It is CRITICAL that students attend class from the beginning. Each laboratory session provides hands-on instruction and requires reserved time on a particular imaging system, making attendance for each class mandatory. If traveling during the winter break, plan ahead and allow sufficient time in order to be present at the start of the Winter Term.

First four classes will be held in 2185 LBME, the following locations will be provided by instructor.

<b>517</b>	<b>Neural Engr</b>				<b>3.00</b>	<b>ADVISORY, ENFORCED</b>

	Intro to Smart Infrastruc Sys									
	Provides a graduate-level introduction to (1) infrastructure system design principles, operations, and security and (2) how these systems are modeled and analyzed. Intended as a first course in infrastructure modeling both for those seeking to model infrastructure in practice and those planning to pursue more in-depth training and research in other courses.									
33587	P LEC 004	MW	12-130PM	1025 GGBL	Adriaens			20	N	
	Infrastructure Project Finance									
30332	P LEC 071	TTH	330-5PM	224 GFL	Steglitz			8	Y	
	Engr Soln to Drinking Wtr Chal									
	Students will learn about water quality parameters and how they influence application of water treatment technologies, using the City of Ann Arbor's Water Treatment Plant as a backdrop. Students will learn about the history of the safe drinking water act and how drinking water regulations have impacted utilities and technology application. The course will involve a group project where students will be assigned a treatment problem and the groups will develop a technical memorandum typical of a consulting engineer, as well as an oral presentation of their final recommendations. The class will involve a lab at the City's Water Treatment Plant where students will have a hands on experience with water treatment processes.

Applied Optimal Control										
Advisory pre-reqs: Linear Algebra (ROB 101 or Math 214 or Math 217), ME 240 and ENGR 101 (or equivalent)										
This course is an introduction to optimal control techniques and their numerical application to dynamical systems. Topics include trajectory optimization, constrained and unconstrained solvers, convex optimization, linear-quadratic methods, model-predictive control, as well as applications to robot control and bipedal locomotion.										
Lectures by: Prof. Christian Hubicki, Florida A&M University <a href="https://eng.famu.fsu.edu/me/people/hubicki">https://eng.famu.fsu.edu/me/people/hubicki</a>										
Students who are looking to enroll and are not robotics majors should email <a href="mailto:ugrad-robotics">ugrad-robotics</a> with an override request.

Biospiration										
Nature is full of biological organisms that are specialized for specific tasks. By examining the process by which natural selection shapes biological forms, we can learn from nature to inspire technological design. This course will explore biological strategies for swimming, flying, terrestrial locomotion, adhesion, sensing, and construction. This will be an interdisciplinary endeavor with team-based robotic design projects.

This section (021) is reserved for CSP students. Attendance is REQUIRED for this discussion section. The CSP discussion section has a smaller class size and will meet for two hours each week to provide additional time to review concepts introduced during lecture. To facilitate greater understanding of course concepts and build community within the discussion section, students in this section should be prepared to work collaboratively with their peers to complete practice problems. This section is designed to enable more access to instructors through a higher instructor-to-student ratio and provide more time for students to work together on problem sets.

STUDENTS MUST ELECT DISCUSSION AND LECTURE SECTIONS. This lecture (006) is an "accelerated" lecture. The accelerated lecture will cover the same material as the current course at a faster pace; expand on some of the material; and present additional ideas that are not typically a part of the required curriculum. The accelerated lecture may be of particular interest to students with a stronger mathematical background, previous exposure to proofs, or an interest in deeper applications. This accelerated section covers the same materials as the standard sections but anticipates spending 10-30 minutes of lecture time per week on additional material intended to expose students to advanced concepts in computer science beyond the scope of EECS 203. Students are welcome to switch freely between the accelerated lecture and the concurrent standard lecture section at any time throughout the semester.

STUDENTS MUST ELECT LAB AND LECTURE SECTIONS. The remote section is being offered to handle anticipated extra demand beyond the in-person sections. Students in all lecture sections, including remote, will have access to lecture recordings. Students in the remote section can also attend the in-person lectures, space permitting on the day of the attendance. Usually, enough students consume material remotely that we don't anticipate in-person space to be a bottleneck for anyone wishing to attend the class in-person. Lab and exams are in-person.

STUDENTS MUST ELECT LAB AND LECTURE SECTIONS. EECS undergraduate majors and minors only. Contact the CSE Undergraduate Advising Office with questions.										
The remote section is being offered to handle anticipated extra demand beyond the in-person sections. Students in all lecture sections, including remote, will have access to lecture recordings. Students in the remote section can also attend the in-person lectures, space permitting on the day of the attendance. Usually, enough students consume material remotely that we don't anticipate in-person space to be a bottleneck for anyone wishing to attend the class in-person. Lab and exams are in-person.

STUDENTS MUST ELECT DISCUSSION AND LECTURE SECTIONS. EECS 484 lecture 001 will be entirely in-person (no zoom available). Lecture 002 will be conducted on zoom and is designed to support students who prefer to learn the												

lecture material largely asynchronously and to allow us to better accommodate demand. Students attending Lecture 002 are expected to have watched recordings of earlier or recent lectures (or attended lectures in person). The lecture will be in Q&A style in a group setting where students can ask questions about the concepts from any earlier or current lecture. Discussions and exams are in-person. Any student can attend any lecture, subject to space constraints. But, when you can, please sign up for lecture 001 if you primarily plan to attend in-person and for lecture 002 otherwise.

33686	P LEC 001	TTH	12-130PM	1610 IOE	Scott, Zhang, Ritchie		40	Y
EECS 553 will be by override only, to request an override please waitlist for the course.								
EECS 553 Machine Learning - ECE will be similar to EECS 545 (now Machine Learning - CSE) with more emphasis on algorithms and their derivation from fundamental mathematical principles. For Winter 2023, Professor Scott will be relying heavily on the advisory pre-requisite of "graduate level probability and linear algebra."								
You have met the pre-requisite requirements if you have taken the following University of Michigan graduate courses (one from each category). If you have taken other courses that you think should count toward the requirement, at UM or another school, please use the "Partial" option and explain in detail.								
Probability: EECS 501, Stats 510, Stats 610, Math/Stats 525, Math/Stats 625, Math/Stats 626, Biostats 601, Biostats 801, ECON 503, SI 544								
Linear algebra/Matrix methods/Linear systems: EECS 505, EECS 551, Aerosp 550, CEE 571, MECHENG 564, EECS 560, ROB 501

-------	-------------	---	-------	-----------	---	--	--	--	--

In this course sponsored by ArtsEngine, students explore the creative process through a structured sequence of exercises in four studio modules: sound, motion, visual images/objects, and verbal/symbolic language. Faculty from Art & Design (Andrew Thompson); Music, Theatre & Dance (Amy Chavasse); Architecture (Gregory Saldana); and Engineering (Jeremy Bond) introduce a variety of creative strategies for generating problem solving ideas through hands-on projects. Weekly colloquia (Stephen Rush), discussions, and readings supplement projects. Grading is based upon attendance, class participation, a journal, four mini-projects, evidence of intellectual and creative process development, and a final culminating project. This course is appropriate for UM undergraduate students at all

#### Making Things: Three Million Years of Materials and Culture

This course explores the connections between the discovery of new materials -- such as ceramics, concrete, precious stones and metals, glass, steel, plastics, and semiconductors -- and social transformations worldwide. To see these connections, the course will fuse basic concepts in materials science and engineering with perspectives and methods from anthropological archaeology.

#### Mass Transfer in Polymers

##### Course description & justification

The objective of this course is to provide students with an introduction and state of the art overview of mass transport in dense polymeric materials. The solution-diffusion transport mechanism will be studied in considerable detail. Sorption, diffusion, and permeation of small solutes in polymers will be considered from experimental and theoretical viewpoints. The course will cover the effect of polymer backbone chemical structure and the impact of polymer suprastructure (crystallinity, liquid crystallinity, uniaxial and biaxial orientation) on sorption, diffusion, and permeation properties. The fundamental scientific principles involved in sorption, diffusion, and permeation of small molecules in polymers will be related to applications such as membranes for liquid, gas, and vapor separations; fuel cells and batteries; controlled drug delivery devices; barrier plastics for food and specialty packaging; and monomer and solvent removal from formed polymers.

