatory tools and strategies; the allocation of authority between legislatures and agencies; the varied forms of agency decision-making; and judicial review of agency decisions. In offering a survey of public law, the course will introduce students to the essentials of both statutory interpretation and administrative law.

Politics of Healthcare Reform
 Topic: Politics of Healthcare Reform

This class will focus on answering the question of what it takes to pass a major piece of legislation -- and what that answer says about the structure of American government and nature of U.S. politics. Its case study will be the century-long effort to create a universal health care system, with a heavy focus on enactment and implementation of the Affordable Care Act.

The course will cover the economics of health care and its effects on innovation, quality and access, with a particular focus on people with serious medical needs as well as lower-income populations and traditionally marginalized communities. The class will review the long history of attempts to pass major health care legislation, from embryonic attempts at compulsory health care in the Progressive Era up through the debate over repealing the Affordable Care Act in 2017. But the broad focus will remain on exploring how factors like the institutional architecture of American government, the power of interest groups, the complexities of public opinion and judgment of individual leaders shape the legislative agenda, specific proposals and the outcomes of debate -- not just for health care, but for all issues.

Students should expect a series of short writing assignments or one longer one (to be determined), plus lively group discussions and one or two guest speakers as well.

INSTRUCTOR BIO:

Jonathan Cohn is a journalist and author who has been covering policy and politics for more than 25 years. He is currently a senior national correspondent at HuffPost. Before that, he was a senior editor at the New Republic and American Prospect. He has also written for the Atlantic, New York Times and Washington Post, among other publications, and has been a columnist for Kaiser Health News and the Milbank Quarterly. He is the author of two books: Sick (HarperCollins, 2007) and The Ten Year War (St. Martin's Press, 2021), and a past winner of media awards from the Sidney Hillman Foundation, World Hunger Year, National Women's Political Caucus and Association of Health Care Journalists. He holds a bachelor's degree from Harvard University, is a member of the National Academy of Social Insurance and has been a fellow with Demos, the Henry J. Kaiser Family Foundation and University of Michigan's Griffith Leadership Center.

Taught by John Hieftje, former Mayor of Ann Arbor.								
Cities are leading the fight against climate change. Around the world they are experiencing the devastating effects as hurricanes intensify, sea levels rise, ?heat islands? multiply and storm water systems are overwhelmed, along with city budgets. And yet, people are flocking to cities to experience their booming economies, plentiful jobs and exciting cultural communities. But for every successful city, there is a downside as gentrification spreads and all but the wealthy are forced to move further out as housing prices rise. The need for better transportation into and within cities has never been greater. Our federal government offers no help. In response a new generation of activists are pushing elected leaders to respond. This class will hear directly from activists, state and local elected leaders and top professionals in their field.

Registration is limited to Pharmacy, Social Work, Dentistry, Medical, and Nursing students who are eligible to enroll. Students will be assigned to an interdisciplinary group that will rotate between different buildings across campus. An email notifying students about their group and room assignments will be sent before the first class meeting.								
Social Work students: Priority is given to Detroit Integrated Health and Integrated Health Scholars. Scholars will receive an electronic permission to enroll in this course prior to registration. Non-scholars may enroll until the class fills and then a petition will be necessary.