#### Advanced Biomaterials

CAT# Class #	Course Title CODE CMP SEC	DAYS	TIME	LOCATION	CR INSTRUCTOR	PREREQ	LAB FEE OPEN SEATS	WL
Advanced Biomaterials. Biomaterials have important roles and growing impact on broad applications, including medical devices, implants, regenerative medicine, tissue engineering, sensors, diagnostics, and drug delivery. This graduate level course is designed primarily for graduate and senior undergraduate students in engineering or biological sciences, as a complement to BME 410. It will cover both basic concepts and contemporary concepts and applications in advanced biomaterials.								
26528	P LEC 077	TTH	430-6PM	1003 EECS	Pena-Francesch		19	N
Soft Robotics Materials Soft Robotics Materials While traditional robots are typically composed of rigid and brittle materials, the growing field of soft robotics explores flexible and deformable materials to achieve compliance and properties akin to that of biological systems, safer for physical interaction with humans and for operation in dynamic environments. However, the use of soft materials in robotics restricts traditional approaches in design, actuation, and power, especially at milli- and microscales. This course will explore the fundamentals and new approaches in soft actuation across length scales, with focus on leveraging the properties and structures of soft materials for programmable complex actuation. Topics will cover soft materials design, tethered/untethered actuation methods, microscale actuation, and applications of soft robots and microrobots.								
26527	P LEC 033	W	5-8PM	1008 EECS	Shtein		9	N
Tech-Driven Innov. and Bus. Technology is the "lever of riches," historically responsible for economic development and global improvement in the standard of living. In the 20th and 21st centuries, particularly in the US, tech-driven innovation has created more wealth than in all the preceding epochs combined. However, in the process, the over-reliance of traditional heavy industries on natural resources and the associated adverse climate change have presented challenges and opportunities for technological innovation that can create prosperity, but do so more sustainably. This course considers the key questions on the path of technology commercialization, links technology attributes with viable business models, and applies these insights to guide research and development activities.								
26529	P LEC 043	TTH	3-430PM	1005 DOW	Tuteja		22	N
Surface and Interfacial Engr This course aims to provide an insight into the fundamental physics and chemistry of interfaces that enable the understanding and design of different functional surfaces. It will cover the fundamental principles that govern surface properties, techniques for surface modification and characterization, as well as, novel applications of designer surfaces.

Qualitative Research Methods

AES 313.001 is a Meet-Together with KINESLGY 513.006.

This course introduces students to the practice of qualitative research. This course uses a combination of didactic, interactive, and applied techniques to prepare students to conduct an independent qualitative research study. By the end of the course, students will develop skills in how to formulate an appropriate qualitative research question, collect qualitative data through interviews, analyze and interpret qualitative data, and report qualitative research.

Topics in Human Performance

Kinesiology students may take this course for general elective credit, only.

This course will serve to introduce students to a wide variety of topics in the science and practice of improving human athletic performance. The goal of the course will be twofold. First, it will aim to introduce the students to the subject matter?e.g., the science and practice of training, recovery, nutrition, analysis, and psychology. This will serve as both a knowledge base of best practices and key principles in that area, but also to provoke curiosity for future concentrated study of any of area of interest. Second, it will aim to give the students a framework for thinking about becoming better in any discipline using the approaches and theories discussed in the athletic context.

# Literature, Sci, and the Arts

NOTE--IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, DEPARTMENTS MAY GIVE AWAY STUDENT'S PLACES IN A COURSE IF THEY DO NOT ATTEND:  
 ---THE FIRST MEETING OF BIOLOGY, CHEMISTRY, AND PHYSICS LABORATORIES;  
 ---THE FIRST MEETINGS OF HISTORY 396 AND 397;  
 ---EITHER OF THE FIRST TWO MEETINGS OF ENGLISH COURSES;  
 ---EITHER OF THE FIRST TWO MEETINGS OF ANY COURSE OFFERED BY THE DEPARTMENT OF ROMANCE LANGUAGES;  
 ---THE FIRST TWO MEETINGS OF COURSES IN OTHER DEPARTMENTS.

AT THE SAME TIME, DEPARTMENTS ARE NOT OBLIGATED TO WITHDRAW STUDENTS OFFICIALLY FROM THE COURSE, EVEN THOUGH THE STUDENT HAS BEEN INFORMED THAT HIS/HER PLACE IN A COURSE HAS BEEN TAKEN AWAY. STUDENTS ARE RESPONSIBLE FOR THE ACCURACY OF THEIR SCHEDULES AND MUST BE SURE THAT ALL DROPS ARE PROCESSED THROUGH THE REGISTRATION SYSTEM DURING THE NORMAL DROP/ADD PERIOD.

## Biology Department

### Biology (BIOLOGY) Open Sections

--A STUDENT WHO DOES NOT ATTEND THE FIRST MEETING OF A BIOLOGY, CHEMISTRY, OR PHYSICS LABORATORY MAY BE DROPPED FROM THE COURSE FOR NON-ATTENDANCE.  
 --ALL STUDENTS MUST TAKE ACTION THROUGH THE REGISTRATION SYSTEM TO MAKE SURE THAT THEIR OFFICIAL SCHEDULE MATCHES THE COURSES THEY ARE ATTENDING.  
 --FOR ADDITIONAL COURSES, PREVIOUSLY LISTED UNDER BIOLOGY, PLEASE CHECK THE LISTINGS FOR EEB (ECOLOGY AND EVOLUTIONARY BIOLOGY) AND MCDB (MOLECULAR, CELLULAR AND DEVELOPMENTAL BIOLOGY).

**117 The Science of Study 1.00 ADVISORY**  
 27384 PIR SEM 001 F 12-2PM 2244 USB Carpenter 27 Y  
 Intended for Freshmen and Sophomores. Students must be co-enrolled in an Introductory Natural Science course. This course meets for the 2nd 7 weeks of the term.

27385 PI SEM 002 ARR ARR Carpenter 2 N  
 BIO 117.002 IS AN ONLINE ONLY COURSE. Students must be co-enrolled in BIO 171 or BIO 172 or BIO 173. Registration upon request. Please complete the form found at the following site <https://tinyurl.com/BIO117>. The course will be available from TBD. Questions about the on-line section should be directed to Dr. Lynn Carpenter (landersn@umich.edu).

**121 Topics in Biology 1.00-3.00**  
 34167 PI LEC 002 F 11-12PM 2062 PALM Baucom 7 Y  
 Enrollment is restricted to first-year students, including those with 2nd year standing.

# English Language Institute

## English Language Institute (ELI) Open Sections

- ELI courses fall into three categories:
1. English for Academic Purposes courses for graduate students;
  2. Language and teacher training courses for international GSIs;
  3. Teacher training courses for students planning to teach ESL in local communities or abroad.

For assistance in choosing an appropriate course, please go to the ELI Academic Advising website:  
<http://bit.ly/eliadvising> or e-mail: [eliadvisor@umich.edu](mailto:eliadvisor@umich.edu) to make an appointment to speak with an advisor.

## Economics Department

### Economics (ECON) Open Sections

101 Principles Econ I										4.00 ADVISORY	
11161	P	DIS 102	T	830-10AM	4404 RAND	Abourezk-Pinkstone			1	N	
11160	P	DIS 106	T	1130-1PM	120 WH	Kim			1	N	
11157	A	LEC 100	MW	10-1130AM	140 LORCH	Stevenson					

Students will be auto-enrolled in Section 100 when they elect Sections 101-111.

Evening exams are part of the course requirements, and are offered only at scheduled dates and times. If you miss an evening exam, you will receive a zero for that exam (unless your absence is excused according to the policy stated in the course syllabus).

Evening Exams:

Monday 2/06/2023 8-10pm  
Monday 3/13/2023 8-10pm

No overrides will be issued for this class.

## History Department

### History (HISTORY) Open Sections

--IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, THE DEPARTMENT MAY GIVE AWAY PLACES IN A COURSE IF STUDENTS DO NOT ATTEND THE FIRST TWO COURSE MEETINGS.  
 --ALL STUDENTS MUST TAKE ACTION THROUGH THE REGISTRATION PROCESS TO MAKE SURE THAT THEIR OFFICIAL COURSE SCHEDULES MATCH THE COURSES THEY ARE ATTENDING.  
 --100 THRU 500 LEVEL 4 CREDIT HOUR COURSES ARE 4 CREDIT HOURS FOR UNDERGRADUATES ONLY.  
 --SURVEY AND INTRODUCTORY COURSES ARE FOR FRESHMEN AND SOPHOMORES.  
 --SURVEY COURSES REQUIRE BOTH LECTURE AND DISCUSSION SECTIONS. DISCUSSION SECTIONS DO NOT MEET UNTIL AFTER FIRST LECTURE.

## Psychology Department

### Psychology (PSYCH) Open Sections

--IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS ARE REGISTERED OFFICIALLY FOR A COURSE, THE DEPARTMENT MAY REQUEST THAT THEY BE DISENROLLED IF THEY DO NOT ATTEND INITIAL CLASSES.

<b>111</b>	<b>Intro to Psych</b>	<b>4.00</b>							
26975	PIR DIS 002	W	4-5PM	142 LORCH	Zake			2	Y
All sections meet from the 1st day of class, even if they occur before the 1st lecture.									
26976	PIR DIS 003	W	5-6PM	120 WH	Ekwueme			3	Y
All sections meet from the 1st day of class, even if they occur before the 1st lecture.									
26982	PIR DIS 009	F	10-11AM	1632 CHEM	Zake			4	Y
All sections meet from the 1st day of class, even if they occur before the 1st lecture.									
26985	PIR DIS 012	F	1-2PM	1632 CHEM	Xiao			1	Y
All sections meet from the 1st day of class, even if they occur before the 1st lecture.									
26974	AI LEC 001	TTH	230-4PM	1324 EH	Hoeffner				
Students are auto-enrolled in LEC 001 when they elect a DIS 001-013. All sections meet from the 1st day of class, even if they occur before the 1st lecture.									
11679	PIR DIS 036	TH	6-7PM	271 WEISER	Ali			1	Y
All sections meet from the 1st day of class, even if they occur before the 1st lecture.									
17950	PIR DIS 040	F	12-1PM	142 LORCH	O'Gara			1	Y
All sections meet from the 1st day of class, even if they occur before the 1st lecture.									
38684	PIR DIS 043	W	12-1PM	B247 EH	Addie			1	Y
<b>112</b>	<b>Psy as Natl Science</b>	<b>4.00</b>							
19929	PIR DIS 002	TH	8-9AM	142 LORCH	Mills			9	Y
All sections meet from the 1st day of class, even if they occur before the 1st lecture.									
19931	PIR DIS 004	TH	2-3PM	271 WEISER	Ooi			13	Y
All sections meet from the 1st day of class, even if they occur before the 1st lecture.									
19932	PIR DIS 005	TH	5-6PM	G160 AH	Mills			2	Y
All sections meet from the 1st day of class, even if they occur before the 1st lecture.									
19933	PIR DIS 006	TH	6-7PM	268 WEISER	Belisle			11	Y
All sections meet from the 1st day of class, even if they occur before the 1st lecture.									
19934	PIR DIS 007	TH	2-3PM	B247 EH	Belisle			16	Y
All sections meet from the 1st day of class, even if they occur before the 1st lecture.									
19935	PIR DIS 008	F	9-10AM	4096 EH	Parham			14	Y
All sections meet from the 1st day of class, even if they occur before the 1st lecture.									
19936	PIR DIS 009	F	10-11AM	142 LORCH	Parham			14	Y
All sections meet from the 1st day of class, even if they occur before the 1st lecture.									
19937	PIR DIS 010	F	11-12PM	271 WEISER	Parham			2	Y
All sections meet from the 1st day of class, even if they occur before the 1st lecture.									
19938	PIR DIS 011	F	12-1PM	1632 CHEM	Belisle			1	Y
All sections meet from the 1st day of class, even if they occur before the 1st lecture.									
19939	PIR DIS 012	F	1-2PM	4096 EH	Ooi			8	Y
All sections meet from the 1st day of class, even if they occur before the 1st lecture.									
19940	PIR DIS 013	F	2-3PM	4096 EH	Ooi			12	Y
All sections meet from the 1st day of class, even if they occur before the 1st lecture.									
19928	AI LEC 001	MW	830-10AM	1324 EH	Malley				
Students are auto-enrolled in LEC 001 when they elect a DIS 002-013. All sections meet from the 1st day of class, even if they occur before the 1st lecture.									
Psych 112 meets the Intro Psych prereq for the Psychology and BCN Majors.

## Statistics (STATS) Open Sections

---IT IS CRITICAL THAT STUDENTS ATTEND CLASSES FROM THE BEGINNING OF THE TERM. EVEN THOUGH STUDENTS MAY BE REGISTERED OFFICIALLY FOR A COURSE, THE DEPARTMENT MAY GIVE AWAY PLACES IN A COURSE IF STUDENTS DO NOT ATTEND THE FIRST TWO COURSE MEETINGS.

---ALL STUDENTS MUST TAKE ACTION THROUGH THE REGISTRATION SYSTEM TO MAKE SURE THAT THEIR OFFICIAL SCHEDULE OF COURSES MATCHES THE COURSES THEY ARE ATTENDING.

Psychedelic neuroscience is one of the most dynamic fields in 21st century neurobiology. This course will examine current research on canonical and non-canonical psychedelic drugs as well as the psychedelic experience itself. The focus will be on systems neuroscience, including studies on neurophysiology, neuroimaging, and circuit-level mechanisms. Multidisciplinary engagement is welcomed but the course is designed for graduate students in a related field (e.g., neuroscience, pharmacology, psychology, physiology).?

# Music, Theatre & Dance

--Performance Instruction in the School of Music (Individual Studio Assignment in Music Performance): All students requesting performance instruction must apply online at <https://smt.d.umich.edu/current-students-2/policies-procedures/academic-procedures/#mfw-accordion-action-11>, click on the 'students' tab and then click on the 'online individual studio assignment in music performance' form. Do not register until you have received an email verifying placement in a studio.

## Department Of Dance

### Dance (DANCE) Open Sections

100	Intro to Dance	1.00	ADVISORY					
19491	P LAB 003	MW	9-10AM	DANCE STUDIO 3	Muthukumar	17	Y	
<p>Odissi Odissi is an ancient classical dance form that originated in the temples of Orissa, in India. Odissi is characterized by delicate and sensual upper body movements, use of the torso, rhythmic footwork and opposition within the body. This beginner's course will introduce students to the cultural history and basic movement vocabulary of the classical dance form. Students will explore rhythm, build strength and control, and think critically about the dance form while embodying it.</p>								
19493	P LAB 005	MW	9-10AM	DANCE STUDIO 4	Roseborough	13	Y	
<p>Jazz This class will primarily focus on Afro-Jazz technique and performance while also looking at the genre's development within the 20th century from Black social dances and jazz music.</p>								
19494	P LAB 006	MW	11-12PM	DANCE STUDIO 1	Roseborough	24	Y	
<p>Creative Writing for Dancers Creative Writing for Dancers</p> <p>In this course, dancers will explore how the writing of poetry, fiction writing, and personal essays can develop simultaneously with the choreographic process. This is a writing and choreographic compositional class that will include group and solo work.</p>								
19495	P LAB 007	MW	2-3PM	DANCE STUDIO 4	Ahlijah	12	Y	
<p>West African This course will focus on introducing students to authentic West African dances. Basic timelines and dance steps will be initiated to enable students to grasp and understand African dance gestures and expressions. Class sections will take place in a circular pattern to foster a sense of connection, community building and strengthen social bonds. Gahu and Gota from the Ewes and Kpatsa from the Ga and Ga Adangbe community will be explored. The History and significance of these dances of the indigenous ethnic groups will be studied. Come have a feel of Africa!</p>								
19496	P LAB 008	TTH	9-10AM	DANCE STUDIO 4	Ahlijah	16	Y	
<p>Afro-Pop This course will explore music and dance forms that emerged in West Africa in the late 1960s. These dance forms have taken a different turn in this contemporary time; it has become a trend for most youth. It is a blend of Western African dance and music forms such as jazz and highlife. This dance form is complex, energetic and fun, the class is to help students grasp the basics while keeping the flow of the beat and rhythm. There will be special days where students will be made to wear kicks or any fancy danceable shoe of their choice. Come have fun!</p>								
19498	P LAB 010	TTH	12-130PM	DANCE STUDIO 3	Biza	13	Y	
<p>Congolese This class meets in Studio 3: Room 1180.</p>								
19645	P LAB 012	TTH	3-4PM	DANCE STUDIO 4	Mitchell	4	Y	
<p>Tap This is an introductory level course that will cover the history and fundamentals of tap dance. We will focus on rhythm, musicality, and basic tap technique. We will also discuss the evolution of tap dance from its folk origins to the hoofing and Broadway styles popular today. This class will improve your rhythm, coordination and expand your knowledge of American tap dance. No prior dance experience is required.</p> <p>Attire: Tap shoes replace the required book purchase for this class. I purchased my tap shoes from Amazon. If you do not have tap shoes you must be barefoot.</p>								
20186	P LAB 014	TTH	2-3PM	DANCE STUDIO 4	Mitchell	10	Y	
<p>Magnetism, Manifestos &amp; Mvmt Magnetism, Manifestos, and Movement - M3 is at the intersection of creative writing, fem-forward jazz funk, and wellness best practices. Students will create a working manifesto throughout the semester and then create movement to accompany the manifestos exploring sensuality, self-love, and intention. Students should bring a notebook, pen, pumps, and an open mind.</p>								
102	Modern Dance I	1.00	ENFORCED

West African Drum & Dance								
This course will engage foundational techniques, terminology, and history of traditional West African Dances, primarily those derived from the Old Mali Empire. Technique Building Rituals will condition the body and refine the ear for the polycentric and polyrhythmic requirements for students new to this form or building on prior experience. Additionally, this course will introduce, analyze, and understand the musicality of traditional rhythms on drums and other percussive instruments that align with traditional music from Mali, Guinea, and Ivory Coast. Students will move through this class exploring West African drumming and dancing in a way that allows them to gain the knowledge, vocabulary, and skills necessary to understand and execute movements safely, with proper form, and contextual history all while releasing tension through drumming, sweating hard, and having a blast.

In this class, we will use Floorwork as a vehicle to search for functional movement patterning. We will work through exercises that challenge and enhance our proprioceptive sensitivity in an effort to increase movement variability. We will progress through a Floorwork methodology to aid us in the discovery of sustainable and efficient movement patterning. Improvisation will be used to provoke adaptability in the face of obstacles. We will utilize phrase work to challenge our memory in understanding and recalling new coordinations. The goal is to provide resources for the development of the student's own research and practice. And to invoke a sense of play when confronting chaos and complexity.

Franklin Somatics								
This Franklin Somatics Lab will focus on dynamic neuro-cognitive imagery and movement education based in the Franklin Method. This is a scientifically studied and practiced way to utilize the plasticity of the brain, via imagery, to improve physical function, strength, mobility, coordination and performance. Based in Ideokinesis, students will utilize mental imagery, structural anatomy, biomechanics and movement to bring awareness to and improve dance movement performance.								
25829	PD LAB 005	F	2-4PM	DANCE STUDIO 1	Jelinkova		14	Y
PBT Conditioning								
Progressing Ballet Technique (PBT) is a body-conditioning and strengthening program for dancers of any form of dance, as well as athletes. With the use of exercise balls and a theraband, the class will focus on core strength, weight placement, and alignment of the body that triggers muscle memory. This course helps with injury prevention and rehabilitation, improves technique, and enhances the ability of artistic athletes to perform at their best. Contact instructor for required equipment.

West African Drum & Dance This course will engage foundational techniques, terminology, and history of traditional West African Dances, primarily those derived from the Old Mali Empire. Technique Building Rituals will condition the body and refine the ear for the polycentric and polyrhythmic requirements for students new to this form or building on prior experience. Additionally, this course will introduce, analyze, and understand the musicality of traditional rhythms on drums and other percussive instruments that align with traditional music from Mali, Guinea, and Ivory Coast. Students will move through this class exploring West African drumming and dancing in a way that allows them to gain the knowledge, vocabulary, and skills necessary to understand and execute movements safely, with proper form, and contextual history all while releasing tension through drumming, sweating hard, and having a blast.

Film Field Prod. for Dance Film Field Production for Dance Storytelling								
Course Description: This course is designed to provide students with a thorough understanding of the fundamentals of field and film production by employing the art of dance as a medium of conceptual storytelling. Through the use of pre-, production-, and post-production principles, students will gain knowledge and skills to support the aesthetics of individual cinematic expression.

This course examines the creative potential of integrating choreography and technology through projects in experimental video, social media and the internet, interactive performance, improvisation, and sound design. Supplemental screenings and readings will provide historical and theoretical context to inspire new possibilities for pursuing mediated choreographic practices. We will broadly consider the term ?choreography? to research the ways in which bodies and information move through time and space via a multitude of technological infrastructures. We will discuss what becomes identified as ?technology? and the social, political, and ecological consequences of engaging with these systems. Critical attention will be given to the relationship between technology and visibility, specifically in regard to race, gender, sexuality, class, and ability. Through what labor do technological systems come into the world and who benefits from their being here? Each student will write a treatment for a final project of their own design which can take shape in a variety of forms: video, essay, live performance, etc. As a class, we will organize a public event to share final projects with the community.

Engaging Performance

This course connects undergraduate students directly to the touring, world-class artists who perform music, theater, and dance on the U-M campus. Students will attend six live performances, talk with the artists and arts administrators, and explore how the performing arts are an integral part of our lives and the world at large. Class will include lectures (including some by guests and visiting artists), weekly discussion sections, required attendance at evening performances, interactive classroom activities, weekly readings, response papers about the performances, and group presentations from students in class.

Students are required to attend six live performances: three dance performances, two musical performances, and one theater piece. The dance pieces include Requiem: Fire in the Air of the Earth, a piece which reimagines Mozart's Requiem, reflecting on death and the myths of reincarnation from an explicitly Black perspective; Ballet Folklorico de Mexico de Amalia Hernandez, one of the world's foremost performers of mexican folkloric dance; and SW!NG OUT, a production celebrating America's competitive and partnered dance form, the Lindy Hop. The musical performances include Imani Winds with the Catalyst Quartet, a program of chamber works exploring different pathways of migration; and National Arab Orchestra, an ensemble dedicated to preserving and performing classical and contemporary Arab music. The Theatre performance is a musical adaptation of the classic afro-futurist, science fiction novel: Octavia E. Butler's Parable of the Sower.

This course requires attendance at these performances:

Requiem: Fire in the Air of the Earth - January 8, 2022 8PM

Imani Winds with the Catalyst Quartet - January 29, 2022 8PM

Ballet Folklorico de Mexico de Amalia Hernandez - February 6, 2022 4PM

CAT# Class #	Course Title CODE CMP SEC	DAYS	TIME	LOCATION	CR INSTRUCTOR	PREREQ	LAB FEE OPEN SEATS	WL
National Arab Orchestra - March 19, 2022 8PM								
Octavia E. Butler's Parable of the Sower - March 26, 2022 8PM								
SWING OUT - Friday April 1, 2022 8PM								
These performances constitute the course's primary texts, and the full package of tickets is available to students enrolled in the course for the dramatically reduced rate of \$75. Additional funds are available to support students who cannot cover the cost. Engaging Performance is made possible through a grant from the Andrew W. Mellon Foundation and a partnership between the University of Michigan and the University Musical Society (UMS).

Musical Corpus Study								

CAT#	Course Title	CR	PREREQ	LAB FEE					
Class #	CODE CMP SEC	DAYS	TIME	LOCATION	INSTRUCTOR			OPEN SEATS	WL

In this course each student will choose a repertoire consisting of about 40 hours of music as performed, with a preference for music outside the core repertoire for the student's main instrument. After setting goals, each student will study the chosen music through focused listening, questioning, and reflection, informed by readings related to the student's repertoire. A final presentation to the class will summarize the challenges and rewards of delving into a single repertoire. Class time will be devoted to writing and sharing reflections, and to live interviews with musicians and scholars from a variety of fields.

**Theorizing Musical Improvisati**  
Musical improvisation comes in many forms. Jazz and rap are perhaps two of the most well-known instantiations, but improvisation also figures prominently in baroque, classical, and romantic Western art music traditions (continuo and organ playing, ?fantasies? and ?impromptus,? etc.), Arabic maqam, Carnatic and Hindustani musical traditions, Balinese gamelan ensembles, live coding performances, avant-garde Art compositions by composers such as John Cage, Karlheinz Stockhausen, Morton Feldman, and Julius Eastman, ?free? improvisation, salsa, and Mbira music, just to name a few.

This class surveys the various approaches that music theorists have taken to understand these various instantiations of musical improvisation, including musical analysis, ethnography, practice-led research, developing cognitive models, and exploring how improvisation is embedded in particular historical, social, and political contexts.

**Expanding the Musical Canon**  
This course will consider various alternatives that have been proposed and implemented for changing and enlarging the repertoire of works for study by college students. Each student in the class will develop a core repertoire for study and a model course based on that repertoire.

Climate Change & Healthcare									
Climate change has the potential to become the greatest public health issue facing the world in the coming decades. Therefore, it is imperative that healthcare leaders and health policymakers understand the connections between climate change and health. Primary topics: how the healthcare system can effectively respond to climate-related challenges, how it can mitigate its own impact on the climate and serve as a leading example to other sectors of the economy, and how public policy can promote these objectives.

AI in Healthcare and Policy										
Build an understanding of the developments and innovations in artificial intelligence and machine learning that have transformed healthcare and health policy. While the course will devote some time to programming tools that have enabled this transformation, the primary focus will be to help students develop a thorough and nuanced understanding of areas in healthcare and health policy where these tools can be a force for good, and where they can fail badly. The class format will comprise case studies, invited speaker sessions, discussions, group projects and presentation, along with a limited exposure to mechanistic tools in AI/ML.										
Knowledge of R/python is not required, but can be helpful. Students will be provided access to resources in R for the (small) programming component in the course.										
36275	P SEM 006	TTH	3-430PM	2750 SPH1	Zeoli			7		N
Gender-Based Violence Interven										
This course uses public health frameworks to examine gender-based violence and its impacts. Students will learn challenges and controversies in researching and intervening in gender-based violence, and will examine and propose interventions for specific types of gender-based violence as a final project.

# Public Policy

## School Of Public Policy

### Public Policy (PUBPOL) Open Sections

201	Systematic Thinking	4.00	ADVISORY		
32566	P R DIS 007 F	12-1250PM	1230 WEILL	Zanyk McLean	1 Y
31743	A LEC 001 MW	4-520PM	1120 WEILL	Hall, Zanyk McLean, Levine	

This course provides an introduction to public policy design and analysis using "systematic thinking" from the social sciences and humanities, with the application of scientific methods and knowledge more generally. Systematic thinking about how social problems are defined/understood and how policy both creates and can address societal problems is essential to the design and evaluation of public policies.

This 4-credit course consists of three hours of lecture and one section meeting each week. The course will cover policy definitions/frameworks, the policymaking process, and how to evaluate and justify public policy through the lenses of science, ethics and social equity. In addition, the course will include a number of short modules, this year focusing on key policy issues that are being discussed in the context of an election year, such as public policies regarding the environment/climate change, public health and health care, education, social welfare, immigration, international trade, and science/technology. A number of guest faculty experts will assist with the short modules.

There are no pre-reqs for this course. PubPol 201 provides an introduction to the field of public policy. Course requirements include two exams, 3 short papers and active class participation (including debates). Students who like 201 might want to look into the Ford School's major and minor in public policy.

413	Prof and Lead Dev	1.00			
41161	P R SEM 001 F	9-250PM	1210 WEILL	Scheerer	11 Y

Course meets on March 17 and 24, 2023.

The goal of this course is to enhance the students' ability to bring about the individual and organizational changes they want to see. This course begins by addressing (1) what effective managers really do and (2) why some high-potential managers succeed while others fail. As effective managers know, the ability to develop and manage relationships with others is critical to a manager's success. This course is based on three foundations: The first focuses on developing self-awareness. After all, managing relationships depends first and foremost on knowledge of individual personal strengths and weaknesses and the impact of these strengths and weaknesses on others. The second foundation focuses on developing an understanding of others. The third foundation focuses on managing specific types of relationships on the job-those with subordinates, peers, and bosses.

This course is designed to familiarize students with core skills in data access, manipulation, analysis, and presentation using Excel (and Excel-like alternatives). Spreadsheet programs remain an important part of professional life, and this course will prepare students for basic and intermediate use of aspects of the program in that setting. Students will learn about data import, formatting, and management. You will also learn about producing tables (including summarization), visualizations, varieties of analysis (ANOVA, regression, etc.), and basic programming. No prior knowledge of Excel is expected, but familiarity with basic concepts of statistics is recommended.

32242	P R LAB 001 MW	1-220PM	3117 WEILL	Worthington	2 Y

Communicating through visual presentation of data is a critical skill in a variety of industries. This course will introduce students to data visualization, from principles to practice. Topics in the course will include: principles of data communication, understanding types of data, grouping and summarization, static presentation of data, dynamic presentation of data, interactive presentation of data, presentation of model results and estimates, and matters of accessibility and style. You will be asked to examine and critique existing work and practice creating visualizations of your own. You will also be introduced to a variety of commonly-used software for data visualization.

Social Justice  
Values & Ethics: Social Justice & Political Conflicts

CAT#	Course Title	CR	PREREQ	LAB FEE					
Class #	CODE CMP SEC	DAYS	TIME	LOCATION	INSTRUCTOR			OPEN SEATS	WL

This is a course for students interested in social justice and equality, social justice movements, anti-democratic movements and the intersections of public leadership, public policy, and the rule of law in the context of the temporal evolution of the democratic state. It will seek to provide a comparative and global understanding of how social movements have shaped and shapes discourses of human rights over time. It will address the role of civic movements and leaders in transforming social understandings and meanings of the concepts human rights (social, political, economic and environmental rights) over the last two centuries. It will explore the relations between individual action, collective processes and outcomes as these affect and are shaped by the contexts of system/s, institution/s, law/s and public policy frameworks. It will address how inherent and intersecting relations of power, systems and structures of dominance are related to the experience of peace, violence, oppression and social resistance. As these are often textured into the context of politics, economics and the environment. It will explore the relationships between public policy, the law, institutional structure, social norms, social conditioning, ideologies, strategic communicative interactions, group engagements and imperial behaviors in the public spheres. It will pay special attention to the consequences social movements, social actors and leaders produce for politics, the economy, the environment, justice, equality, human rights and human lives in the everyday. This course will introduce students to the intellectual and technical rigors of democratic, non-violent and effective leadership in the spheres of policy, the law and society. It will explore the social and political endeavors of such leaders and movements to address the difficult questions facing our world and lives today. In this way it will provide an overview of how leaders negotiate, manage and resolve conflicts in organizational and intra-organizational settings. Importantly it will provide students with a theoretical understanding of how trans-generational and social trauma comes to bear on successful institutional, systemic, and programmatic intervention at the nexus of social justice work, the law and public policy.

Science Policy  
Science, Technology, and the Public Good

Researchers, policymakers, and publics look to science and technology to address some of society's most pressing challenges, from climate change to national security to economic growth. But such efforts are also controversial. Think of fears that automation will create mass unemployment, that biotechnology threatens human health and natural biodiversity, or that the regulation of toxins in the environment is either insufficient or overzealous. This course examines the competing values that shape debates over how and when science and technology provide appropriate solutions to social problems, as well as how and when we should look to technical expertise to settle political and values-based disputes.

Its goals are 1) to equip you with the interdisciplinary skills necessary to advocate for socially responsible science and technology policy; and 2) to provide concepts and tools for reasoning and writing about the normative challenges that shape a variety of policy challenges, within and beyond science and technology.

Background in the sciences, technology, and ethics are not required for the course.

Policy/Pol of Govt Algorithms  
Values & Ethics: Policy and Politics of Government Algorithms

Governments increasingly use algorithms (such as machine learning predictions) as a central tool to distribute resources and make important decisions. Although these algorithms are often hailed for their ability to improve public policy implementation, they also raise significant concerns related to racial oppression, surveillance, inequality, technocracy, and privatization. While some government algorithms demonstrate an ability to advance important public policy goals, others such as predictive policing, facial recognition, and welfare fraud detection exacerbate already unjust policies and institutions. This class examines the opportunities and challenges raised by the use of algorithms in public policy. The course aims to help students 1) build the interdisciplinary skills to thoughtfully reason about the social benefits and harms of government algorithms, 2) apply these frameworks to study policy domains where algorithms are being applied and debated, and 3) analyze and develop policy interventions for regulating the use of algorithms in government. Throughout, we will look to both theoretical writings regarding the politics of algorithms and applied case studies of computational systems and public policies in practice. Students will engage with these topics through readings, class discussions, and a research paper related to the topics of this course. No prior technical background is necessary.

Topics: Governance for Human Flourishing

We are accustomed to thinking of public policy as a remedy for social ills. We notice a problem---undereducated youth, roads in disrepair, or bureaucratic hurdles to small business---and we design and implement policy to remedy the problem. In this course we will take a step back. We'll think about what public policy reveals about our core priorities, what we believe society might achieve, and how policy shapes our relationships with one another. We are interested in the effect that policy has on our social fabric.

The country is polarized, heatedly divided. We are not only fractured, but atomized, our pandemic-induced physical separation a manifestation of our disintegrating social fabric. Is our divisiveness a product of information or does our public policy contribute to it? If public policy is involved, can it also be a source of healing? Can our public policy help to restore our social connectivity? What role does economic policy, urban design, criminal justice reform, and public art projects play in fostering meaningful connections between us?

We'll consider how public policy might work to rebuild our social connectivity using a framework of human flourishing. The four pillars of the framework---dignity, sustainability, community, and beauty---each tap into a value that makes us human and expresses a different aspect of our relationships. These values can guide our policymaking toward attentiveness to compassion and meaningful human connection. And they may help to rebuild our fraying social fabric and the norms that sustain our democracy.

\*Note: Instructor consent required\*

This course is an introduction to programming in the R statistical language. R is a flexible, open-source statistics platform which has gained broad adoption in a variety of fields. Through interacting with R, RStudio, and elements of the "Tidyverse" (a collection of R packages for data manipulation, analysis, and visualization), students will learn the fundamentals of working in R. By completing this class, students should have the baseline skills necessary to continue their self-study in R on topics suited to their own interests.

This course covers fundamentals of programming in R, object types and structure, import and use of packages for expanding R's capabilities, data management, and basic analysis. The course is graded credit/no credit (pass/fail), with weekly review tasks in R. Students are not expected to have prior experience in R or other programming, but familiarity with basic concepts in statistics is recommended.

<b>480</b>	<b>Global Engag Seminar</b>					<b>3.00</b>				
24528	PD SEM 001	MW	830-950AM	1220 WEILL	Hanson			1		Y

\*This course is open only to Ford BA students. Registration by permission only\*

This advanced seminar challenges public policy majors to consider how policy issues are framed and addressed in a non-US context. Student will study a small number of contemporary policy problems in light of the country's specific political, economic, historical and cultural context. The winter break study tour will provide students an opportunity to discuss the policy issues with local stakeholders. Upon return, students will work in groups to produce short, formal policy reports that account for country-specific condition.

The country to be studied will be selected by faculty leading the Global Engagement seminar. Approximately 16 Ford School undergraduate students will be selected to practice in the course, on the basis of application forms to be submitted early in the fall semester. Priority is accorded to students with a strong interest in international affairs and/or limited previous experience with travel and study outside the US. There is a modest program fee to help offset experiences of the study tour; need based financial assistance may be available.

Poverty & Inequality  
 Policy Seminar: Poverty, Inequality, & Public Policy

PUBPOL 495 (Policy Seminar) is for students currently enrolled in the Public Policy Undergraduate Program only, no exceptions. Enrollment is by permission only.

This course examines the nature, extent and causes of poverty and inequality in the US relying on a multidisciplinary literature from sociology, political science, economics, and psychology. The large number of

CAT#	Course Title	CR	PREREQ	LAB FEE						
Class #	CODE CMP SEC	DAYS	TIME	LOCATION	INSTRUCTOR			OPEN SEATS	WL	

anti-poverty programs that have been tried in the last 30 years underscores the extent of disagreement about the causes of poverty, the situation of the poor, and the role of the government in encouraging income redistribution and social change. This course will explore the problem of poverty, theories of poverty, and the implications that these theories have for public policies targeting poverty. We will study issues related to topics such as housing and neighborhoods, structural economic changes like wages and inequality, families and social norms, and mass incarceration to consider how these issues generate and reproduce poverty, lack of opportunity, and inequality.

Utopia or Dystopia?  
Policy Seminar: Utopia or Dystopia? When Imagined Worlds Become Real

PUBPOL 495 (Policy Seminar) is for students currently enrolled in the Public Policy Undergraduate Program only, no exceptions. Enrollment is by permission only.

The pandemic of 2020 demonstrated that dystopias such as Camus's The Plague or Emily St. John Mandel's Station Eleven, far from being implausible fantasies, offer insights into the nature of human cooperation and the potential for its collapse. Dystopias diagnose our social and political vulnerabilities; they warn us what the imminent future may hold. And so in this class we'll study dystopias from the point of view of policy makers, using the genre the way an epidemiologist uses a microscope to identify the hidden source of future calamity. We'll also study dystopia's imaginative cousin, utopia, and analyze real-world attempts at creating utopias in the U.S., Mexico, India, and/or Syria to determine what utopian principles inspired the projects and analyze these experiments successes and failures. Finally, we'll study several examples to learn how the government should intervene when a real-world utopia for some becomes a dystopia for others, that is, when the rights of utopians in a community are being violated. Course themes will include family and gender politics, censorship, class, race, poverty, and connections between idealism and authoritarianism.

History, Reparations & Policy  
Policy Seminar: History, Reparations and Policy

PUBPOL 495 (Policy Seminar) is for students currently enrolled in the Public Policy Undergraduate Program only, no exceptions. Enrollment is by permission only.

Through the use of case studies, we will explore the history and social conditions that have spurred the call for reparations in the United States. The course will begin with an overview of the contemporary calls for reparations, which have generally been led by African American legislators, policy makers, activists and journalists. But as you will learn in this course, other communities and groups have aligned themselves with a call for reparations at various times, often driven by specific historical events. Moreover, as you will read and we will discuss, the call for reparations is not limited to the United States.

As a matter of social policy, some of the earliest claims followed the emancipation of nearly 4 million formerly enslaved African Americans. But the idea of reparations also included Native Americans who saw their lands claimed as they were sent first to the Indian territories in Oklahoma and ultimately reservations across the country. Here we must confront the question of sovereignty and the use and some may say abuse of treaties. Both the case studies of Native Alaskans and Japanese Americans add additional texture to the history of the battle for reparations in the United States. To widen the lens a bit so that we can better understand the American story, we will take brief looks at Germany and South Africa as well.

Ultimately, we will return to today's public debates and ask and discuss whether there is a public policy case for reparations for African Americans. If so, which people of African descent? What should be the contours of the reparation?

30281	P R LEC 001	TTH	4-520PM	1230 WEILL	Hausman			5	Y

This course teaches students the basic tools of macroeconomics and how to apply them to real world economic policy. The goals of the course are for students to (a) understand how to evaluate macroeconomic conditions such as unemployment, inflation, and growth (b) understand how monetary policy and fiscal policy can be used to influence macroeconomic conditions (c) understand media accounts of macroeconomic events. The course will cover a broad range of topics in macroeconomic policy. Examples of issues discussed include the role of fiscal and monetary policies in stabilizing the economy, the relationship between inflation and unemployment, the role of government policy in promoting long-term economic growth, monetary and fiscal policies in an open economy, deficits and debt, and European Monetary Union. The course is structured around the tools (models) of macroeconomics, using primarily graphs, and occasionally equations. Examples are taken from current and recent real-world macroeconomics events and conditions.

Prerequisite: PUBPOL 555 (Microeconomics) or permission of instructor.

*This class counts as an option to fulfill the second economics course requirement for the MPP degree.*

Non-Ford students can register for Ford electives beginning December 6

**580 Values & Ethics** 3.00 ADVISORY  
 33749 P R LEC 003 MW 10-1120AM 1210 WEILL Rohde, Ritchie 11 Y  
 This is a core course restricted to Ford School MPP and MPA students only. Please contact [fspp-registrar@umich.edu](mailto:fspp-registrar@umich.edu) with any questions.

This section of 580 focuses primarily on U.S. policy and politics.

This course seeks to make students sensitive to and articulate about the ways in which moral and political values come into play in the American policy process, particularly as they affect non-elected public officials who work in a world shaped by politics. Topics covered include the tensions between ethics and politics, an introduction to various moral theories that figure in contemporary policy debates, a consideration of the principal values that animate American politics, and issues and dilemmas in professional ethics. The course addresses issues that affect international as well as U.S. policy and politics.

**586 Performance Mgmt** 1.50  
 34484 P R SEM 001 T 1-220PM 1230 WEILL Rabe 5 Y  
 This course will examine issues of performance measurement and management in the context of public sector agencies in the United States. It will focus primarily on the federal level of government but will also consider some state and local government issues and make some occasional reference to cases beyond American borders. This module will be divided into two units. First, it will review the evolution of public management in the United States and consider enduring challenges that frequently lead to management failure. Second, it will consider the lessons from recent decades in which performance management has been prioritized across the federal government and many states, becoming a focal point in American governance. We will consider the wide range of reform initiatives attempted in the U.S. under the broad umbrella of the so-called New Public Management, looking at a number of alternative approaches to public management challenges. This will place particular emphasis on the question of whether or not it is feasible to measure the performance of individual agencies and staff and use those measures to improve government performance. Students will have the opportunity to complete a pair of writing projects, including an independent performance assessment of a federal government unit of their choosing, as well as an oral presentation on their key findings from this analysis.

Survey Design

Public Management: Survey Design for Organizations

Part of successful management is knowing how employees, managers, citizens, and other stakeholders think and feel about organizations in general, about particular policies, and about new initiatives and programs. It's also often important to know whether interventions are working: For example, if a manager has tried to change employee behavior in some way, are employees actually making the desired changes? How can managers get honest feedback about

CAT#	Course Title					CR	PREREQ	LAB FEE		
Class #	CODE CMP SEC	DAYS	TIME	LOCATION	INSTRUCTOR			OPEN SEATS	WL	

employee morale? When measuring public opinion on a complicated issue, how can you be sure that the responses you get are truly answering the questions you were trying to ask? When you are asking people to self-report about their behaviors, when can you trust their responses? In this module, students will be taught best practices for how to design and implement surveys to assess issues like employee morale, public opinion, and program success. Students will not only review and assess existing survey research, but will gain hands-on experience in designing survey questions, collecting survey responses, and in interpreting survey data.

Public Management: Strategic Communication for Advocacy									

This course will introduce students to a range of communication strategies to move public policy forward in public policy areas from climate change to public education, health reform to anti-poverty efforts. For new public policy to emerge, policy experts must learn skills to translate their analytical content to the public audiences that ultimately decide the fate of reform. Class members will examine policy reform from the strategic communications perspective including understanding audiences, identifying partners, developing key messages, storytelling, media relations, delivering the messages through effective channels and measuring impact. Students will develop policy advocacy campaigns which demonstrate the interplay between strategic, effective, targeted communications and achieving and sustaining policy change.

Public Management: Leadership Skills for Mission-Driven Organizations									

In today's complex and dynamic world, leadership is in demand at all levels of every organization. Whether you are a senior leader, middle manager, or individual performer, there are leadership skills you can develop to maximize your influence and impact. In this course, we will build those skills in the context of nonprofit and other mission-driven organizations: from mastering and motivating yourself; to organizing and empowering others; to building distinctive workplaces where people feel trusted, supported, and challenged.

Advanced Negotiations									

Pre-requisite: PubPol 583: Negotiation Basics for Public Policy

<b>589 Conflict Resolution</b>	34494	P R	SEM 001	W	1130-1250PM	1220 WEILL	1.00 Shaefer	12	Y
--------------------------------	-------	-----	---------	---	-------------	------------	-----------------	----	---

Conflict is an evitable part of the human experience--in relationships, at the work place, in public administration and especially in the public policy making process. Unresolved conflict can hinder decision making and impede organization change, but when conflict is addressed, managed or transformed, it is possible for relationships, organizations, and systems to grow and succeed. Drawing on empirical research and case studies, this skills-based course will begin with a discussion of the impact of conflict in systems and a taxonomy of forms of conflict with an eye toward public administration. Then the course will focus on the development of strategies that can be used to resolve or manage conflicts, with opportunities for students to develop those skills through in-class exercises. Special attention will be paid to skills that can be used to address conflicts that emerge across differences such as race and ethnicity, political orientation, and gender.

--	----------------------------------	-------	-----	---------	-----	-----	----------------	-----------------	----	---

The Integrated Policy Exercise provides students with a week long opportunity to work intensively on a policy issue. All students participate as part of a team representing different constituencies with an interest in the problem being studied. Working in groups of 7 to 10, students are assigned a role such as lobbying firm or political operative, or economic group. Groups prepare a political strategy to achieve their clients' objectives and to develop policy positions for their group. The week culminates in a negotiation process among all the groups involved. Topics vary each year.

This year's topic is The State of the Union. The State of the Union (SOTU) is an annual message the President of the United States delivers to Congress on the country's state of affairs. The speech's development involves a wholesale engagement of the entire American political apparatus. This year's IPE will simulate the development and delivery of a SOTU.

CAT#	Course Title	CR	PREREQ	LAB FEE						
Class #	CODE CMP SEC	DAYS	TIME	LOCATION	INSTRUCTOR			OPEN SEATS	WL	

The IPE will take place on Thursday, January 19, 2023 from 6:00 pm - 9:00 pm, Friday, January 20 from 9:00 am - 5:00 pm, and Saturday, January 21 from 9:00 am - 3:00 pm. After listening to your feedback, we decided to move the IPE from its previous time of the weekend after Winter Break to the third week of January. We feel this gives students more time to prepare and properly reintegrate back into the school environment. All other Ford School classes and activities will be canceled during these times. All students are expected to participate in person during the entire event. Please make any necessary arrangements ASAP. The teaching team will consider requests for exceptions in writing (via email to ergerber@umich.edu) and prior to the absence only.

IEDP Course

This course developed from an initiative of the International Policy Students Association (IPSA) at the Ford School of Public Policy. It will be in two parts.

Section 1: Traditional Class Format (1.5 credits)

This seven-week, 1.5-credit course focuses on the evolution of a given country's economic, political and social institutions and policies, beginning with the historical origins of the country. Students examine why the country embarked on the development strategies in different periods and what the consequences of those strategies were. The course will progress to the current period and examine the pressing policy issues facing the country today and how the leaders are dealing with those problems given the internal and external constraints. The country to be studied will be selected in the early part of the previous fall term by the group of students who applied and were selected by IPSA and the faculty advisor for the study tour.

During the seven-weeks, students who will be participating in the second part of the course (the country tour) will choose topics to study and to be further discussed with policy makers in the country. They will also organize meetings with the relevant individuals in the country.

Part 2: Country Tour (1.5 credits)

This course is limited to approximately 20 students who are selected by IPSA and a faculty advisor during the previous fall semester. Those students who have completed PUBPOL674-001 and participated in organizing the trip (including fund raising), will travel to the chosen country during the U-M Spring Break and meet with individuals from a variety of institutions, based on their interests developed in the seven-week course. Upon their return, they will be expected to write a report and to produce web-site material and other deliverables for the Ford School in order to receive credit.

<b>677</b>	<b>Immigration Pol Sem</b>	<b>1.50</b>	<b>ADVISORY</b>							
35655	P R SEM 001	MW	4-520PM	1210 WEILL	Lin			2		Y

Immigration is a phenomenon that touches upon every aspect of American society, from economic growth to neighborhood institutions to national culture. This seminar provides an overview of the effects of immigration on the United States and of the United States on immigrants, with particular emphasis on policies that govern the flow of immigration and that seek to regulate its impact. Topics include immigration law and its development; attitudes toward immigration and immigrants; unauthorized migration; return migration and transnational communities; labor market issues; economic mobility and economic and social niches; political inclusion, organization and co-optation; Americanization and assimilation; generational change; language controversies; ethnic and pan-ethnic identities; and the commercialization of immigrant cultures.

Intro to Chinese Policy

This course will introduce students to China and its policy and economic environments. Drawing on the expertise of Ford School faculty and outside guests, each class will focus on a different policy area. Themes will include (but are not limited to):

- 1) Government and civil society (including the Beijing bureaucracy, local politics, and the role of advocacy groups);
- 2) Economic development (including business, the emergence of a middle class, and rural development projects);
- 3) Environmental issues (including the Three Gorges Dam, pollution problems, and "green" energy projects); and
- 4) US/China relations (including Chinese perceptions of the west, international security issues such as Taiwan, and trade).

17478	P R SEM 001 F	9-250PM		1210 WEILL	Scheerer			11		Y

Class meets in person on March 17 and March 24.

The goal of this course is to enhance the students' ability to bring about the individual and organizational changes they want to see. This course begins by addressing (1) what effective managers really do and (2) why some high-potential managers succeed while others fail. As effective managers know, the ability to develop and manage relationships with others is critical to a manager's success. This course is based on three foundations: The first focuses on developing self-awareness. After all, managing relationships depends first and foremost on knowledge of individual personal strengths and weaknesses and the impact of these strengths and weaknesses on others. The second foundation focuses on developing an understanding of others. The third foundation focuses on managing specific types of relationships on the job-those with subordinates, peers, and bosses.

Topics: Politics of Healthcare Reform

This class will focus on answering the question of what it takes to pass a major piece of legislation -- and what that answer says about the structure of American government and nature of U.S. politics. Its case study will be the century-long effort to create a universal health care system, with a heavy focus on enactment and implementation of the Affordable Care Act.

The course will cover the economics of health care and its effects on innovation, quality and access, with a particular focus on people with serious medical needs as well as lower-income populations and traditionally marginalized communities. The class will review the long history of attempts to pass major health care legislation, from embryonic attempts at compulsory health care in the Progressive Era up through the debate over repealing the Affordable Care Act in 2017. But the broad focus will remain on exploring how factors like the institutional architecture of American government, the power of interest groups, the complexities of public opinion and judgment of individual leaders shape the legislative agenda, specific proposals and the outcomes of debate -- not just for health care, but for all issues.

Diplomacy and Statecraft

Topics: Diplomacy and Statecraft in an age of Globalization

Diplomacy (using non-lethal means to manage interstate relations and foreign threats) and statecraft (managing state power to promote national interests) are the key tools by which a nation's foreign policy is implemented. In other words, in the management of official relations between states and intergovernmental organizations to promote national interests through both cooperation and competition, diplomacy and statecraft are central aspects of the foreign policy toolkit in international politics. Yet, our world is increasingly interconnected, as demonstrated by the domestic impact of external issues. New subjects crowd the international agenda. At home and abroad, many actors participate in international affairs far beyond the realm of states or ministries of foreign affairs. This course will give students insight into the contemporary practice of, and challenges to, diplomacy through an examination of political, economic and development statecraft; multilateral statecraft, including with and through organizations such as the UN, World Bank, and regional organizations; and the use of public diplomacy to spread information (and disinformation), values and norms through educational opportunities, cultural activities, language, and exchange programs, to name a few. We will also review the manner in which diplomacy and statecraft have changed and adapted due to the novel coronavirus (COVID-19) pandemic and other recent global developments such as desertification and mass movements of people. Students will assess lines of action policy makers have initiated to find solutions and explore alternative approaches to these problems. I also place emphasis on the tools and

CAT#	Course Title					CR	PREREQ	LAB FEE		
Class #	CODE CMP SEC	DAYS	TIME	LOCATION	INSTRUCTOR			OPEN SEATS	WL	

skills needed for policy analysis and the formulation of effective recommendations for decision-making. I will use case studies and group exercises throughout the course and there will be a number of policy writing assignments and oral presentations. Students are encouraged to think, act, and write like diplomats and to appreciate diplomacy as a vocation. Through the course, students connect diplomatic trend lines with today's international headlines. Students will gain expertise on a contemporary diplomatic challenge of their choosing through research and readings policy project that culminates in a written policy memo to the next president.

 GenderRaceEmployment  
 Topics: Gender, Race, and Employment Policy

More than 50 years after the passage of the Civil Rights Act, significant gender and ethno-racial inequality in the labor market remains. Why? This course relies on a multidisciplinary literature from sociology, economics, psychology, and socio-legal studies to examine ethno-racial and gender inequality in the labor market. We will first review and evaluate major explanations of inequality in the labor market, including employer discrimination, human capital differences, sexual harassment, occupational sex segregation, mass incarceration, inflexible workplaces, and segregated social networks. Then, we will discuss public policies and organizational efforts that seek to directly or indirectly ameliorate ethno-racial and/or gender inequality, such as paid family leave, "ban the box," unconscious bias and sexual harassment trainings, and increases to the minimum wage.

 Policy & Mgmt in Nonprofit Sec  
 Topics: Policy & Management in the Nonprofit Sector

The nonprofit sector has emerged as one of the cornerstones of American society, and yet remains very much a work in progress. The "third sector" faces unique and evolving pressures in areas such as social enterprise, philanthropy, mission focus, performance measurement, sector blur, and more. In our class we will examine how some of these broad issues intersect with the day to day operation of nonprofit organizations. By considering sector tensions from a management perspective, ultimately we will each develop our own informed view on the appropriate role and function of the nonprofit sector within society. Future policy makers and nonprofit managers alike will enhance their ability to formulate positions on policy issues that impact the sector.
